

Liquid C2 SecureEmail

Email Security

About the Liquid SecureEmail

Established in 2004, SYNAQ is a trusted to process and deliver mail for over 46,000 domains across South Africa, Africa, and the Globe.

100% anti-virus and 100% phishing protection against the leading South African banks, backed by our money back guarantee.

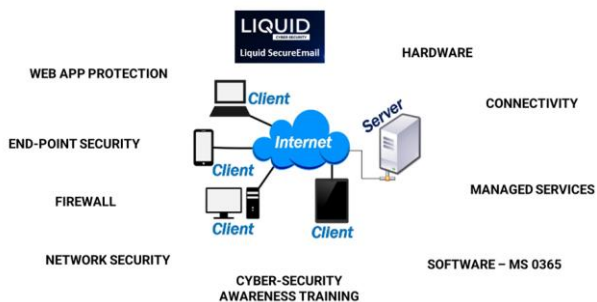

World-class telephonic and email support included with all contract types. A dedicated Channel Manager to represent your organisation in ours.

All data is hosted within the borders of South Africa.

Liquid SecureEmail Core Features

With advanced spam and URL threat detection, 100% virus protection, Identity Threat Protection (ITP), Data Leak Prevention (DLP) and the only 100% punitive phishing protection SLA against leading banks in South Africa.

- Advanced spam and URL threat detection
- 100% virus protection
- 100% punitive phishing protection SLA against leading banks in South Africa
- Bi-directional anti-virus, anti-phishing, anti-spam
- Identity Threat Protection (ITP)
- Data Leak Prevention (DLP)
- LinkShield – protection against malicious links as the predominant email attack vector

Power Features of Liquid SecureEmail

- **Identity Threat Protection** - A set of tools designed to combat and further reduce the risk of email phishing attacks. The toolset includes domain anti-spoof management (DAS), Protection Bypass Management, and Executive Fraud Protection management (EFP) designed to combat whaling.

- **Data Leak Prevention (DLP)** - Helps IT managers who want to prevent sensitive and confidential information leaking out of the organisation via email. Create peace of mind by implementing business rules and policies that effectively prevent the transmission of emails that contains sensitive content.
- **LinkShield (LS)** - LinkShield rewrites URL links contained within emails and checks for URL based phishing, ransomware, and malware attacks when the mailbox user clicks on the link is safe to visit or not. URL rewriting ensures that all email URLs are first redirected to the LinkShield secure proxy for scanning and evaluation.
