**evolutio**  
Empowering the cloud

## Who are we?

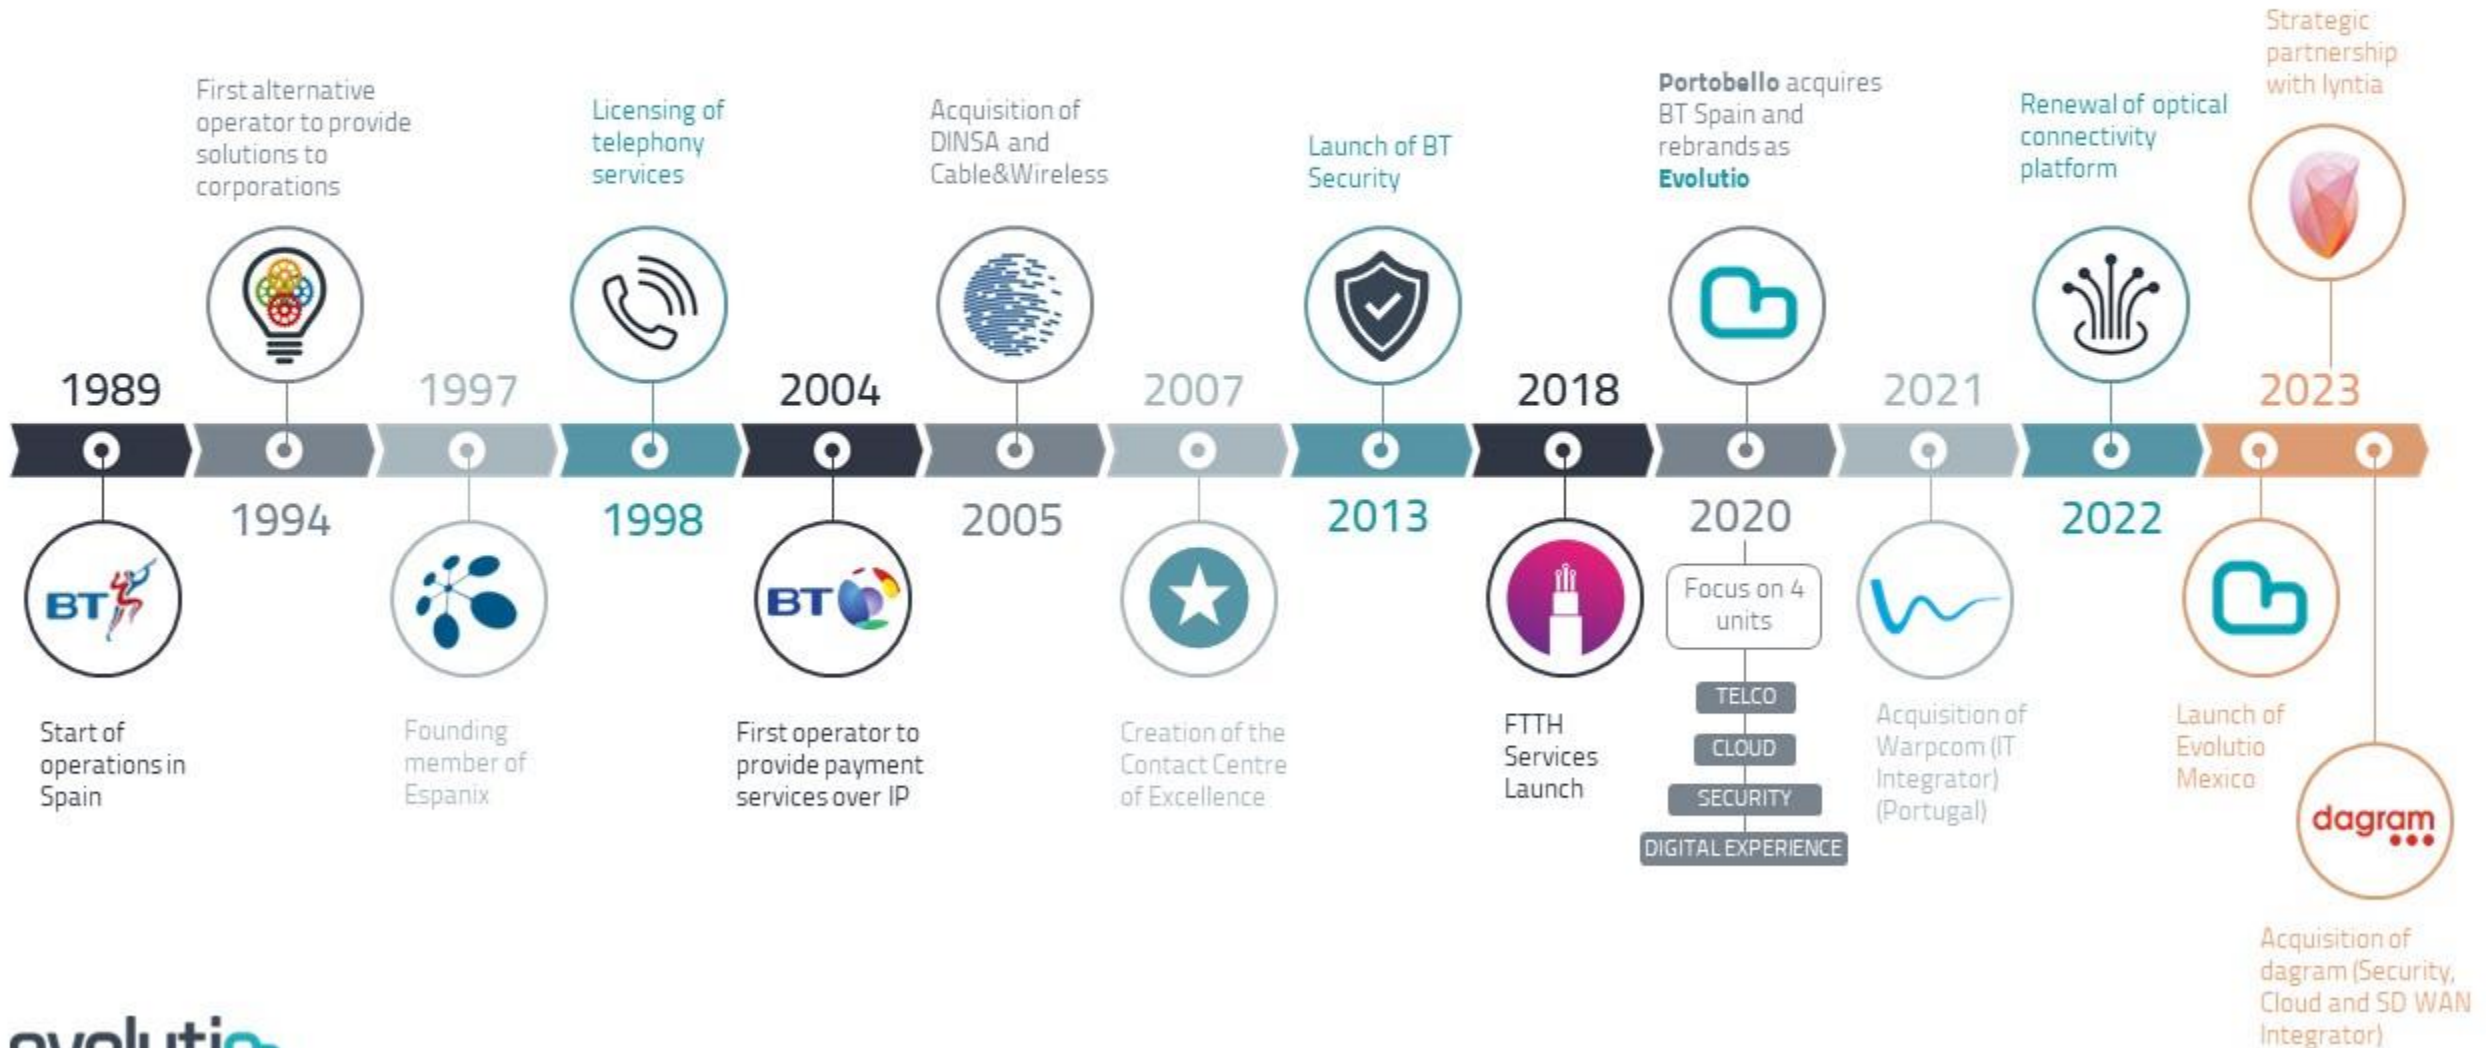

Evolutio is a Spanish company expert in the **Integration of Cloud Services** for the corporate market and Public Administration bodies.

With a successful track record of over 30 years in the management of IT and telecommunications services in Spain, the Evolutio brand was launched in 2020 to amalgamate existing capabilities and develop new services in **Cloud Integration, Cybersecurity, Digital Infrastructures** and **User Experience environments**.

Headquartered in Madrid, with more than 1.200 professional technology experts, Evolutio's assets include the management of a **national data network, 4 Data Centres connected to hyper scalability, 4 SOCs connected to NOCs and Cloud Ops centres**, mature management tools for multicloud environments and the highest level of accreditation with the main market players, manufacturers and hyper scalability.

## Our story

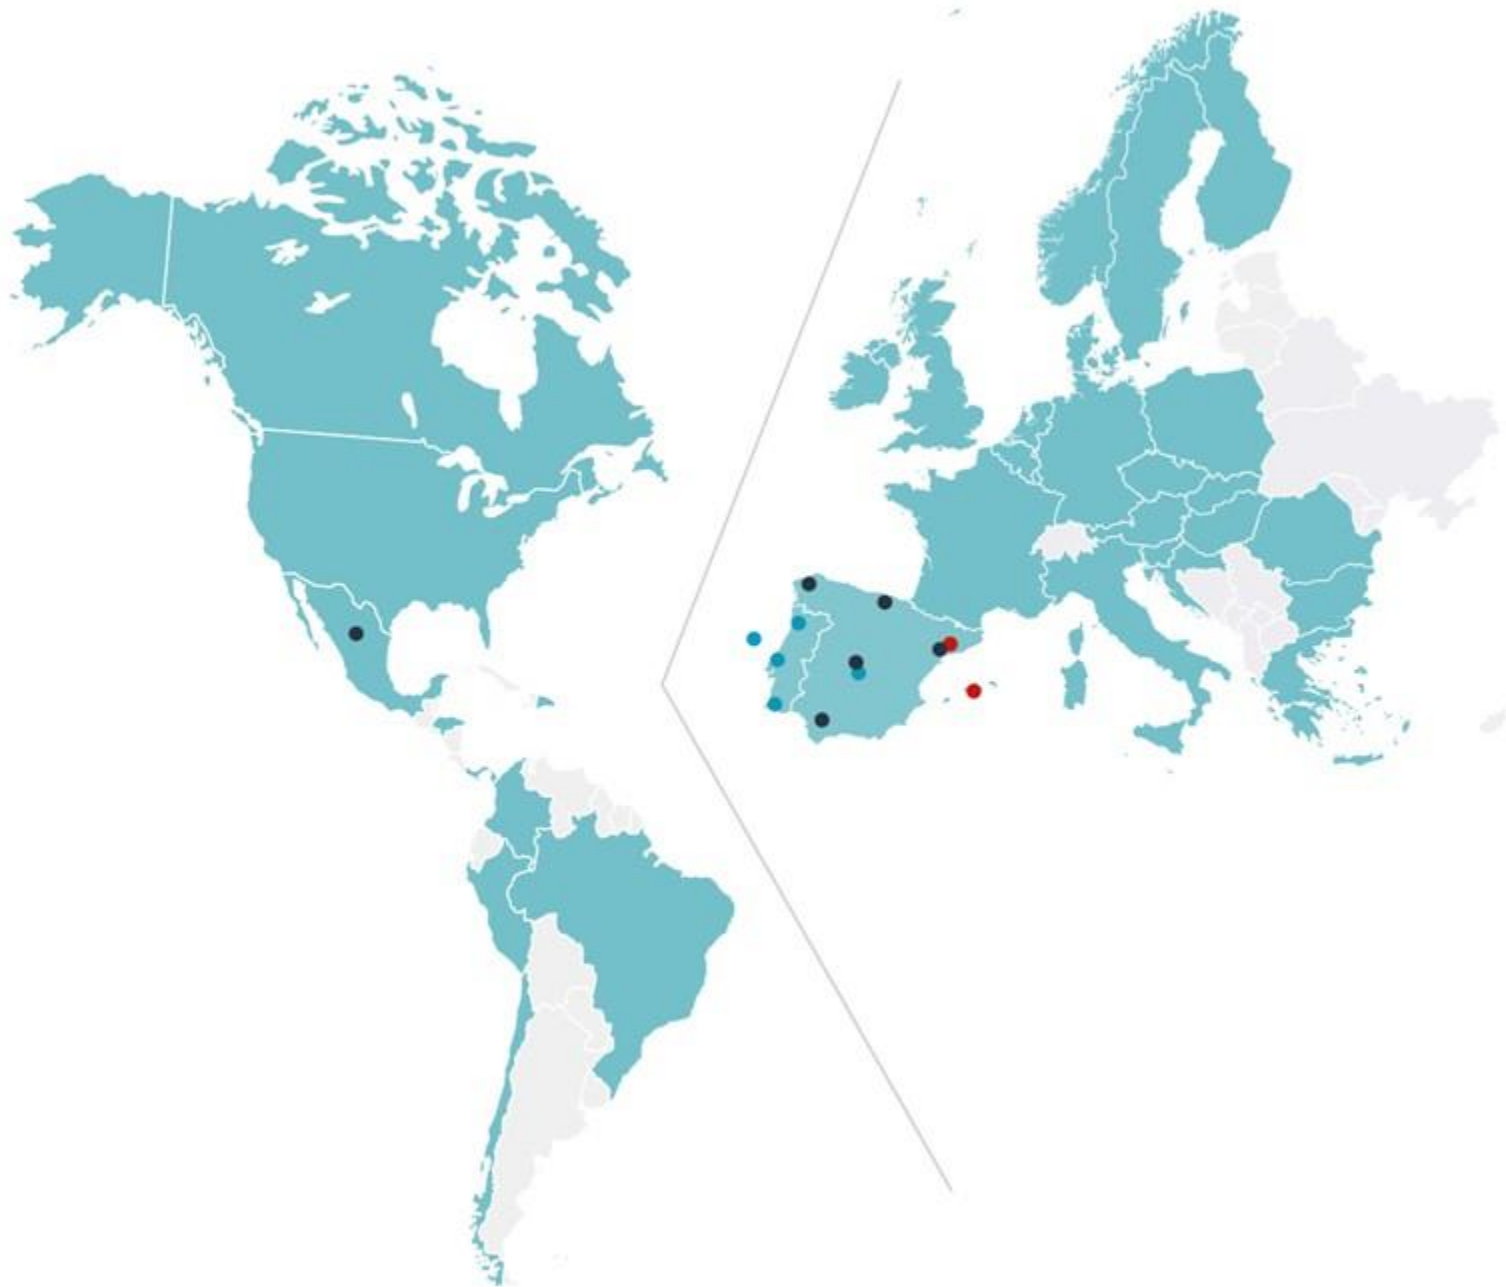

## Evolutio Group

### Mission

To drive our customers' digital innovation and maximise the value of their business by connecting, managing and securing their data and applications through our expertise as a Cloud services integrator.

### Vision

To be the strategic partner in the integration of Cloud services for the corporate market and public administration bodies.

How we can help you

## How we can help you

Our portfolio includes state-of-the-art **NETWORK-EDGE** platforms, services that enable your organisation to take advantage of the agility and efficiency of **CLOUD**, innovative solutions to improve the **DIGITAL EXPERIENCE** of your customers and employees, and the design and implementation of the most appropriate **CYBERSECURITY** strategy for your company.

## Cloud

Enjoy the **benefits of the Cloud** in terms of agility and access to the best technology can be a **complex process**, with hidden costs, regulatory, security and performance risks that require a **new approach** to architecture and governance.

At Evolutio **we accompany you in this process**, with a secure and governed multicloud adoption and operation model, which guarantees a modular and automated approach to achieve an agile Cloud transformation, and without risks in the migration and modernisation processes of loads.

**Evolutio Cloud migration service**

## Our philosophy

In Evolutio, we want to become **the trusted partner** of our customers to accompany them on the path to cloud adoption. Our **goal** is to **provide a highly specialized service** that allows us to be close to our customers and help them make decisions along the way.

# Cloud Adoption Framework Methodology by Evolutio

## Why Cloud Migration services with **Evolutio**?

With our Cloud Migration Consulting service, our clients will take advantage of the competitive bonus provided by working with Evolutio:

### **Our Core Business**

We are specialists in enabling and migrating workloads to the hybrid cloud.

### **Accelerate Cloud Migration**

We have skills specialized in all Cloud technologies and with extensive experience in the analysis, definition and execution of migration processes of critical environments of large corporations.

### **Migrate with a global vision**

The Cloud, Telco, Security and User Experience verticals ensure that you can approach the migration to the Cloud with a global approach

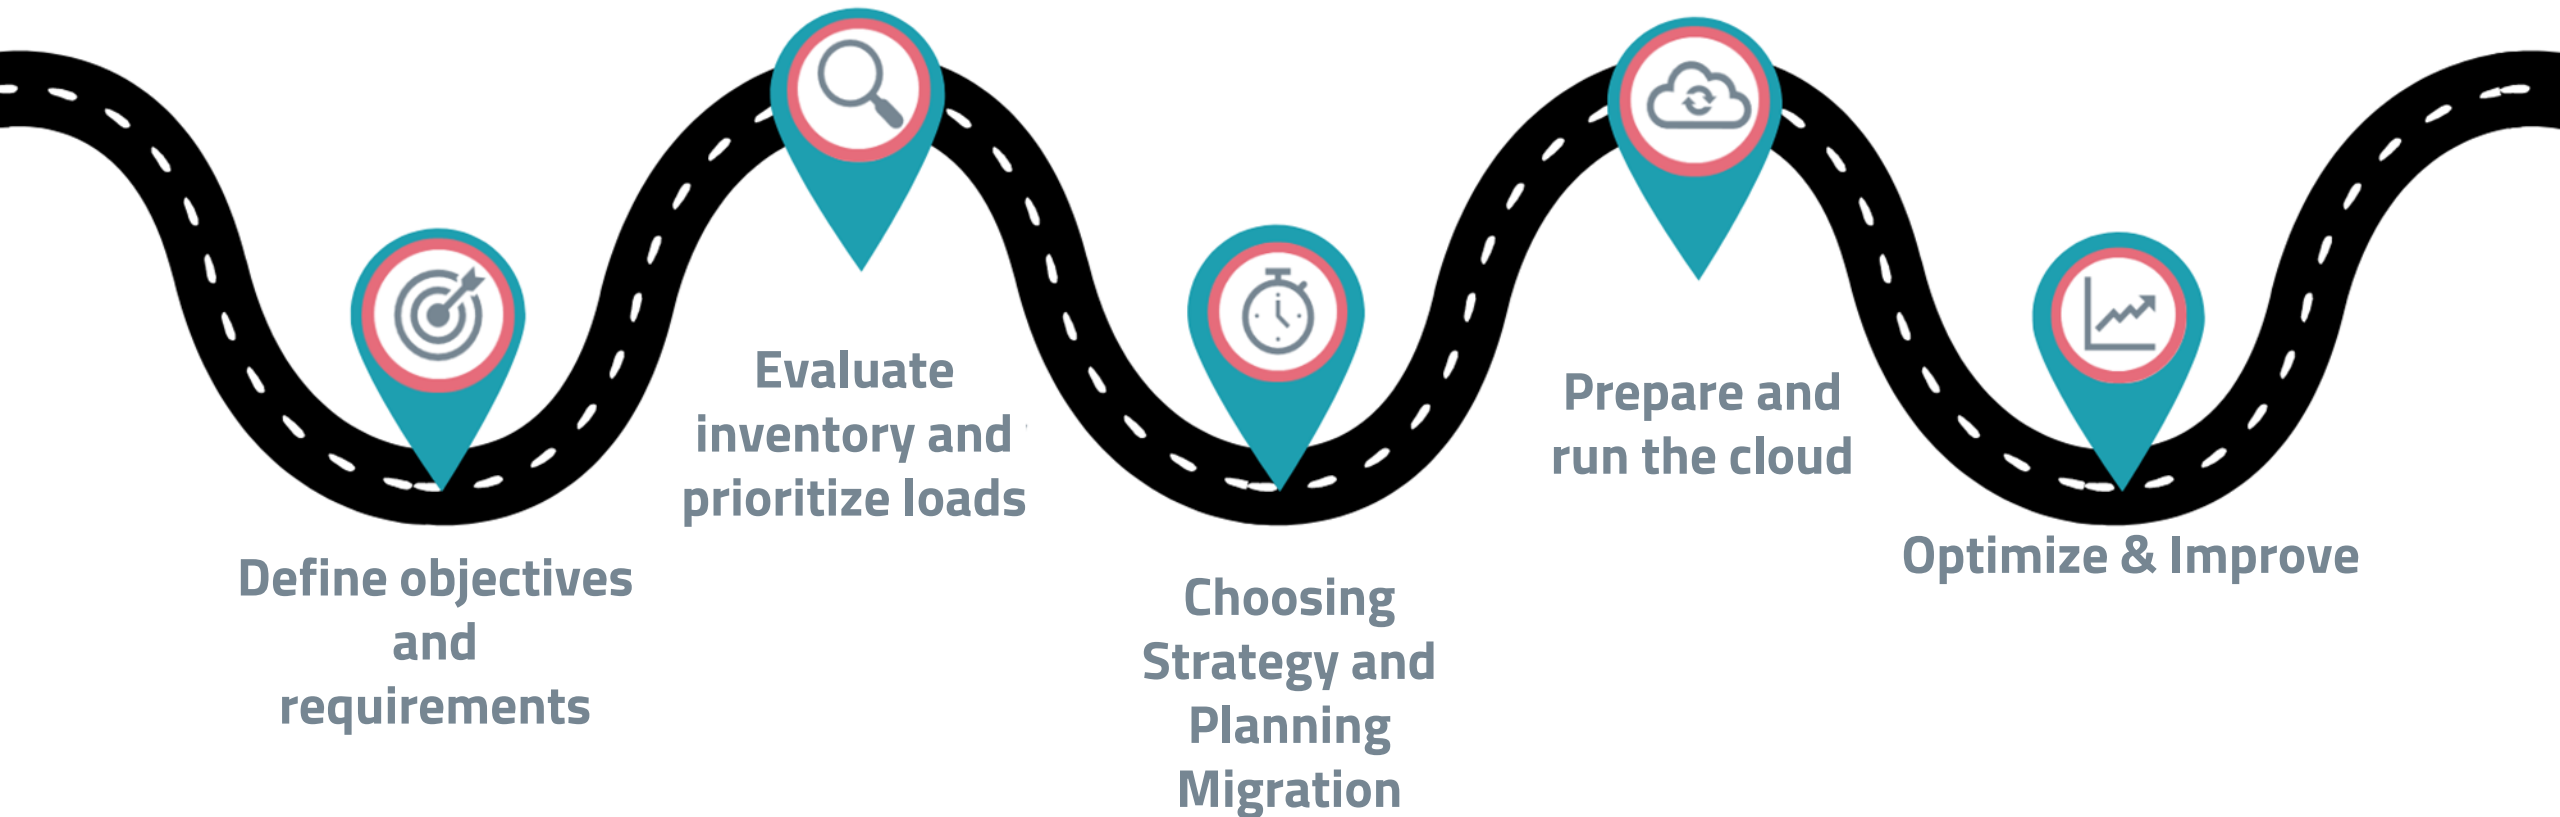

### **Mitigate risks**

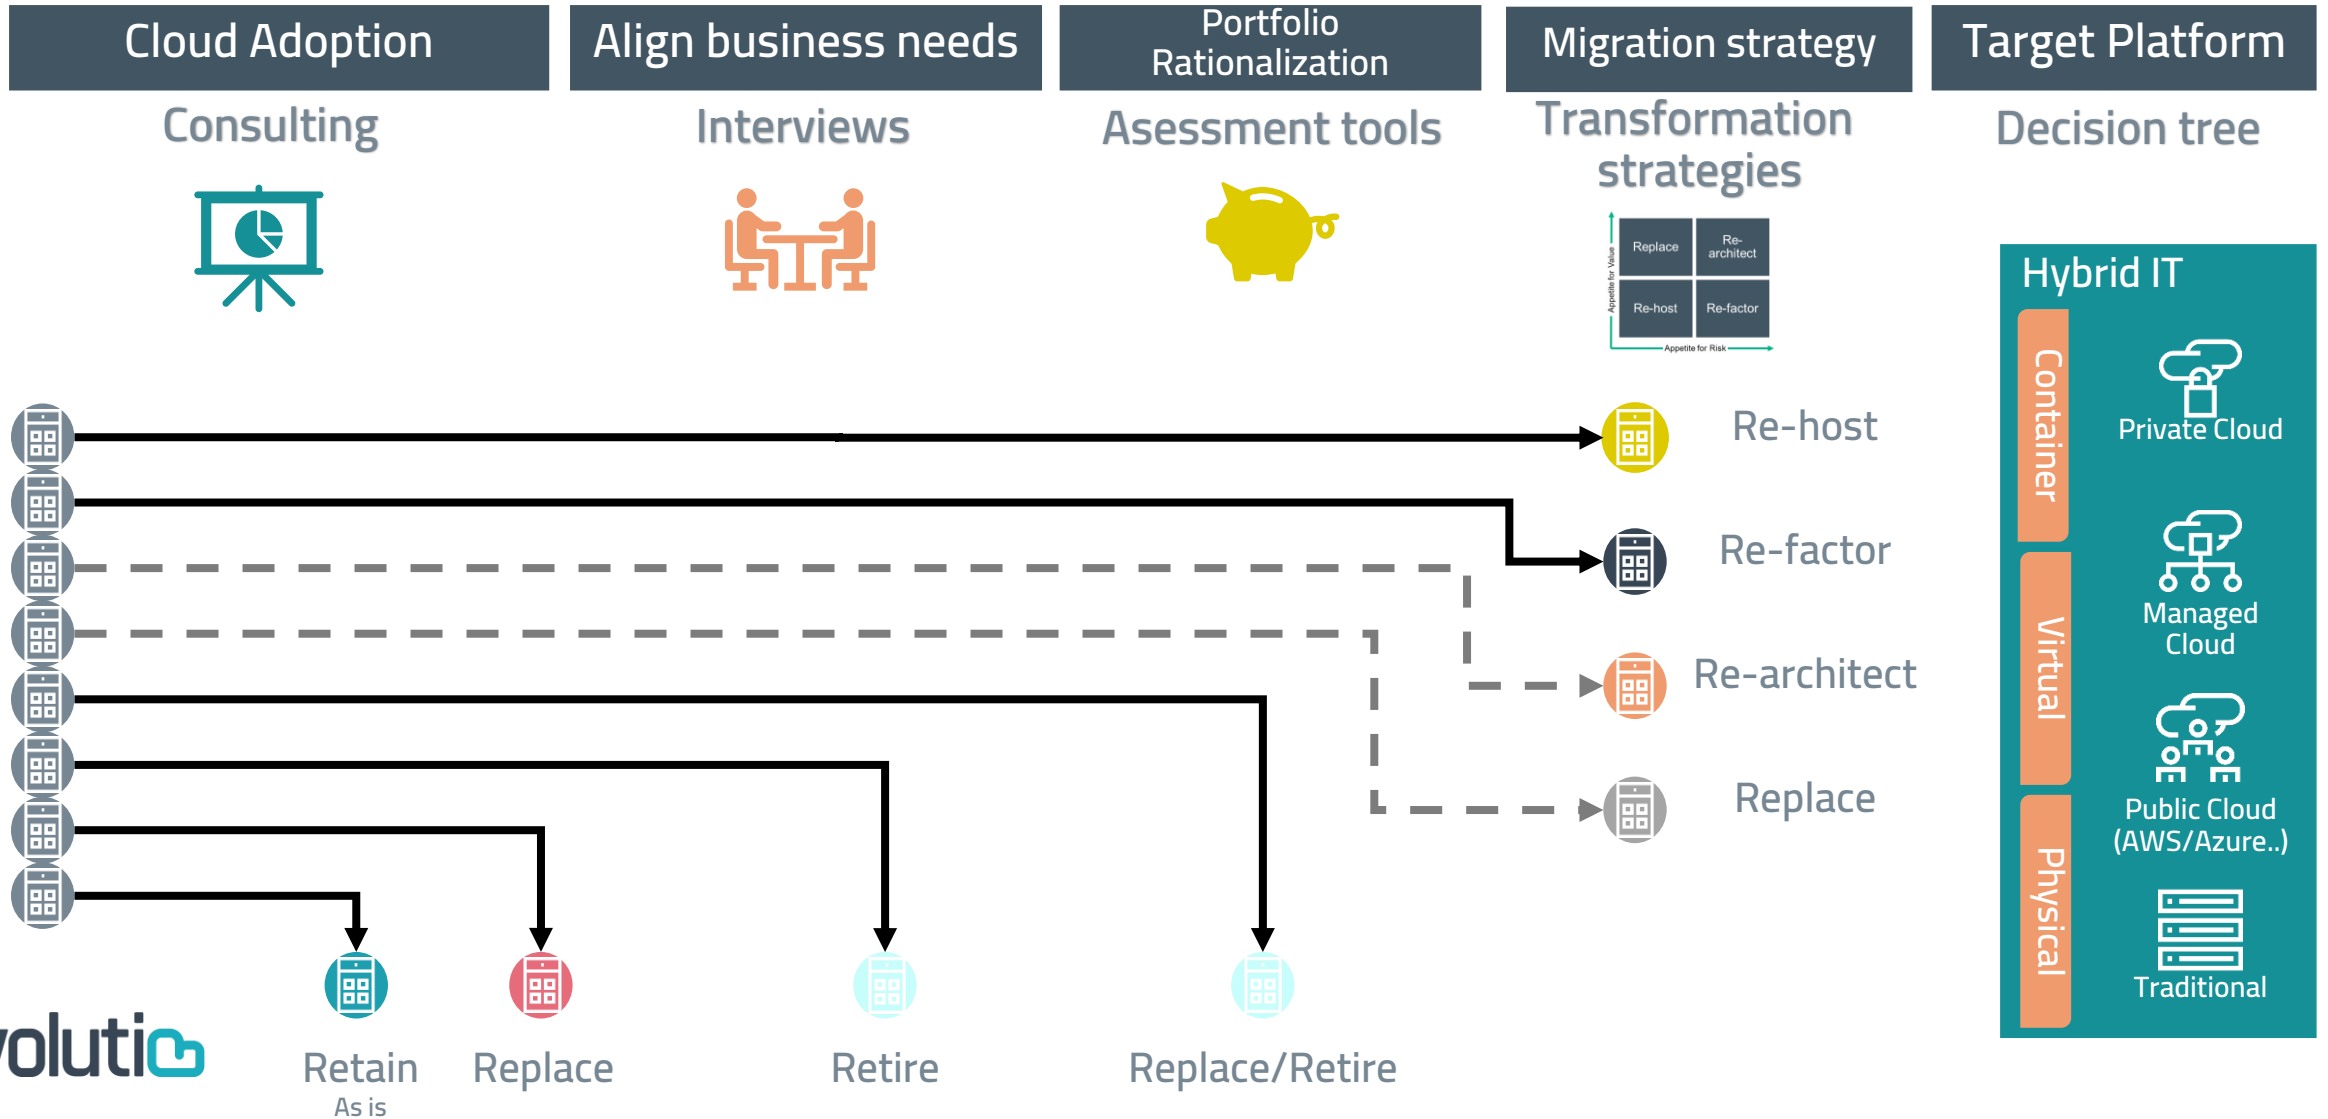

The specialist profiles and our global vision, in addition to having the right tools and a greater capacity to negotiate funds with hyperscalers, help to mitigate any type of technological, functional and/or economic risk in the migration process

# Migration Planning Methodology

We propose an efficient and **successful migration planning** methodology, ensuring a smooth transition and maximizing the benefits of cloud adoption.

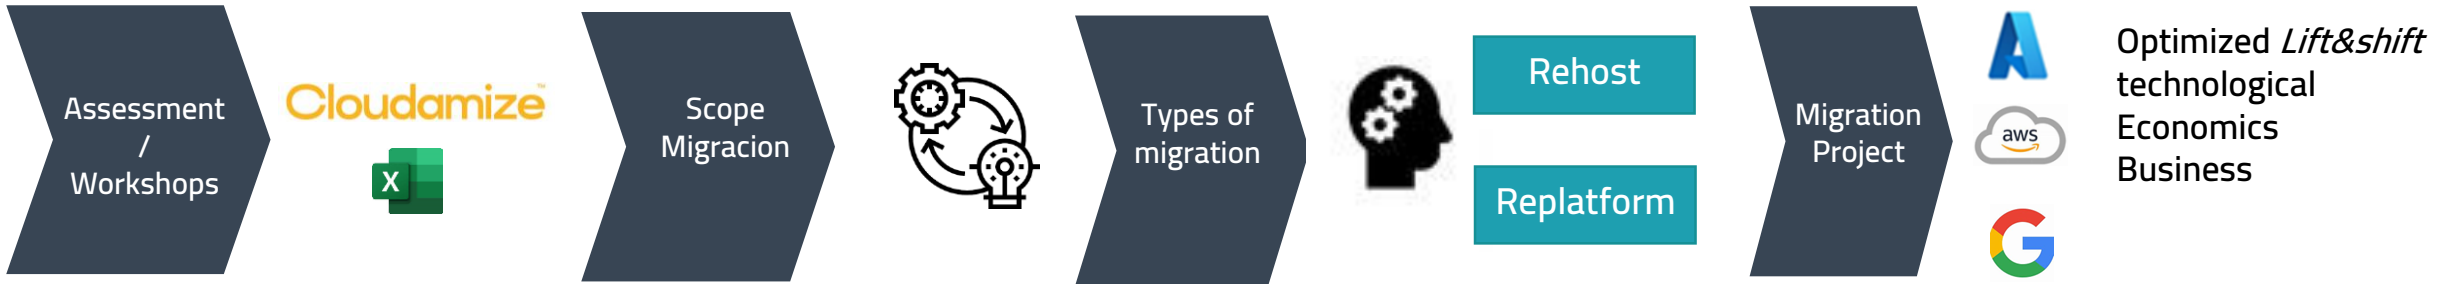

## How we define the proper way to migrate

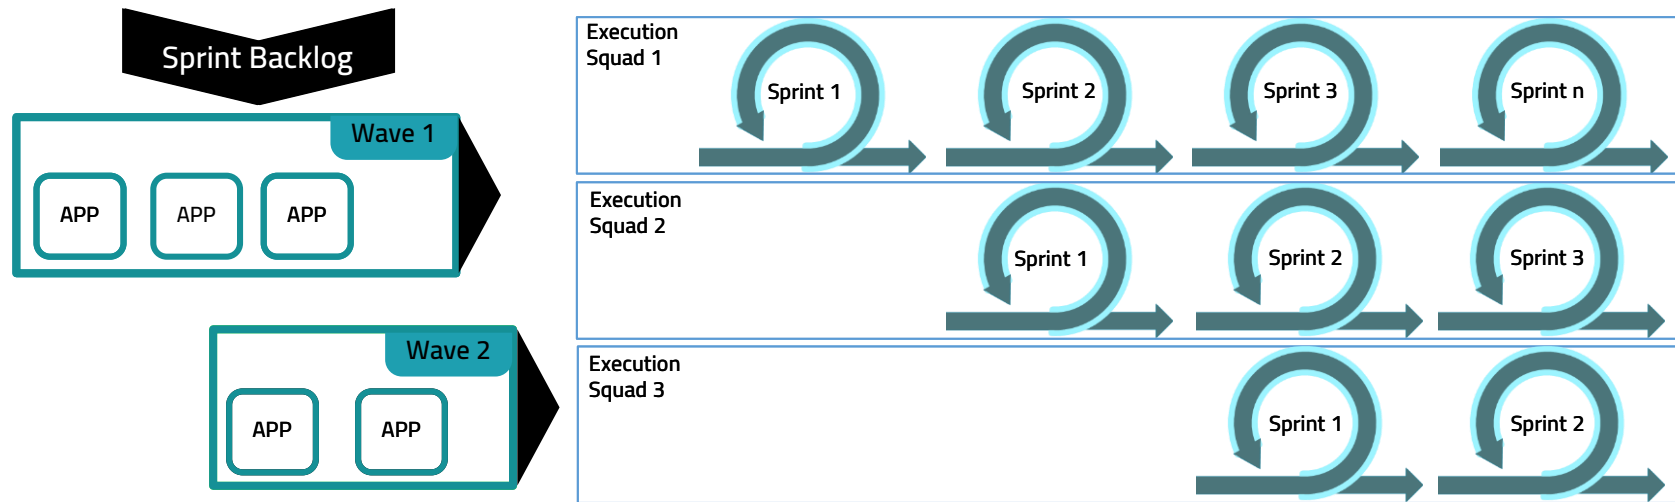

# Cloud Migration methodology **by Evolutio**

▶ The migration will be organized in waves according to the definition of the assessment

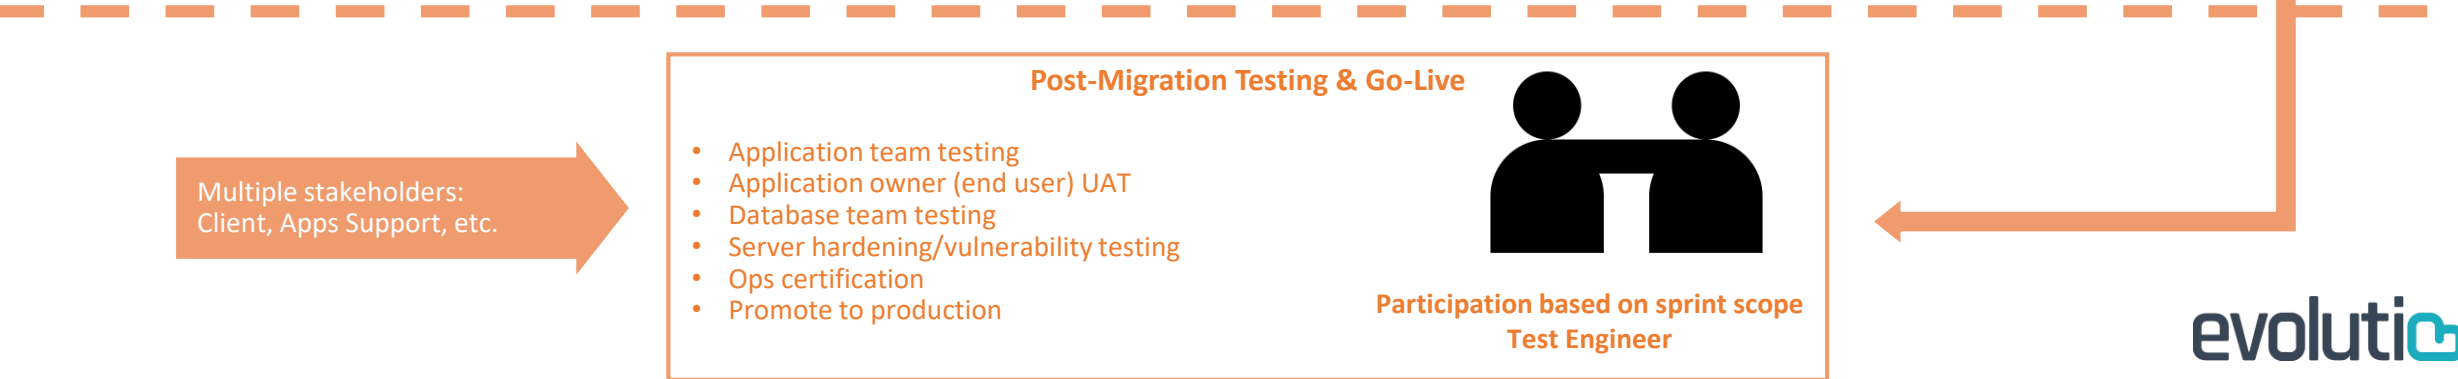

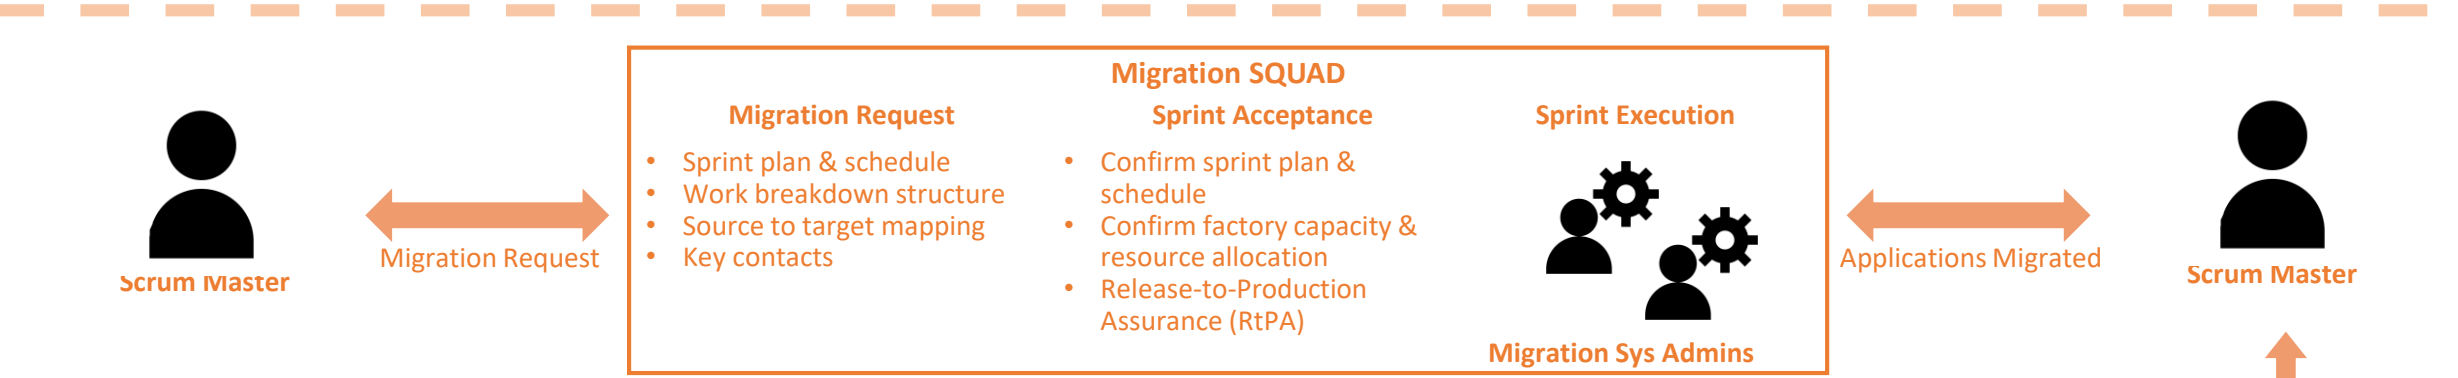

▶ Migration activities will be carried out in accordance with the Agile Methodology that organizes delivery by Sprint

- Squad Team Model: Sprint Execution Squad and Management Squad
- Standards-based migration and cloud tools

# Who and What?

## Consulting Deliverables

Along with the consultancy and workload migration tasks, documentation related to the work carried out by Evolutio will be provided to the client

### DERIVERABLES

### CONTENT

### CONSULTING DERIVARABLES

#### Initial Assessment Report

Describe the current state of the infrastructure and workloads.  
Identify the business requirements and objectives for the migration.  
Highlight the challenges and specific considerations for migrating to the public cloud

#### Cloud migration planning

Detail the strategy and approach for the migration.  
Define the specific steps of the migration process.  
Establish a detailed timeline and assign responsibilities.  
Describe the tools and technologies to be used during the migration

#### Cloud Solution Architecture

Provide a detailed architectural design for the cloud infrastructure.  
Include network configuration, servers, storage, and cloud services.  
Identify security and regulatory compliance requirements

#### Testing and Validation Plan

Describe test scenarios to validate functionality and performance in the cloud.  
Specify acceptance criteria to ensure successful migration.  
Provide procedures for conducting Load, Security, and Disaster Recovery testing (if applicable)

## DERIVERABLES

## CONTENIDO

DOCUMENTS  
DURING  
MIGRATION**Progress Report***(Weekly, during migration execution)*

Provide metrics and analysis on the progress of the migration project.  
Highlight milestones achieved and issues encountered during migration.  
Offer recommendations to optimize performance and efficiency in the cloud

**Final Migration Report**

Summarize the final outcome of the migration project.  
Highlight achievements and benefits gained from the cloud migration.  
Provide recommendations for ongoing optimization and future management of the cloud infrastructure

OTHER DERIVERABLE  
& SERVICES  
(ADITIONAL COST)**Operational Procedures  
document**

Detail procedures for managing and operating the cloud infrastructure.  
Include step-by-step guides for common tasks such as resource provisioning, monitoring, and scaling

**Knowledge Transfer and  
Training**

Training sessions for IT staff and other relevant users on the usage and management of the cloud infrastructure.  
Reference documentation to assist teams in becoming familiar with the new environments and processes

## Special conditions offer

For the calculation of the consulting service, the effort and dedication to the design will be taken into account, within a limited scope at the beginning of the project.

If the scope of the consultation changes during the consultation, or the implementation the service quote presented and agreed with the client must be updated and revised.

In order to be able to quote the service, the client undertakes to deliver the requested documentation in a timely manner.

Migration consulting service only includes the documents and deliverables indicated above. If any additional service is required, it must be quoted separately.
