Dynamics NAV to Business Central Upgrade: A Modern Solution for Your Business

About GtrTek LLC:

We are a certified Microsoft partner with extensive experience in upgrading Dynamics NAV to Business Central. We have tools to help you transition smoothly and successfully to the modern cloud solution. Our collaborative approach tailors innovative solutions for diverse industries, empowering clients to thrive in the digital era.

What we offer

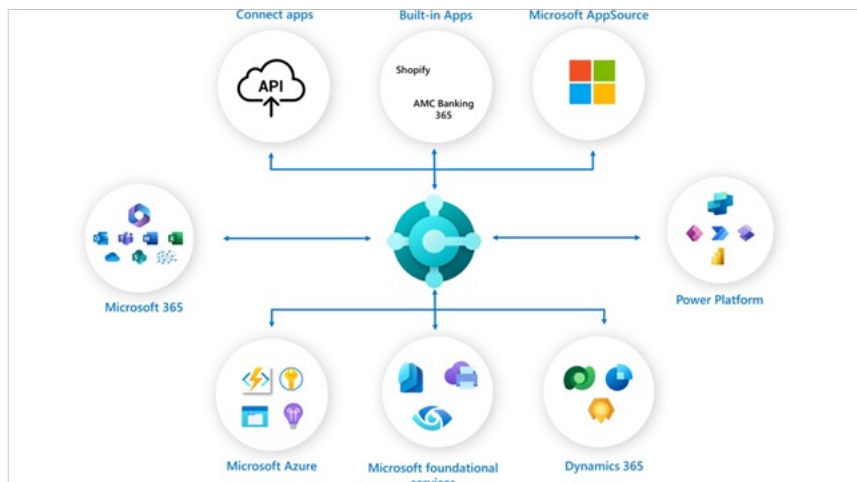

We offer a comprehensive range of services, including:

Assessment and planning: We evaluate your current Dynamics NAV system and business processes, identify your goals and requirements, and design an upgrade plan that suits your budget and timeline.

Data upgrade and integration: We migrate your data from Dynamics NAV to Business Central, ensuring its accuracy, completeness, and security. We also integrate your data with other systems and applications, such as Office 365, Power BI, and Power Apps.

Customization and optimization: We customize and optimize your Business Central system to meet your specific needs and preferences. We also provide training and support to help you and your staff use the system effectively and efficiently.

We provide ongoing support and maintenance services to ensure your Business Central system runs smoothly and securely in the cloud.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way.

Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
