Managed Public Cloud Providers in the UK

All Microsoft Cloud Partners can help you transition your IT environment to the Microsoft Cloud. As a Cloud partner we can help you benefit from flexible and scalable IT.

[Let Us In](#)

Supercharge your business: Fully Flexible and Scalable Public Cloud Solutions

Public Cloud providers can help you - such as Microsoft Azure and Amazon AWS - offer your business a range of services. Our Public Cloud hosting services offer a flexible and scalable solution. You can use the same services, storage and network services with other organisations and access your services via a web browser.

- Lower costs:** No need to purchase hardware or software, and you only pay for the services you use.
- No maintenance:** Your service provider handles your hardware and software.
- Flexibility and scalability:** On demand resources are available whenever you need them, however many you need.
- High reliability:** A vast network of servers across multiple data centres.

66 We've been able to move seamlessly between working in the office and at home with support from a team of experts who can do enough to help.

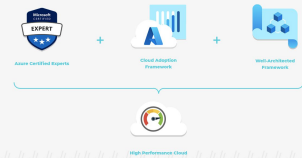

Cliff Wilson, The Pensions Network

Build and manage your Microsoft Azure Public Cloud Services With Wanstor

Microsoft Azure is one of the most widely adopted Public Cloud solutions by businesses. With its flexible and scalable architecture and management capabilities, it can help you reduce costs and improve your IT performance. Our experts can help you get the most out of it.

Partnering with Wanstor to build and manage your Azure environment will mean you have a team of specialist consultants who'll provide expert guidance for designing and deploying a high-performing environment in accordance with Microsoft's best practice.

Moving to Microsoft Azure Public Cloud

When you partner with Wanstor to move your workload into Azure, our certified engineers follow Microsoft's Cloud Adoption Framework. This enables moving your data to the cloud and your management work to be done in the cloud.

Ready to move to the Public Cloud?

Our managed Public Cloud readiness assessment will create a clear picture of where you are on your cloud journey so we can build the perfect solution for you.

Deployment and Management of your Azure Environment

Public Cloud providers have rethought how businesses architect their environments, and in an era where it's rare for companies to be able to deploy hundreds of applications into production every day, it's also essential that the way infrastructure is provisioned would enable to keep pace.

66 Our technical experts are up to date with the fast-changing world of Microsoft and are regularly examined to ensure we keep up to speed with the latest tools and best practices. You can be sure your Azure migrations are in safe and knowledgeable hands with us.

Neil Gilman, Senior Technical Consultant, Wanstor
