

About ServiceDott

Your recruitment process's digital transformation

Established in 2008, ServiceDott specializes in delivering cutting-edge Applicant Tracking System solutions to organizations, aimed at enhancing the efficiency and effectiveness of their talent acquisition processes.

The founders of our company bring forth more than 25 years of experience in the recruitment industry. Throughout their tenure, they have been at the forefront of business development and technological advancement. Their extensive expertise encompasses recruitment best practices, market trends, consultant behavior, and candidate management. This depth of experience has been pivotal in shaping our product.

Every day, our Cloud-based Applicant Tracking System software is utilized by hundreds of companies and thousands of recruiters to streamline their placement and hiring processes, alleviating their workload.

DM Recruit Overview

Simplify your hiring

ServiceDott's premier offering, Data Manager Recruit (DMR), is a cloud-based software that consolidates Applicant Tracking System (ATS) functionalities with Customer Relationship Management (CRM) capabilities into a unified platform.

This versatile software not only streamlines job creation, advertising, and publishing but also tackles challenges associated with capturing candidate resumes, filtering, conducting interviews, managing offers, and the hiring process.

Used by over 200 clients across Asia and experiencing ongoing growth, DM Recruit stands out as the preferred option for job seekers, recruiters, and corporations, thanks to its user-friendly interface, swift performance, and versatile features.

For three consecutive years, our product, DM Recruit, has consistently earned a spot in the top three for the Best Applicant Tracking System in Singapore. Furthermore, our client was honored with awards for the Best Utilization of Recruitment Technology Tools and the People-Centered Award in 2023, achieving a Silver Standard for "Talent Attraction and Acquisition."

DM Recruit Features

Celebrated for its intelligence and flexibility, this software is recognized as one of the most robust ATS systems in the industry. Boasting a wide array of customizable features, it adeptly caters to the recruitment needs and preferences of any organization, providing tailored solutions to fulfill their specific requirements.
