SECURING YOUR DIGITAL FRONTIER IS A CONSTANT BATTLE.

CDW Amplified™ Endpoint
Workshop for Microsoft Copilot for Security

Empower your team with our Workshop for Microsoft Copilot for Security. In today's digital landscape, businesses face escalating security threats. Our service equips your team with the knowledge and tools to effectively utilize Microsoft Copilot for Security, enhancing security measures and safeguarding your assets. Expect improved threat detection, streamlined incident response and fortified defenses.

Workshop for Microsoft Copilot for Security can help you achieve:

Operational Efficiencies

Increased Performance

Reduced Risk

Finding the Right Solution

Our Workshop for Microsoft Copilot for Security is meticulously designed to equip organizations with the knowledge, skills and strategic insights needed to harness the full potential of Microsoft Copilot for Security. Here's an overview of what the service includes:

- Presentation overviews on Microsoft Copilot for Security, Microsoft Defender XDR products, Microsoft Entra and Microsoft Purview.
- Advisory on recommended prompts and prompt books for Microsoft Defender XDR products, Microsoft Entra, Microsoft Purview and specific threats.
- Next steps and recommendations tailored to your organization's security needs.
- Comprehensive insights into utilizing Microsoft Copilot for Security and Microsoft Defender XDR effectively.
- Guidance on leveraging prompt books to address emerging threats and enhance security posture.
- Personalized consultation to ensure alignment with your organization's security objectives and priorities.

By performing the Workshop for Microsoft Copilot for Security, it can provide the following benefits:
- **Enhanced Security Posture:** By leveraging Copilot for Security effectively, organizations can strengthen their security defenses, detect threats more efficiently and respond to incidents promptly.
- **Strategic Alignment:** The workshop provides recommendations on Copilot for Security's best practices to help provide for your organization's security objectives and security challenges.
- **Empowered Teams:** Participants gain the knowledge, skills and confidence needed to leverage Copilot effectively, empowering them to make informed decisions and drive meaningful improvements in security operations.

In summary, our Workshop for Microsoft Copilot for Security offers organizations a comprehensive and strategic approach to harnessing the power of Microsoft Copilot for Security. Through discovery, hands-on learning, expert advisory services and actionable recommendations, we empower organizations to enhance their security posture and stay ahead of evolving threats.

CDW + MICROSOFT COPILOT

As a trusted leader in technology solutions, CDW has cultivated a strong partnership with Microsoft, demonstrating our expertise and commitment to delivering exceptional value to our customers. Here's why you should believe in us:

- **Deep Partnership:** CDW has established a long-standing and strategic partnership with Microsoft, allowing us to leverage their cutting-edge technologies, including Microsoft Copilot, to address the evolving security needs of our customers.

- **Proven Track Record:** With years of experience in implementing Microsoft solutions, CDW has a proven track record of delivering successful outcomes for organizations across various industries.

- **Strategic Insights:** Our close relationship with Microsoft provides us with unique insights into their products and roadmap, enabling us to provide strategic guidance and customized solutions tailored to our customers' needs.

In choosing CDW as your partner for the Workshop for Copilot for Security, you can trust in our expertise, experience and commitment to driving your organization's security success with Microsoft Copilot.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Design → Orchestrate → Manage   On-Premises → On-Journey → Cloud-Based

Services Overview

The following services are included in the Workshop for Microsoft Copilot for Security:

Service	Basic
Discovery: Our service kicks off with an in-depth discovery phase, where our seasoned security consultants evaluate the landscape and fundamental challenges surrounding the organization's existing security infrastructure.	✓
Overview: Participants delve into a comprehensive overview of Microsoft Copilot for Security. Through interactive sessions and practical demonstrations, they gain insights into Copilot for Security's features and functionalities, including its advanced AI-driven threat detection capabilities and seamless integration with other Microsoft security products. **Feature Overview:** Participants receive detailed insights into Copilot for Security's features, empowering them to leverage its capabilities effectively in their security operations. **Microsoft Defender XDR, Microsoft Entra and Microsoft Purview Security Product Plugin(s):** We showcase how Copilot seamlessly integrates with other Microsoft security products, amplifying the organization's security ecosystem's effectiveness and provide an overview around the Microsoft Defender XDR, Microsoft Entra and Microsoft Purview product suite.	✓
Advisory: Our consultants provide expert advisory services, guiding the organization through prompt and prompt book product mapping. This involves aligning Copilot for Security's functionalities with the organization's specific security requirements and objectives, ensuring a tailored approach that maximizes Copilot for Security's effectiveness. **Prompt and Prompt Book Guidance:** We assist the organization in providing guidance/recommendations on the best way to utilize prompts and prompt books around Microsoft Defender XDR, Microsoft Entra and Microsoft Purview products and specific threats.	✓
Next Steps and Recommendations: As the workshop concludes, participants receive actionable next steps and recommendations tailored to their organization's needs. These recommendations empower the organization to implement Copilot for Security effectively within their environment, optimize its usage and drive continuous improvement in their security posture.	✓

CUSTOMER SUCCESS STORY

Organization: Enterprise customer with 3000+ employees

CHALLENGE: The customer faced mounting challenges in effectively detecting and responding to cybersecurity threats. With a growing workforce and expanding digital infrastructure, traditional security measures were proving inadequate in safeguarding their sensitive data and assets. The organization sought a solution that could enhance their threat detection capabilities and streamline incident response processes to mitigate risks effectively.

SOLUTION: Enlisting the Workshop for Microsoft Copilot for Security professional service from CDW, the customer embarked on a journey to leverage Microsoft Copilot's advanced capabilities. Through interactive sessions and expert guidance, their security teams gained comprehensive insights into Copilot's features and learned how to integrate it seamlessly into their existing security workflows.

RESULT: Armed with the knowledge and skills acquired through the workshop, The customer experienced a significant improvement in their security posture. Copilot for Security's AI-driven threat detection capabilities empowered their teams to detect and respond to threats swiftly, minimizing the impact of security incidents. With streamlined incident response processes and enhanced threat visibility, the customer achieved greater resilience against cybersecurity threats, ensuring the protection of their valuable assets and data.
