

A woman with long dark hair, wearing a purple and white patterned jacket, is looking upwards in a server room. The room has blue lighting and visible server racks in the background. The word 'wanstor' is written in white in the top right corner.

wanstor

Azure Optimisation Assessment

Are you getting the most
out of your Azure environment?
Let's find out

You've already taken the decision to migrate your organisations infrastructure and applications into Microsoft Azure. but doing that is only one half of the way to achieve greater IT agility and reduce spend.

The other half is making sure you're using your Azure cloud optimally and this is just as critical in making sure you don't overspend on resources you don't need.

Wanstor have significant experience helping customers optimise their Azure environment. We have developed a 2 day workshop to scope out what steps you need to take to optimise yours.

“

Wanstor have been epic. From seamless massive migration implementation, to the huge improvements in efficiency and functionality. I couldn't have asked for anything more if I'm honest.

Daniel Swithinbank, Catch22

”

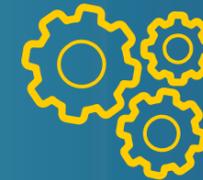

Microsoft's Well-Architected Framework

Our workshop is designed to follow Microsoft's best practice Well-Architected Framework, designed to optimise your platform to meet the five pillars of a well architected solution: security, reliability, performance efficiency, operational excellence and cost optimisation.

Security

As one of the more important aspects of architecture, the protection of applications and data from threats

Reliability

Ability for workloads to recover from failures and continue to function, minimising effects of a single failing component

Performance

The ability of systems to adapt and scale, meeting demands placed by the user

Operational excellence

Reliability, predictability, and automated operation processes that keep a system running in production

Cost optimisation

Balancing business goals with budget justification, ensuring cost-effective solutions, removing unneeded expense, maintaining operational efficiencies

Azure Optimisation Workshop

Our two-day assessment is carried out by our team of Azure cloud consultants alongside your business and IT leaders to provide analysis, guidance, recommendations and an action plan based on business objectives.

Day 1

Gather initial requirements

Prior to the workshop, it's necessary to have the correct access set up to your Azure tenancy enabling us to begin analysis. We provide all necessary documentation and guidance on how to do this.

Initial discovery

During this session, our Azure and technology experts will lead discussions with your senior IT leadership team to understand the core reasons for requiring a cloud optimization audit and identify your key business objectives.

Day 2

Technical analysis

Our Azure consultants will examine your workloads using the Well-Architected Framework, and will then be able to build a detailed report.

Recommendations and enhancements

Our expert consultants will present recommendations on how to optimise your cloud environment in accordance with the business objectives that were agreed.

Our Azure optimization assessment of your subscription has identified the following potential savings

Benefits of our Azure Optimisation Workshop

Using Wanstor as your trusted Azure migration partner can help you revolutionise your business' IT infrastructure.

- + **Full visibility and control over costs**

Confidence that your infrastructure is being managed against

- + **relevant security standards**

Receive a detailed report outlined exactly what the recommendations are according to the overall risk score within

- + **the five pillars framework, all remediation suggestions**

- + **Assessment completed for you by certified engineers and security experts**

- + **An optimised cloud infrastructure that will boost efficiency, keep data secure, and have high uptime and availability**

Receive recommendations for cost-savings, right-sizing and

- + **security enhancements across your entire Azure infrastructure**

The great benefit of working with Wanstor is our direct access to such a large pool of IT specialists within different disciplines giving us exceptional levels of support. The calibre of their technical team is exceptional.

Geoff Wilson, The Fostering Network

Our team has performed many Azure migrations for customers, each one carefully designed to suit their individual business needs, because no two customers are the same. Yet each one has delivered significant performance enhancements and cost savings.

Dustin-Lee Duxbury, Head of Architecture, Wanstor
