

# Real-Time Fleet Analytics with Microsoft Fabric

FREE 2 hour workshop

## Understand how Real-Time Intelligence is changing the game in fleet operations.

Join us for a 2 hour session to look at how Elastacloud have used Fabric's new, AI-enabled capability to help one of the UK's largest fleets - and how they could help you achieve the same.

Analysing live data on driver behaviour, fuel usage and operational targets can help you achieve a number of business priorities;

- Identify cost saving opportunities
- Meet sustainability targets
- Optimise route planning
- Promote good driving practices
- Gamify & reward efficient driving

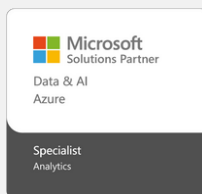

With the inclusion of Real-Time Intelligence, Fabric now offers everything you need to unlock value from your data all from one united SaaS experience.

## Agenda

- Introductions
- Understanding your business needs
- Talking through Fabric's Real-Time Analytics features
- Deep dive on Fleet Telemetry Solution
- Q&A + Next Steps

## Who are we?

Elastacloud are the industry leaders in AI and Data Science solutions, working in Azure since 2011.
