

Innovation Jumpstart – 10 Day Workshop

Innovation Jumpstart is a rapid 10-day workshop that aims at creating solutions to current business needs and roadmap an execution plan. This will be done jointly with functional expertise brought by your Subject Matter Experts (SMEs) and technical knowledge from Nous leveraging Microsoft's Azure and Power Platform.

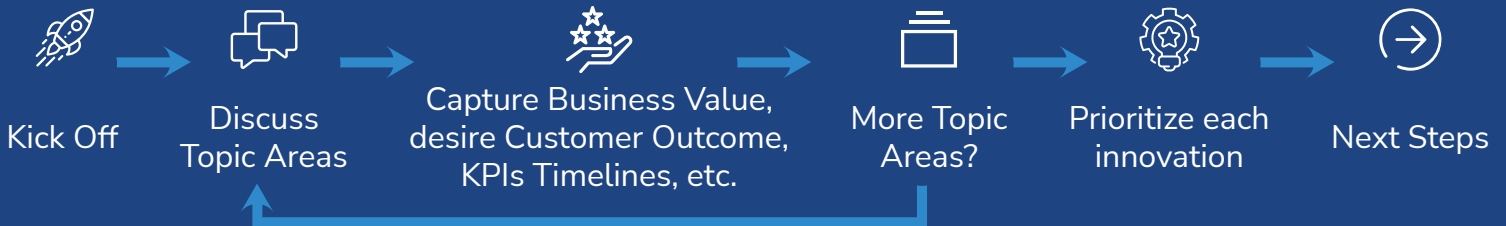

Agenda

The workshop begins with a short briefing session to introduce stakeholders from Nous as well as at your end and to identify areas of focus for the workshop.

We would aim to capture and define success KPIs for at least two areas, with executive sponsorship for the same.

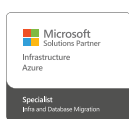

Once the areas of innovation are identified, the workshop dives deep into the technical capabilities and solutions needed to achieve the desired outcomes. Nous will then create a plan of action with your stakeholders that will bring these innovations to life.

Deliverables

The workshop will deliver an Innovation Jumpstart Outcomes Map and a High-level implementation roadmap for the solutions created.
