

Redox Azure Databricks QuickStart:

Lakehouse data streaming
made easy

redox

Contents

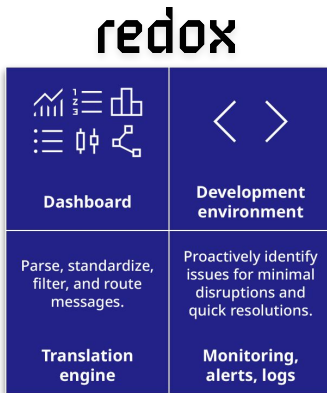

- Solution design
- Simple customer journey
- How to get started today

Bidirectional data streaming that powers your healthcare ecosystem

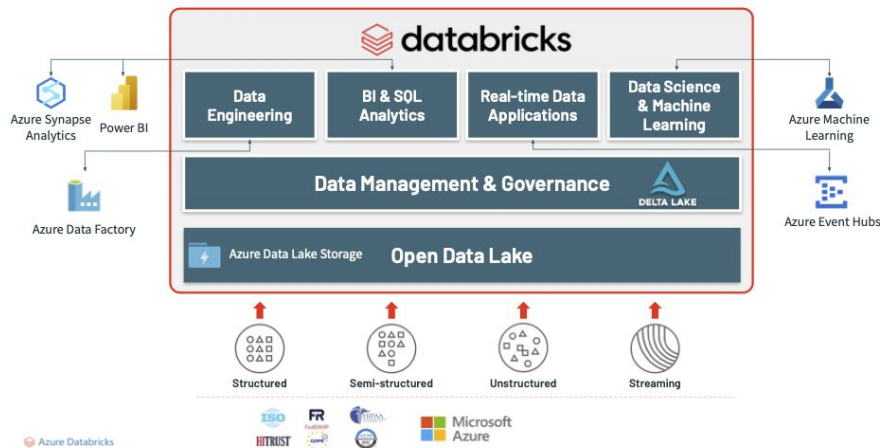

Unlock multiple downstream solutions via a single point of integration

- Epic
- Cerner
- eClinicalWorks*
- athenahealth
- Allscripts
- ...plus 90 other EHRs

- ◆ FHIR
- ◆ HL7
- ◆ CCD
- ◆ X12
- ◆ XML
- ◆ JSON
- ◆ Flat Files / CSVs
- ◆ DICOM
- ◆ NCPDP
- ◆ 27 Custom EHR APIs

- ◆ Bulk Data Backloads / Uploads
- ◆ Interface Filtering
- ◆ Translation Sets
- ◆ Workflow Normalization
- ◆ Custom Data Configurations

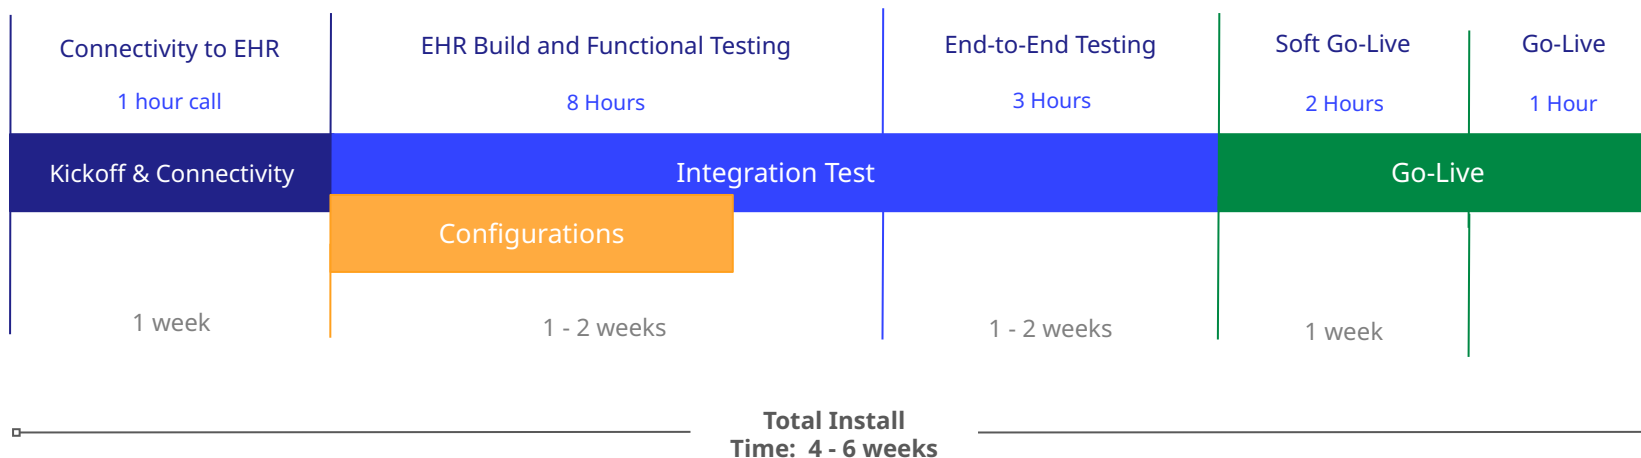

- ◆ Stream directly into Bronze/Silver/Gold Medallion architectures
- ◆ Care gap identification and patient engagement
- ◆ Clinical analytics for population health and quality reporting
- ◆ Prior authorization and risk scoring
- ◆ ...and so much more

Lower the barrier of entry with our simple implementation schema

Avoid drawn out integration timelines and begin using Azure Databricks today

Hurdles faced by traditional integration routes that Redox solves:

Upfront costs: Development, deployment, and testing

Ongoing costs: Monitoring, technical support, and troubleshooting

Expertise: Data access expertise, implementation, etc.

Security: Levels of risk, audits, certifications, etc.

Release timing: Market launch, customer use (go-live)

Project prioritization: Many IT projects, new interfaces have unknown efforts/risks

Get started fast with QuickStart

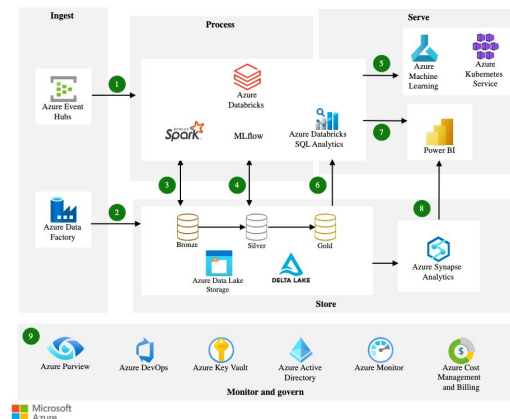

Integrate multiple formats of healthcare source data

- Connect to any data source**
Consistent ingestion and write-back across any data format with any connectivity protocol.
- Scale with speed**
Bi-directional, real-time data exchange, enabled in just weeks.
- Stay secure**
Unparalleled 24/7 security, monitoring, maintenance, and support; HITRUST certified and SOC II compliant.

Leading Microsoft and Databricks partner	Redox provides a fully managed integration solution, allowing for maximum flexibility and ease of use integrating health data sources.
Ideal Customer Profile	HLS Majors, Strategics, and SMC customers interested in exploring Azure Databricks use cases, in need of scalable integration strategy.
Microsoft seller information	Transact QuickStart on Azure Marketplace. Retire customer quotas and MACC obligations.
Time	4-6 weeks from scoping to production go-live.
Upfront costs	\$0* [ECIF-funded] *dependent upon data scope.
Ongoing costs	Consumption-based pricing for Redox platform. Reach out for transaction schedule.
Staffing	Minimal upfront, low ongoing.
