INTRODUCING SOFTSERVE APP MODERNIZATION PLATFORM

Seamless Application Foundation
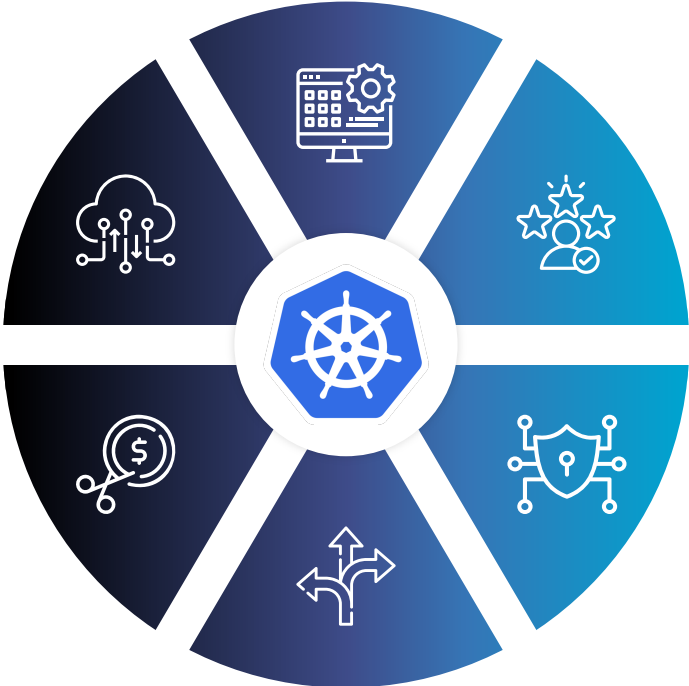

A robust PaaS, enabling quick and efficient client application deployment with Azure Kubernetes Service (AKS)

Rapid Deployment

Deploy applications in minutes with our automated Terraform scripts, accelerating your go-to-market

Architected for Excellence

Designed by certified specialists, aligned with Azure's Well-Architected and Cloud Adoption Frameworks

CI/CD and Cost Efficiency

Plug into any CI/CD process with a platform optimized for cost-effective and sustainable operations
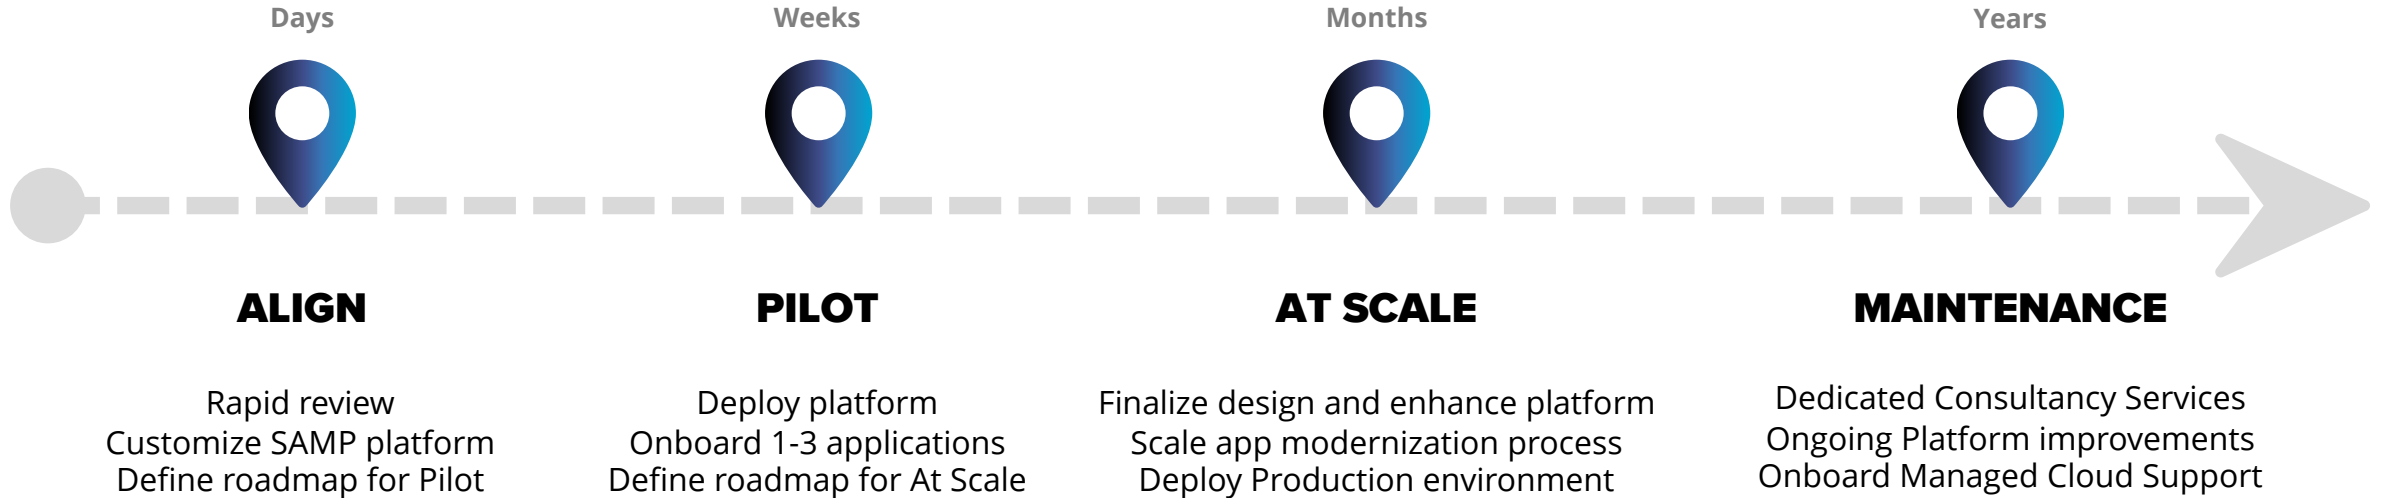

Scalable and Secure

Our platform promises high reliability and security standards, ready to scale with your growth

Flexible & Future-Ready

A flexible, solution-agnostic structure ensures seamless integration and adaptation to evolving business needs

SOFTSERVE'S APP MODERNIZATION PLATFORM

Days

Weeks

Months

Years

ALIGN

Rapid review
Customize SAMP platform
Define roadmap for Pilot

PILOT

Deploy platform
Onboard 1-3 applications
Define roadmap for At Scale

AT SCALE

Finalize design and enhance platform
Scale app modernization process
Deploy Production environment

MAINTENANCE

Dedicated Consultancy Services
Ongoing Platform improvements
Onboard Managed Cloud Support

SOFTSERVE'S APP MODERNIZATION PLATFORM

ALIGN

Our team starts by reviewing your current solution to build a roadmap for SAMP Pilot implementation or report with a plan for enhancements and risk mitigation of the existing container platform.

PILOT

Then, we deploy a standardized and customized platform using the SAMP Pilot accelerator by utilizing IaC. We modernize and onboard one-to-tree applications to show how the platform can meet your needs and bring value.

AT SCALE

Next, our team finalizes the platform design and modernization plan. It scales the solution by expanding the modernization process across the organization, bringing additional 3rd party components and the rest of the applications to the platform.
MAINTENANCE

Lastly, our experts continue with ongoing optimization and maintenance to keep your applications and platform efficient and up-to-date.

softserve

KEY DELIVERABLES

DEPLOYED PLATFORM

Fully provisioned, secure, modular and ready-to-use platform, with AKS as a platform core

WELL-ARCHITECTED

Following the best practices, encompassing landing zone, governance, enhanced security, and monitoring by default

FULL AUTOMATION

Described in Terraform as Infrastructure as Code, with automated CICD

EASY AND FAST

Less than **20 minutes** to deploy

COST EFFECTIVE

Reduced cloud infrastructure costs as much as **30%**

RAPID INNOVATION

Up to **5X** reduced time-to-market for new features and services

soft**serve**

SOLUTION BENEFITS

KEEP BUILDING

Concentrate on a product instead of the platform

ACCELERATE & MODIFY EASILY

Differentiate faster and reduce Time to Market for new services and features

BE SECURE

Guarantee determined security standards at scale

ADOPT TO DEMANDS

Scale automatically when demand increases

GO GLOBAL

Provide services across the world with a unified approach

BE EFFICIENT

Implement better cost controls and improve ROI
