AI-Accelerated Engineering Workshops:

GitHub Copilot & GenAI

Achieve a 30-50% increase in team velocity by incorporating GenAI technologies throughout the software development lifecycle. In this workshop, you'll learn how to empower technology teams with the knowledge and skills to harness GenAI tools, such as GitHub Copilot, to enhance their software development workflows.

GitHub Copilot

Outcomes you'll achieve:

- Understand how GitHub Copilot can benefit you
- A GitHub Copilot adoption approach recommended specifically for your team
- GenAI use cases prioritized for your business
- A POC offering from Slalom to bring GenAI to life in your company

Workshop Highlights:

GenAI Essentials:
A snapshot of Generative AI capabilities and the functions of GitHub Copilot

Adapting GenAI:
Insights on integrating GenAI into current software development practices

Prompt Engineering Primer:
An introduction to the critical role of prompt engineering in GenAI

Use Case Exploration:
Identifying and demonstrating practical GenAI applications

Implementing GitHub Copilot:
Outlining a clear, actionable plan for GitHub Copilot adoption

Duration:	1 Day
Cost:	Free!
Who it's for:	Software developers, architects, product managers, and technology leaders.
How to get started:	Reach out to your Slalom contact for more information.
