ATEA

# Key features of the service

## Security posture analysis

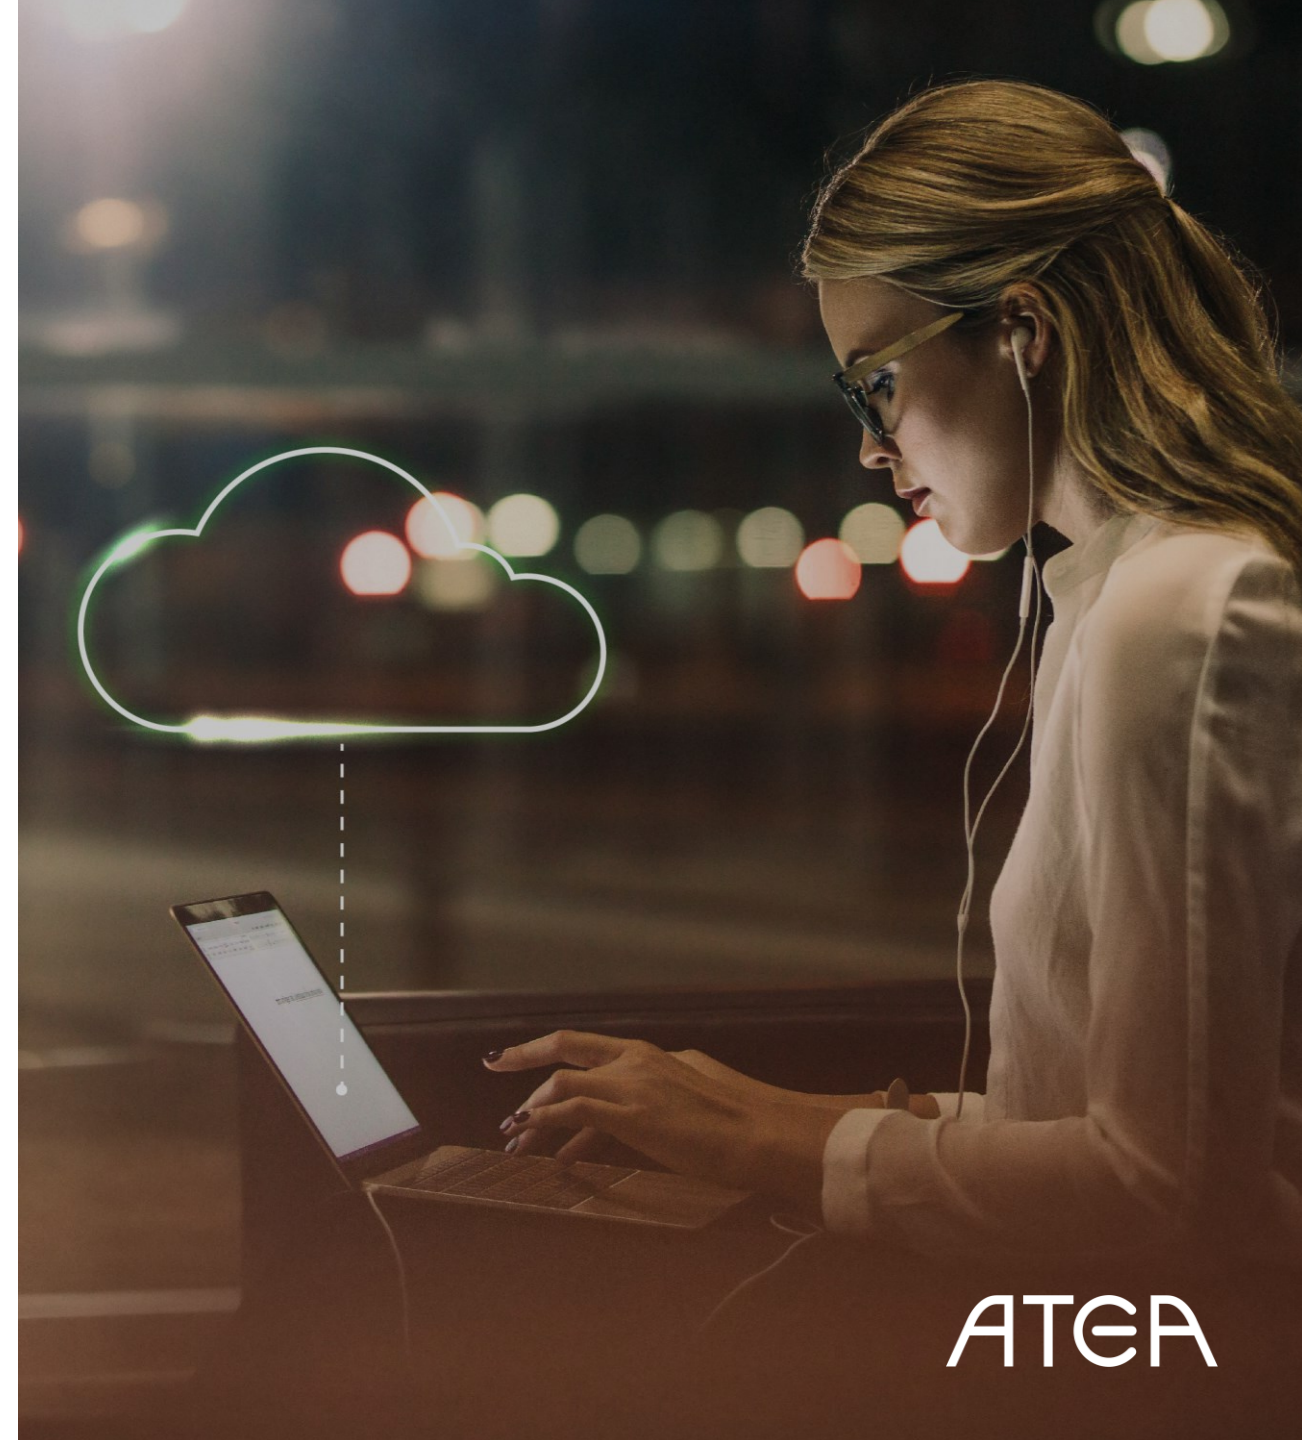

Atea conducts an interview workshop to map out the current state of cloud security posture and your priorities

## Azure environment security analysis

Atea will perform checks based on Microsoft's recommended security practices and help validate that your Azure cloud environment is safe and configured correct way.

## Report from analysis

Analysis report will be prepared and presented with a consolidated overview of the noted security issues and risk assessment findings, including prioritized recommendations and next step mitigation suggestions.

ATEA

A scenic view of a Norwegian town at dusk, featuring colorful wooden houses along a waterfront with a large mountain in the background. The houses are illuminated from within, and their lights reflect on the water. The mountain in the background is dark and silhouetted against the twilight sky.
