

Your smartest employee for assisting customers or collaborators.

Genii is the most advanced GenAI conversational platform for *enterprise-grade* automated support.

What is Genii ?

Genii is a generative AI platform that provides a high-quality Q&A experience based on proprietary knowledge. It can learn from various sources, including documents (PDF, XLS, DOC, PPT, etc.) and web pages. Once uploaded, Genii can answer any question related to the learned knowledge and ask questions to improve its answers when necessary.

Plug n' play

No setup is required. Simply upload unstructured files and knowledge. There is no need to set up Q&A or decision trees.

Reliable by design

Genii is designed to be safe. Our technology prevents any risk of hallucination. Genii will always be reliable.

Secure & Compliant

Microsoft Azure Cloud, with servers in France, ensures that Genii achieves an enterprise-grade level of security and full compliance with GDPR.

How does it work ?

Genii is a generative AI that prioritizes safety. Our team developed this technology based on GPT-4 models, but added proprietary layers to prevent any chance of the models generating hallucinations.

Our continuous research in prompt engineering ensures the best "enterprise-grade" experience with a reliable use of knowledge and risk-free use.

We trust Microsoft Azure cloud, with servers located in France, to ensure the security of personal data and its management in strict compliance with GDPR regulations and best practices.

1/ Upload

Upload any files to the knowledge management interface. All formats are

2/ Optimize

Ask anything to Genii. Want to optimize how it generates answers? Customize your

3/ Deploy

Et voilà! Deploy Genii on your website with just one line of code. Need to chat with your

supported: PDF, XLS, PPT, DOC, etc.

Is everything on your website? Simply provide the URLs and Genii will take care of the rest.

prompt and find an accurate way to provide the right answers based on your goals.

With Genii, there are no boundaries.

customers elsewhere? Rely on our messaging interface with WhatsApp, Messenger, Google Messages, or MS Teams.
