

HTG: HOWELL TECHNOLOGY GROUP

## COLLABORATION AND DATA GOVERNANCE

Today's modern workforce caters for unique groups of people, all with their own collaborative needs.

Email, Instant Messaging, documents, and 3rd party applications are all in use throughout most organisations.

IT must strike the correct balance between the security and usability of corporate collaborative tools. If too restrictive, users will adopt shadow IT to accomplish their needs.

With HTG's Collaboration & Data Governance pack, HTG can help companies achieve the right balance of user freedom while ensuring compliance with corporate policies.
