

Streamline Your Data Estate

Reshape your data infrastructure for enterprise analytics in days, not weeks, with Collectiv's NetSuite Data Lake Accelerator. Optimize NetSuite data, extract in-depth insights, and improve data visualization for your business with expert data analytics consultants.

Power Up Your Business Analytics with the Azure Ecosystem

Collectiv's NetSuite Analytics and Data Lake Accelerator is **implemented six times faster than others on the market with 50% less break-fix issues**. Presenting new opportunities for strategic decision-making and operation agility, the Accelerator solution modifies raw data into a navigable map toward business growth and efficiency.

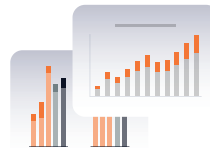

The need for rapid integration with minimal interruptions to your business is crucial. You can trust the Collectiv team to design and deliver valuable insights, all within a week:

Data Tables

Seamless
Initial Setup and
Installation

A tailored environment to fully access the insights of your NetSuite data requires just a few hours of your involvement for Collectiv's data experts to diligently deliver:

Discovery Session
Initial consultation to understand your requirements and confirmation of our access to your systems.

Seamless Installation
Swift solution deployment, integrating essential NetSuite tables relevant to your business case.

User Empowerment
Comprehensive training and documentation handover, ensuring your team's success in the long run.

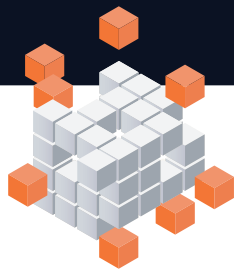

Ongoing Support
Choose from our tiered support packages to maintain and evolve your solution, tailored to your needs.

Strategic Advantages of Collectiv's NetSuite Data Accelerator

Designed for seamless Azure integration, this innovative offering democratizes your access to NetSuite's datasets and empowers you with a solution fully scalable to an enterprise-level data lake.

- ✓ **Rapid Azure Integration**
Deploy our solution within a week, minimizing disruption and accelerating value realization.
- ✓ **Customizable Data Access**
Direct integration with a range of NetSuite tables, ready for immediate use and tailored to your business needs.
- ✓ **Advanced Azure Architecture**
Leverage Azure Data Lake, Synapse, and ADLS Gen 2 for a scalable and cost-efficient solution.
- ✓ **Empowered Analysis**
Set the stage for powerful Power BI reporting with the essential data intermediary.
