

Azure VMWare Solution Migration

How do you unlock the benefits of the cloud for your VMWare-hosted workloads?

Today's organizations require more scalability, faster provisioning, flexible consumption models, and wider geographic reach. Utilize existing VMWare investments and skills and enhance VMWare workloads with the latest cloud services for AI and analytics by running your workloads on Azure with KiZAN and Azure VMWare Solution.

Key Benefits

1. Accelerate cloud adoption by leveraging existing VMWare investments, skills, and tooling
2. Minimize business disruptions when migrating VMWare resources into Azure
3. Rapid provisioning for workloads across Azure's global-scale datacenters
4. Lower TCO compared to on-premises datacenters
5. A white-glove experience migrating to Azure with KiZAN, a 30+ year dedicated Microsoft partner

Use Cases

Cloud migration: Rapidly respond to datacenter exit needs. Improve uptime of core business functions. Adhere to corporate mandates for cloud adoption initiatives.

Datacenter expansion: Provide on-demand capacity. Rapidly provision/deprovision workloads to respond to ever-changing business needs.

Disaster recovery: Add a mirror site for critical datacenter assets to experience best-in-class RPO/RTO responses to failure events.

When considering Azure VMWare Solution, partnering with KiZAN Technologies ensures you receive:

- ✓ **Proven Expertise:** Our deep knowledge of Microsoft technologies and user adoption guarantees the best results for your organization with cutting-edge technologies.
- ✓ **Innovation:** We stay ahead of industry trends to provide cutting-edge solutions, with the ability to extend your Copilot into custom sources to meet your specific business needs.
- ✓ **End-to-End Solutions:** We offer comprehensive services tailored to your needs from assessment and planning to technical deployment and overarching security and compliance.
