

# BLUE OCEAN

## SMART CLOUD INSIGHTS

Blue Ocean is a cloud SaaS solution designed to **simplify cloud platform management** by providing impactful insights. The Smart Cloud Insights visualization platform presents actionable insights on all your cloud resources through graphs, measures, and action recommendations, allowing you to quickly identify areas for **optimization in security, performance, and costs**. With a wide range of well-known components, Cloud Insights makes it easy to monitor the health of your cloud environment.

FROM ZERO VISIBILITY TO INSIGHTS IN 30 MINUTES

Blue Ocean is the result of a journey that began with **classic professional services**, focusing on delivering cloud services through human expertise. As technology advanced, we incorporated **standardized programs supported by tooling**, allowing for semi-automated cloud services powered by automation and visualization tooling. Eventually, we're reaching the next phase of innovation by following **AI-generated cloud recommendations**, resulting in fully automated and optimized cloud environments. Blue Ocean represents the culmination of this journey, providing a cutting-edge solution for cloud platform insights.
