Remote Monitoring and Management

Classroom Management for iOS

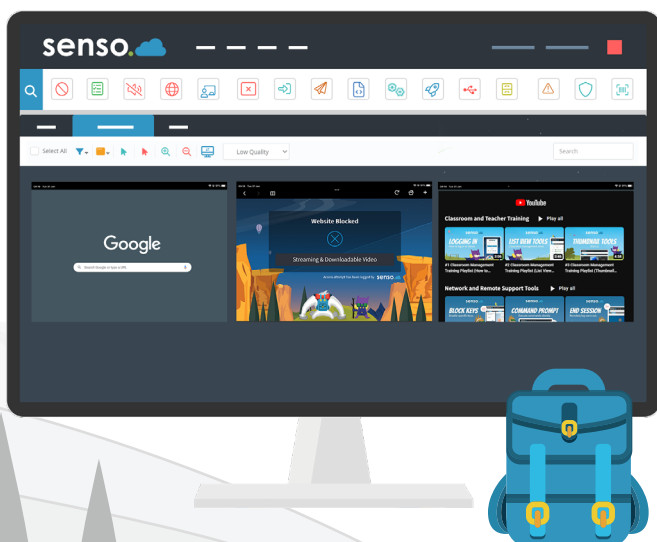

Developed specifically for iPads, our iOS app can be installed across multiple devices within your school to ensure students are kept on task and safe during lessons. Our browser has web filtering built in for peace of mind that your class only has access to relevant and appropriate material.

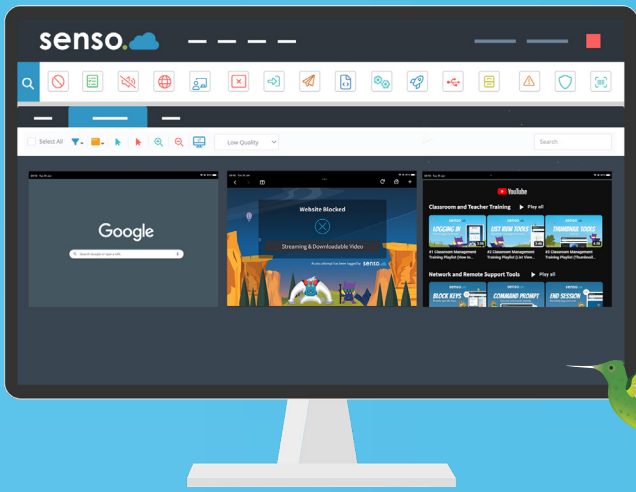

CLASSROOM MANAGEMENT & MONITORING

Our app allows you to view what students are browsing on multiple iPads simultaneously within the classroom, putting the control back into the teachers hands.

- ✓ **Monitor Student Behaviour**
Keep students engaged and on task during their lessons even when they are learning from home.
- ✓ **Teach from Anywhere**
You are never tied down to a single location, with our iOS app you can teach from anywhere.
- ✓ **Block Harmful Content**
Web filtering appropriately filters and blocks students from unwanted or inappropriate online content.
- ✓ **Enhancing Student Safety**
Keyword libraries developed in partnership with expert organisations.

Live Thumbnail View

Live Thumbnail View

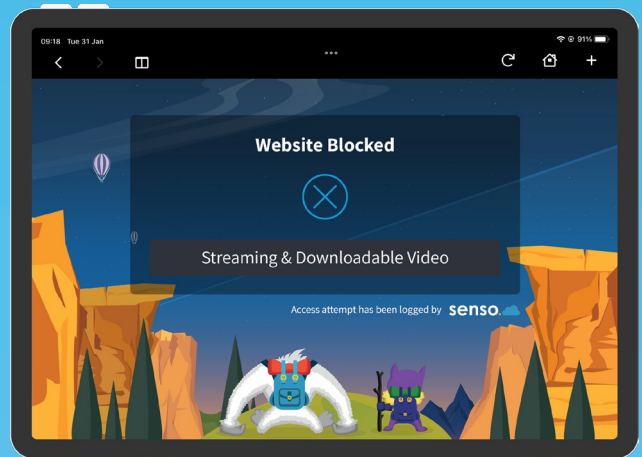

Monitoring made easy. View a single iPad or multiple iPads from your device simultaneously to ensure students are keeping on task in the classroom.

Keyword Logs

View the screenshots of keywords entered by a student on our dedicated browser. Includes comprehensive keyword libraries developed in partnership with expert organisations, or add your own keywords personal to your school or local area.

Content Filtering

A cloud-based, category-based web content filter that appropriately filters and blocks students from harmful or inappropriate content. A.I combined with human verification categorises web content into topic-based, objectionable, and malicious categories.

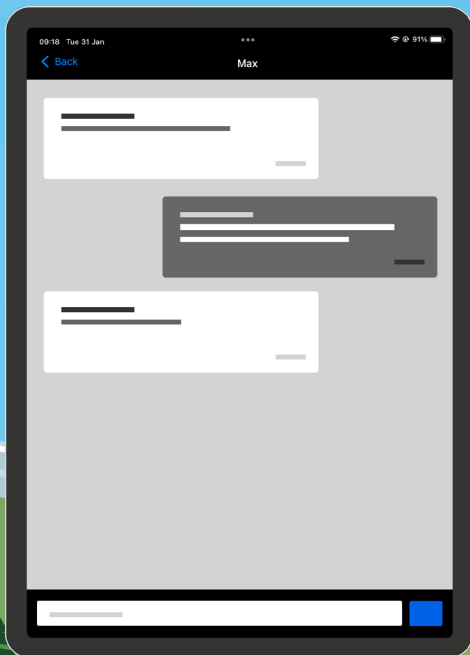

Content Filtering

Web History Logs

By providing a full browsing history you can understand online activity in a wider context. Pinpoint users who may be vulnerable or at risk, users who may pose a risk to others and inappropriate, off-task or harmful behaviour.

Live Chat

Live Chat

Engage a two way chat between a console and client user to offer help or advice during the lesson.

End Session

Logout any user session from the Senso portal or choose the duration before a device is logged off. Give users the option of cancelling the end of session. Displays an in-app pop-up showing a custom message and time remaining before the session ends.
