...that drives global economies, and when logistics fail, waste creeps in. This is especially true in sectors like medicine and food, where inefficiencies make for unusable shipments.

Research conducted by the IQVIA Institute of Human Data Science estimates that the pharmaceutical industry loses \$35 billion annually due to improper cold chain logistics management. The industry likewise relies on shipment analytics and extensive data monitoring to

How QR Codes Could Revolutionize Seafood Supply Chain Traceability & Build Brand Integrity

Judy Moon

As QR codes have picked up momentum in the hospitality industry thanks to the pandemic, many retail sectors, most notably beauty and apparel, have found ways to incorporate this technology into their brand strategy and capitalize on its ease of use and depth of data, offering consumers unique digital experiences both in-store and post-purchase.

Indore: Following shortage of chip-based cards, Indore's regional department authorities are now going to start issuing QR-code based certificates. Officials said that the move is a part of the steps to make transport related services simpler and completely hustle-free.

The department is preparing to start issuing QR code-based certificates (RCs) for new vehicles sold after the launch of the

AVANTE- Warranty Management Platform

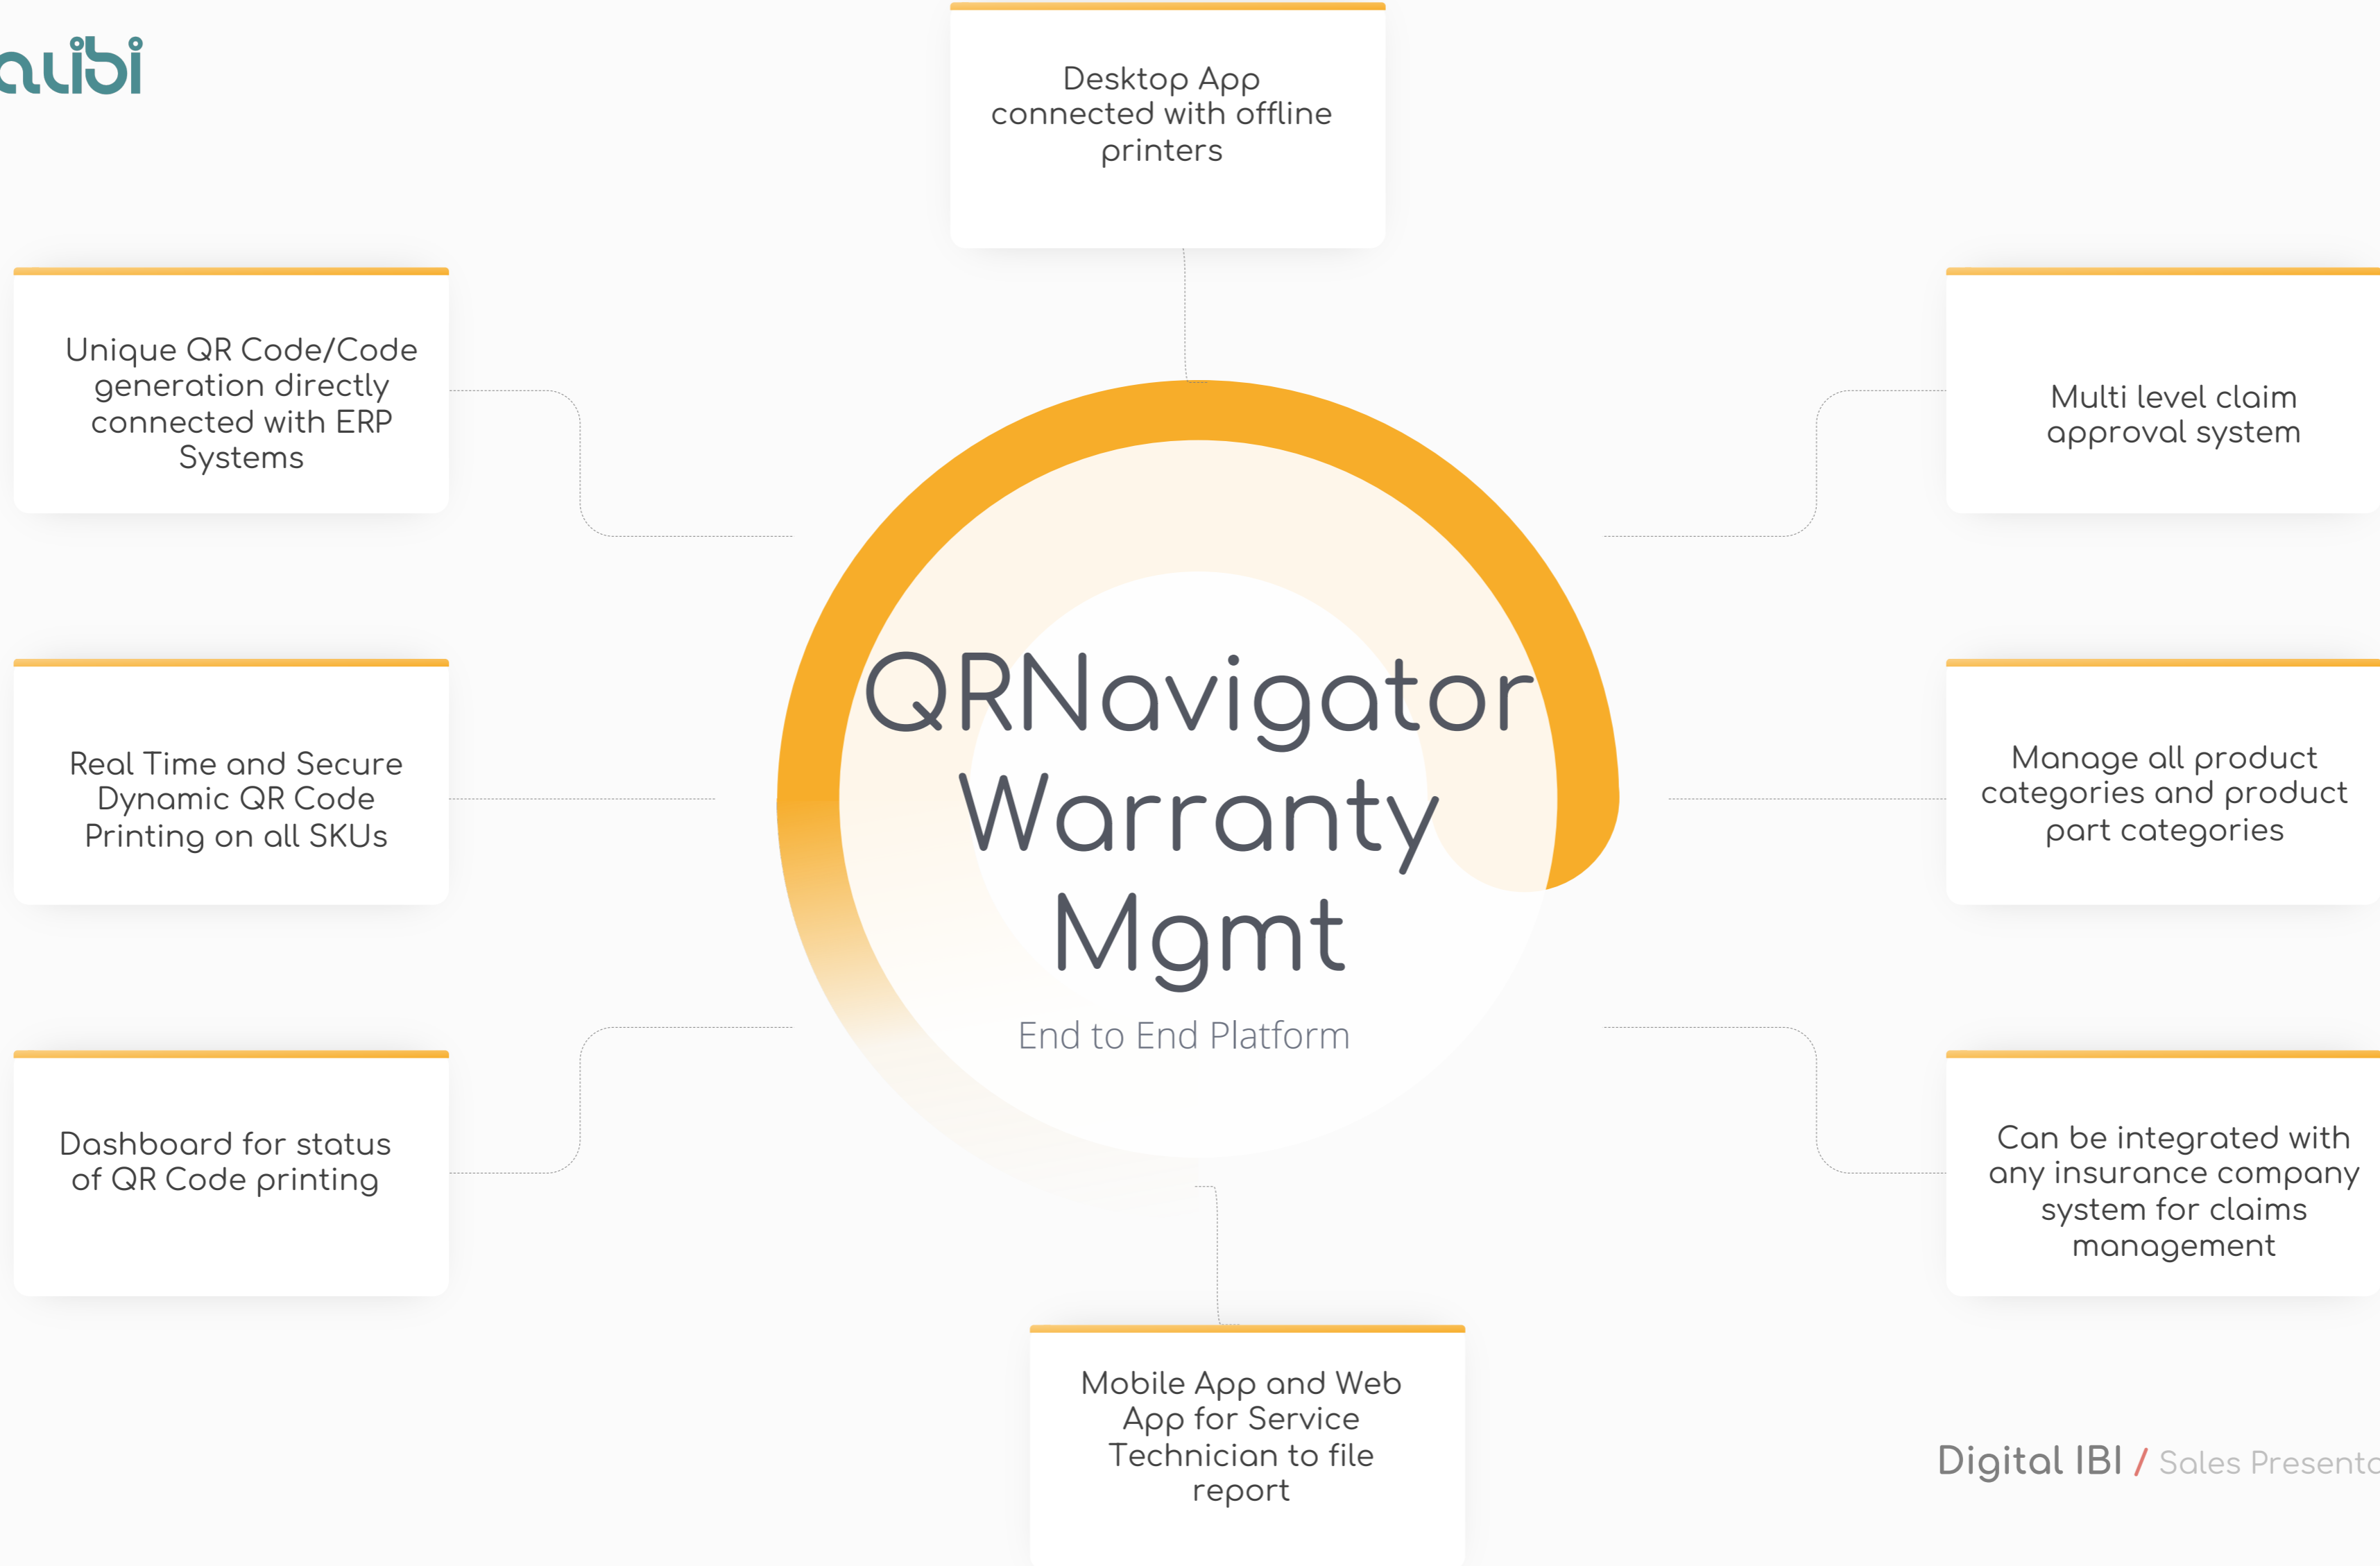

India's first end-to-end warranty management platform for OEMs connected with printers at one end to warranty system of insurance companies at the other end

Single API + Web App

- Dynamic QR Code based warranty management system for traceability and digital warranty management
- Fully cloud native platform with unique Short URLs for easy tracking
- Customer's Warranty Validation and certificate issuance
- API based easy Integration with any ERP system
- Easy Integration with Insurance System for warranty issuance and management for better customer experience

Business Flow

Scalable across the Globe with high level data security
High Level data security with fully cloud native functions with data separation

Integratable with any ERP system
Easily Integrate with any ERP/backend with easy-to-use REST APIs

Traceability Journey

QRNavigator Warranty Management

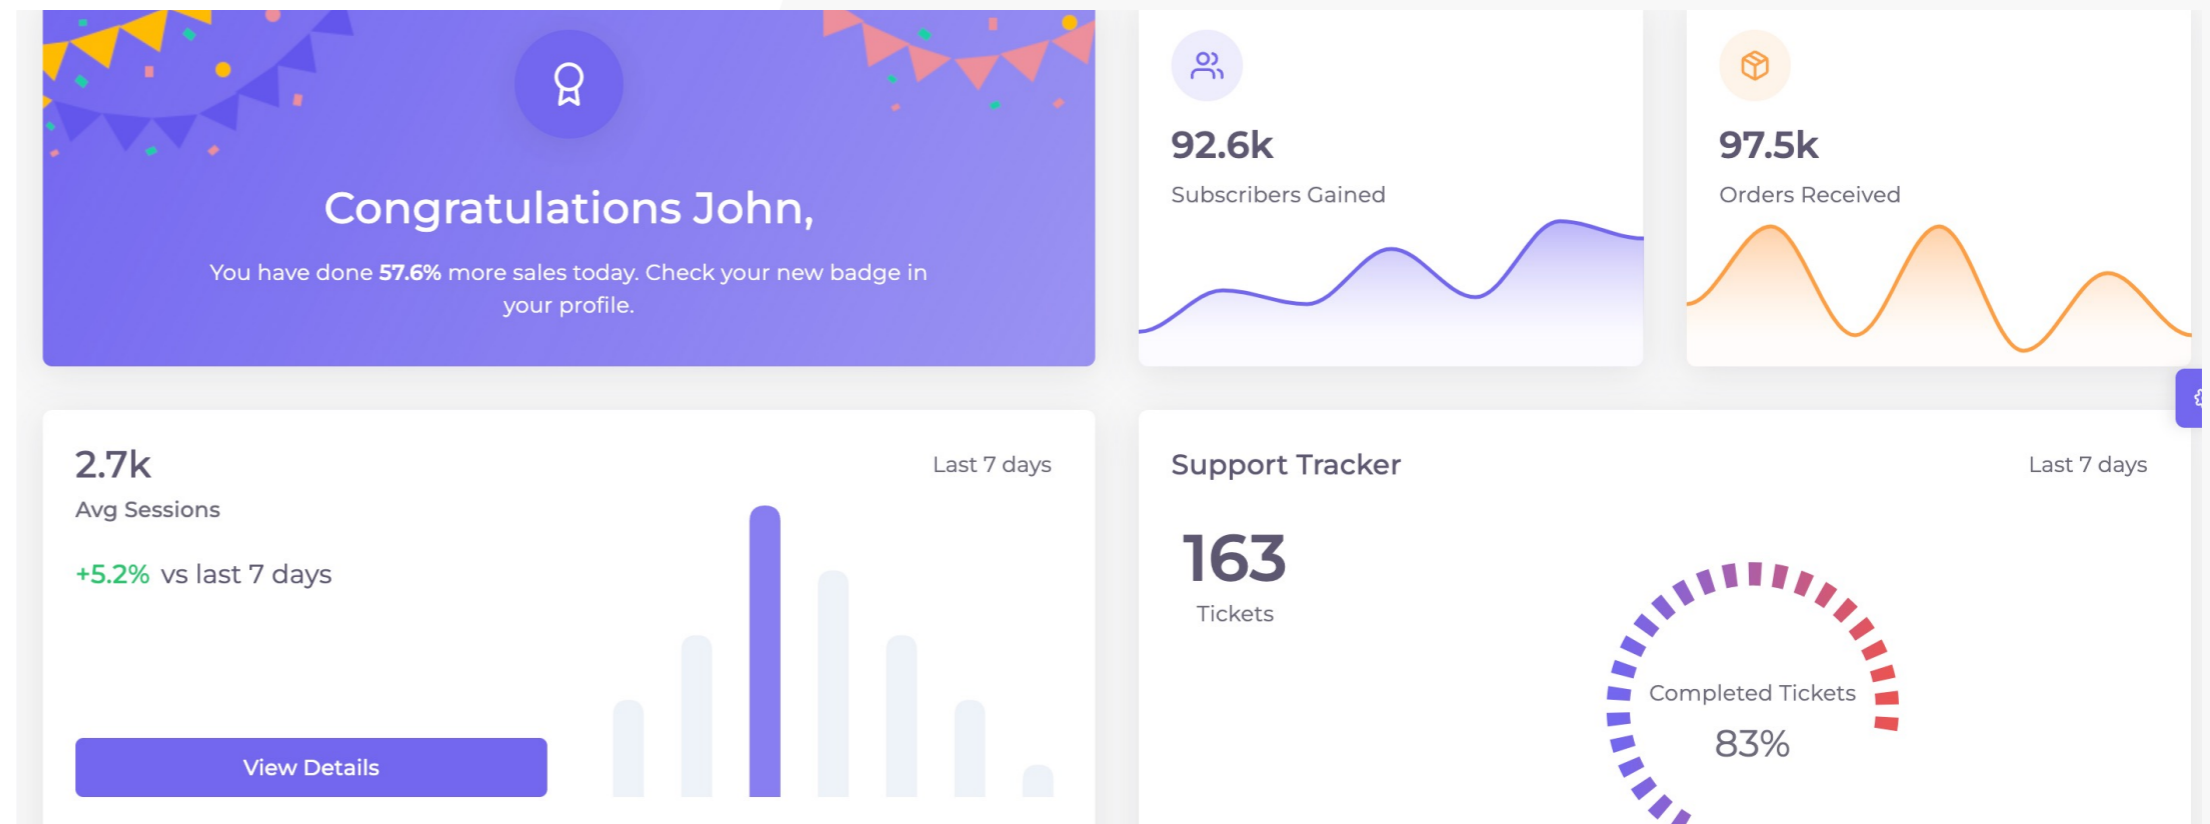

Benefits

The system brings in a lot of benefits to OEMs and brands in the tracking of products and getting quality and low-cost insurance on the products

QRNavigator Warranty Management System is very scalable and able to handle all our requirements both in India and Globally.
Bhupender Gupta IT Head - Panasonic

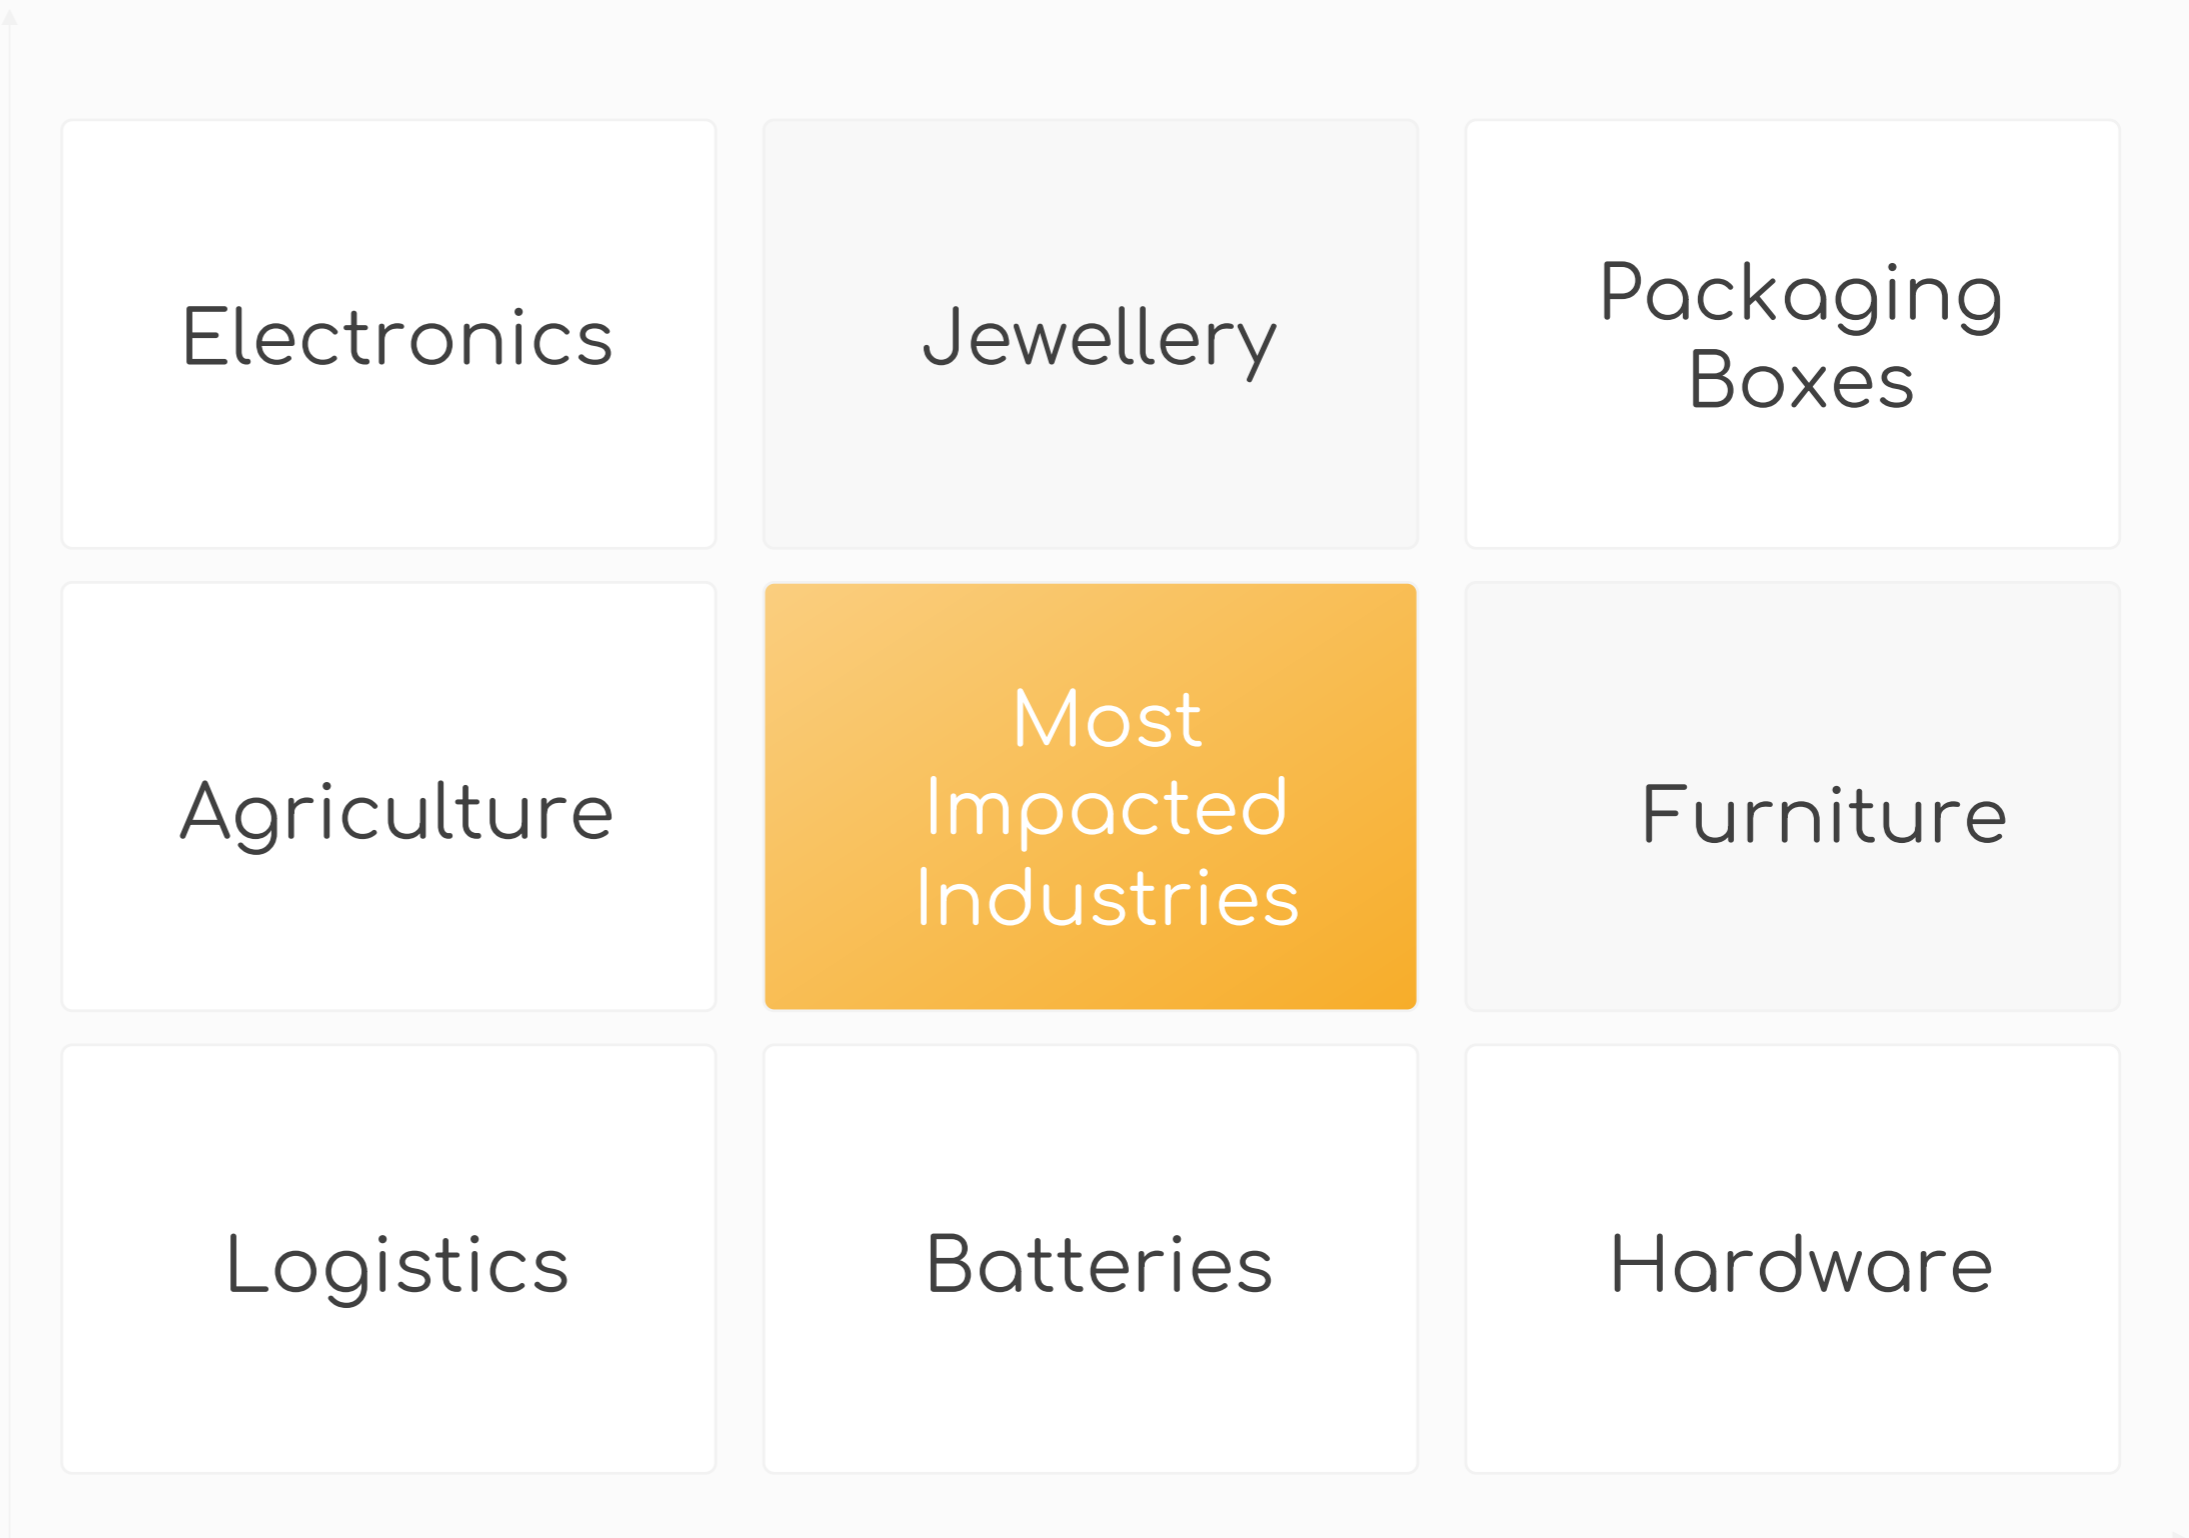

- ✓ Add at least 5% to the bottom line
- ✓ Total control on data movement from the printer to final consumption of product
- ✓ Hard to replicate dynamic QR codes helps in stopping fake products
- ✓ Can be implemented with both online-offline printing system
- ✓ Change trackable data after printing of QR Codes!
- ✓ Easily integratable with any system

Use Cases

QR Code enabled real time tracking and claims management →

Various Industries can benefit with end-to-end integrated tracking and warranty management for better customer experience

Warranty Management Case Study

Problem Statement

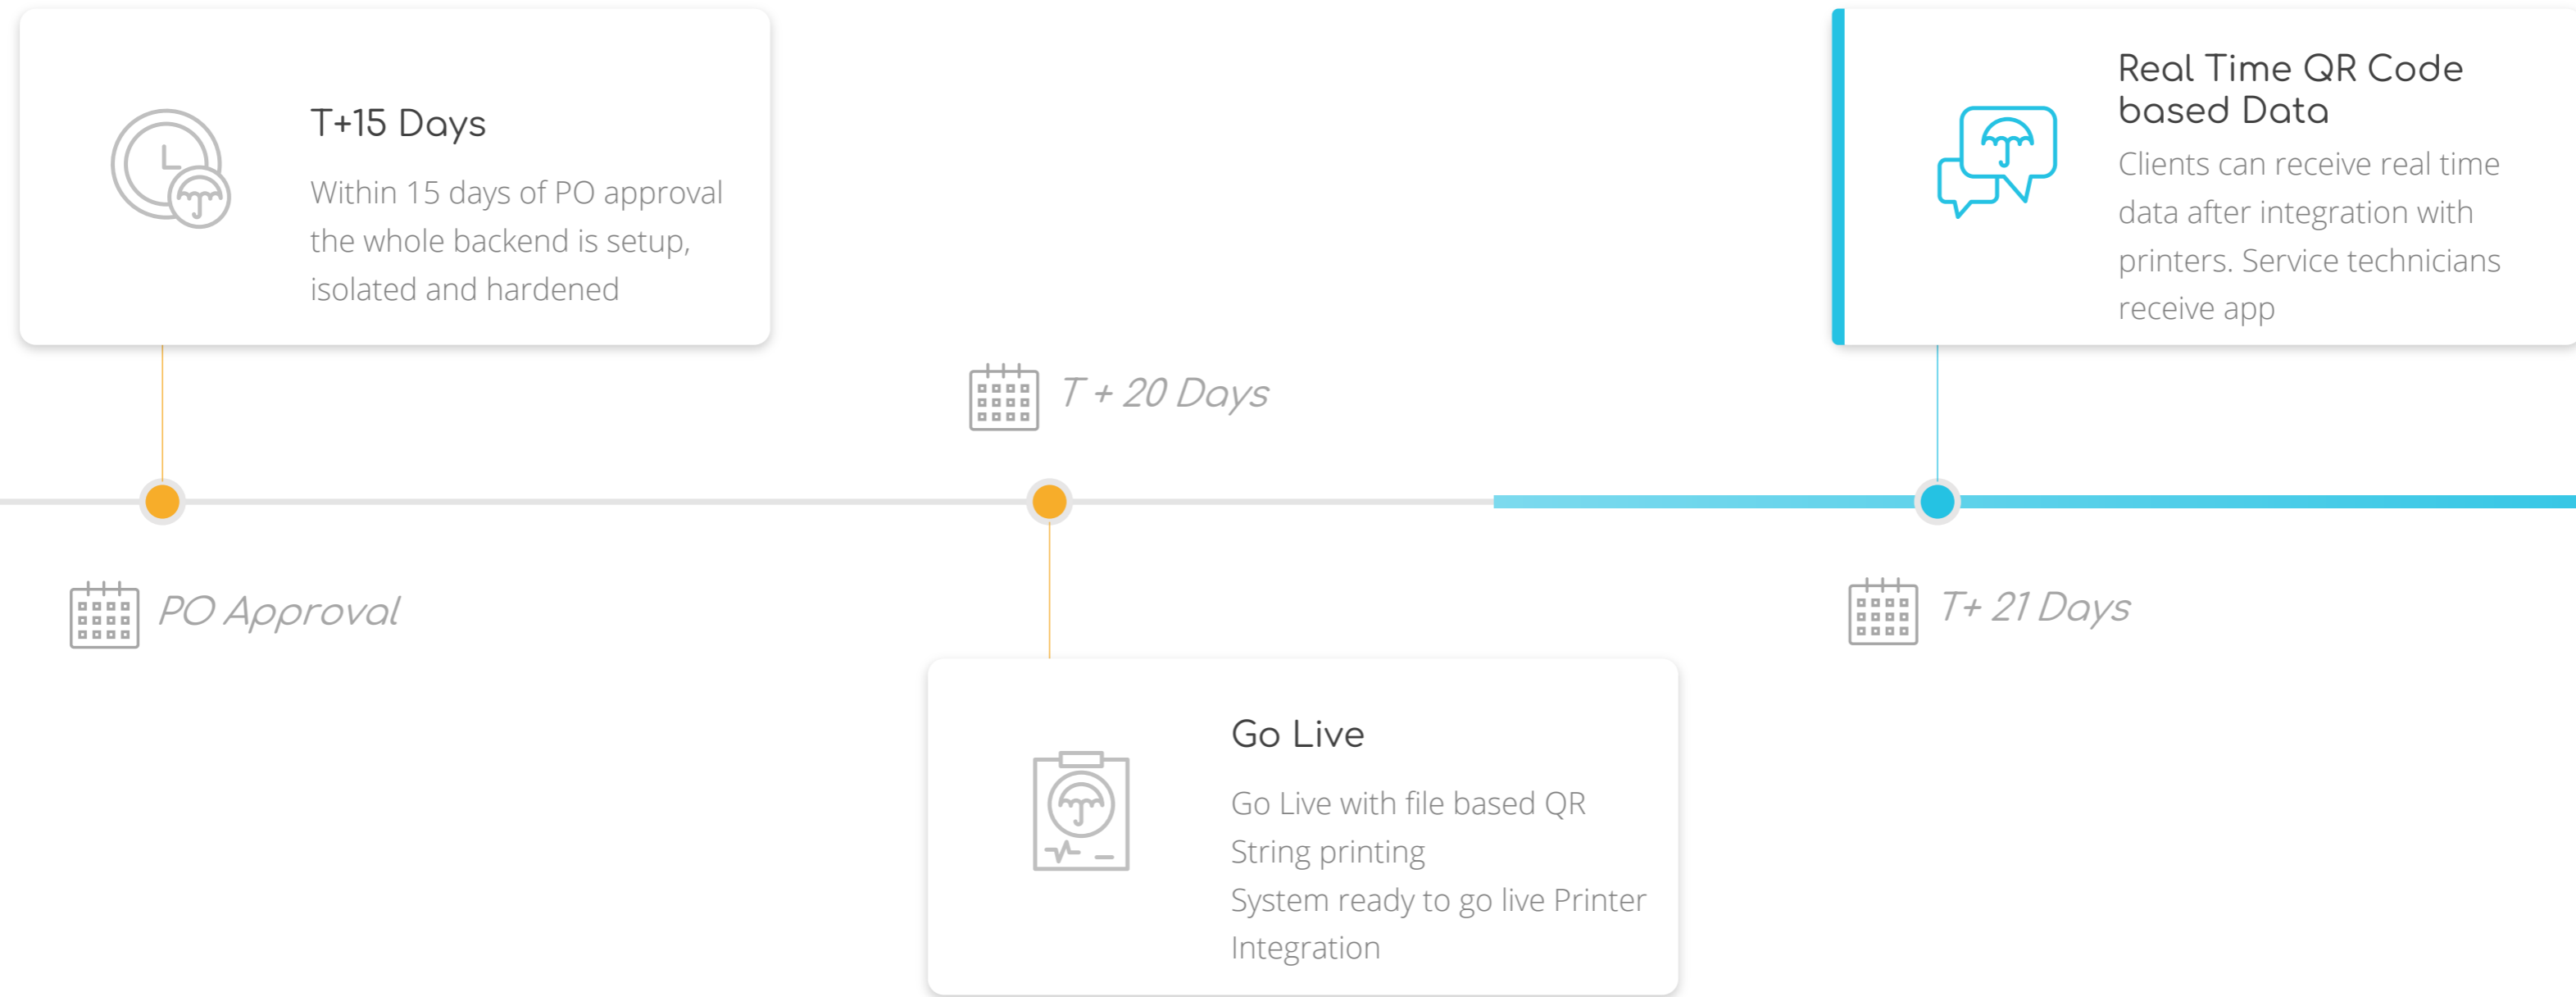

LOSS OF MILLIONS OF RUPEES EVERY MONTH IN ONE OF THEIR BU. BU STARTED BECOMING DRAG AND PULLED DOWN BOTTOMLINE BY 1.5%

Impact of Solution

Within 2 months of launch, the BU became black and customer XP increased dramatically. Customer started trusting the brand with quality products.
