# OSMOS

Solving the first mile of data ingestion

Osmos empowers implementation and operations teams to independently accelerate data ingestion processes while improving data quality. With AI-powered data transformations, Osmos makes data ingestion easy, fast, and error-free, so your frontline teams can rapidly activate customers and partners by automating the cleanup of messy data. We are committed to creating a world where anyone can work with data regardless of technical proficiency.
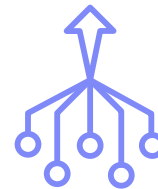

Osmos is backed by world class investors like Lightspeed, CRV, Pear and SVAngel, and helps democratize data ingestion for companies like Netflix, Rakuten, and Taxbit.

Improve incoming data quality

Solve data complexities

Scale data ingestion

9 months
of roadmap saved

70%
faster customer data ingestion

3x
increased dev productivity
