

# verbum™

## for Microsoft Teams

AI translation for Multilingual Meetings.

Empower participants to communicate in their preferred language while effortlessly reading captions in real-time. Our app seamlessly integrates with enterprise Microsoft Teams users transforming the way teams communicate.

## Why use Verbum in your MS Teams meetings?

### Independent Language Settings

Verbum for MS Teams allows participants to choose their spoken, written, and caption language preferences independently without affecting others in the meeting.

### Multilingual Chat Translation

Why settle for monolingual conversations when Verbum for MS Teams brings a world of multilingual possibilities right to your fingertips.

The chat translates up to three languages at once enabling seamless communication between participants speaking different languages.

### Captions In 140+ Languages

Whether you're collaborating with international clients, conducting global team meetings, or simply chatting with colleagues from diverse backgrounds, Verbum for MS Teams eliminates language barriers by providing automated translation captions, ensuring effective communication for all.
