WVD Assessment Solution

Digital freedom for your organisation

Windows Virtual Desktop centralizes applications and makes desktop virtualization possible. It is an innovative response to a world in change.

Nevertheless, major decisions such as changing the IT infrastructure are not made lightly. That is why we give organizations the opportunity to test drive Windows Virtual Desktop.

For a month, your IT department will experience the possibilities of centralized application management, your employees the new way of mobile working.

*Test Windows Virtual Desktop during one month for € 5.000 ***

* Valid for the standard set-up. We are happy to discuss alternatives.
* Excluding Microsoft Azure consumption
Our Approach

Readiness Assessment

Proof of Concept

Follow-up & advice

Evaluation
