

ADVANCING ANALYTICS

MICROSOFT FABRIC LAKEHOUSE PROOF OF CONCEPT

Explore the potential of Microsoft's unified Data Platform

Microsoft's unified Software-as-a-Service Data Platform brings together everything from data movement to Data Science, Real-Time Analytics, and Business Intelligence, all built upon the Data Lakehouse Architecture. With our extensive experience designing and implementing Data Lakehouses we can help you assess the suitability of Fabric for your business and prove its value as a unified solution to perform all of your organisation's analytical workloads.

MEET ADVANCING ANALYTICS

At Advancing Analytics, we specialise in Data Engineering and Artificial Intelligence, and we take pride in helping a broad range of companies around the world gain a deeper understanding of their data. We're a Microsoft Solutions Partner in Data & AI and Azure, with Specialisations in Analytics and AI & Machine Learning, alongside 5 Microsoft MVP Awards. We're also recognised as an Award-winning Databricks Select Partner.

PROOF OF CONCEPT

Discover: A set of discovery workshops help us get an understanding of your business and its relationship with data.

Plan: We map out your organisational structure to Fabric's Data Mesh, focusing on a dataset serving a specific department.

Deploy: The plan is put into action with data connections set up, artefacts deployed, and data ingested.

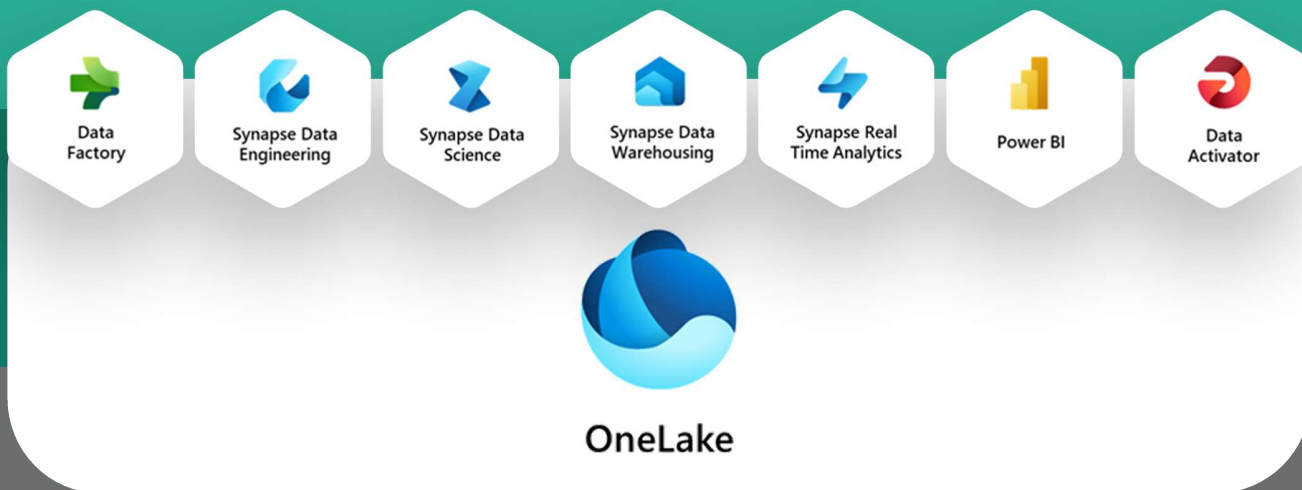

Review: How does the platform perform? Does it meet the core value areas for your business?

Vision: What's next for your business and Fabric? How do you build a successful Data Lakehouse Platform?

Our Proof of Concept implementation is a fixed 4-week engagement designed to prove and maximise the potential of Microsoft Fabric.

WHAT VALUE YOU CAN EXPECT FROM THE POC

Demonstrate minimised time to deploy - there's no infrastructure to plan, build, and configure.

Establish a structure in Fabric that reflects your business.

Onboard a cloud data source to explore capabilities.

Demonstrate analytical performance using Fabric's Direct Lake to Power BI.

WHO IS IT FOR?

Businesses exploring the next evolution of their Data Warehouse or with an existing Power BI Premium subscription looking to explore the possibilities of Microsoft Fabric. This Proof of Concept implementation provides an understanding of what Fabric is and how it fits into your business and helps establish best practices on building a data platform.

“ DON'T JUST TAKE OUR WORD FOR IT - HEAR WHAT OUR SATISFIED CLIENTS HAVE TO SAY!

"Advancing Analytics guided us through Fabric with their experience from the private preview. They helped get us up and running with the right foundational structure and enabled us to prove out the value of Fabric to the business."

GET IN TOUCH:

Ready to dive into Fabric and get the most out of Microsoft's new data platform offering? Contact us today to learn more and get started. Let us help you demonstrate the maximum value from a Proof of Concept that will generate the most value for your organisation.
