Market Impact

# Customer data strategy: why modernize now

### GEN & OPERATIONAL AI

- Rapid upskilling
- Productivity acceleration
- Competitive latency is unacceptable

### ACTIONABILITY

- Insight to activation to design cycle
- Data foundation key to CX
- Decision & engagement cycles shrinking

### PRIVACY & GOVERNANCE

- Customer lifecycle consent management
- Common data foundation
- Rapidly changing requirements & regulations

### 1st PARTY DATA

- Sequenced order of events in real-time
- 1PD strategy requires purpose-built modernization
- 3PC deprecation is imminent

### IDENTITY

- Adaptable & retroactive identity stitching
- Real-time customer profiles
- Traits & behaviors bend the value curve

### CONVERGENCE

- Unified & holistic customer journey context
- Inbound & outbound convergence
- Tech-debt shelf-life expiring

# Personalized insights & engagement, powered by Adobe Experience Platform

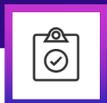

## Adobe Experience Platform

Real-Time Customer Profile

AI & Machine Learning

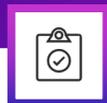

Open Ecosystem

Cloud Extensibility

### An Experience Layer

Augment your cloud infrastructure investment with a real-time experience layer

### Decreased Time to Value

Build a CXM foundation once and apply it across all current and future applications

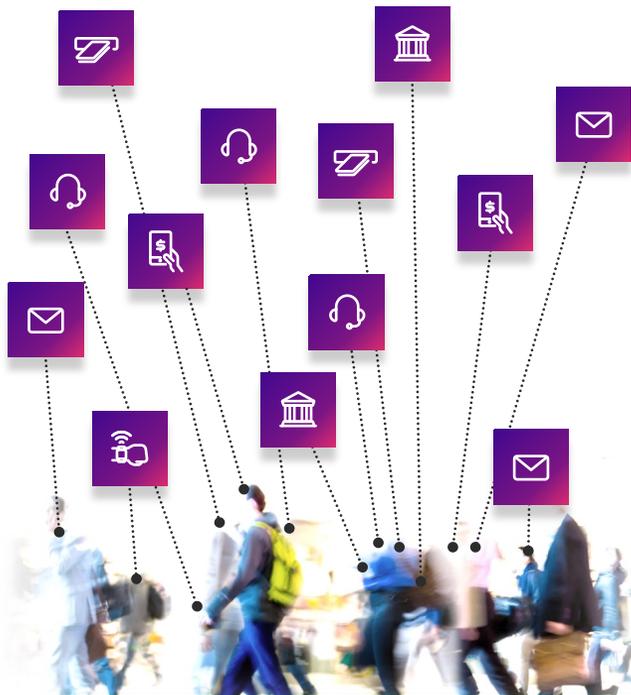

### Limitless Evolution

Continue to seamlessly evolve your CXM for whatever the future may hold

# Omnichannel insights and analysis powered by Adobe Customer Journey Analytics

Enable real-time customer decision making and understand the impact of each customer touchpoint throughout journey.

Connect, standardize & analyze data from online or offline sources

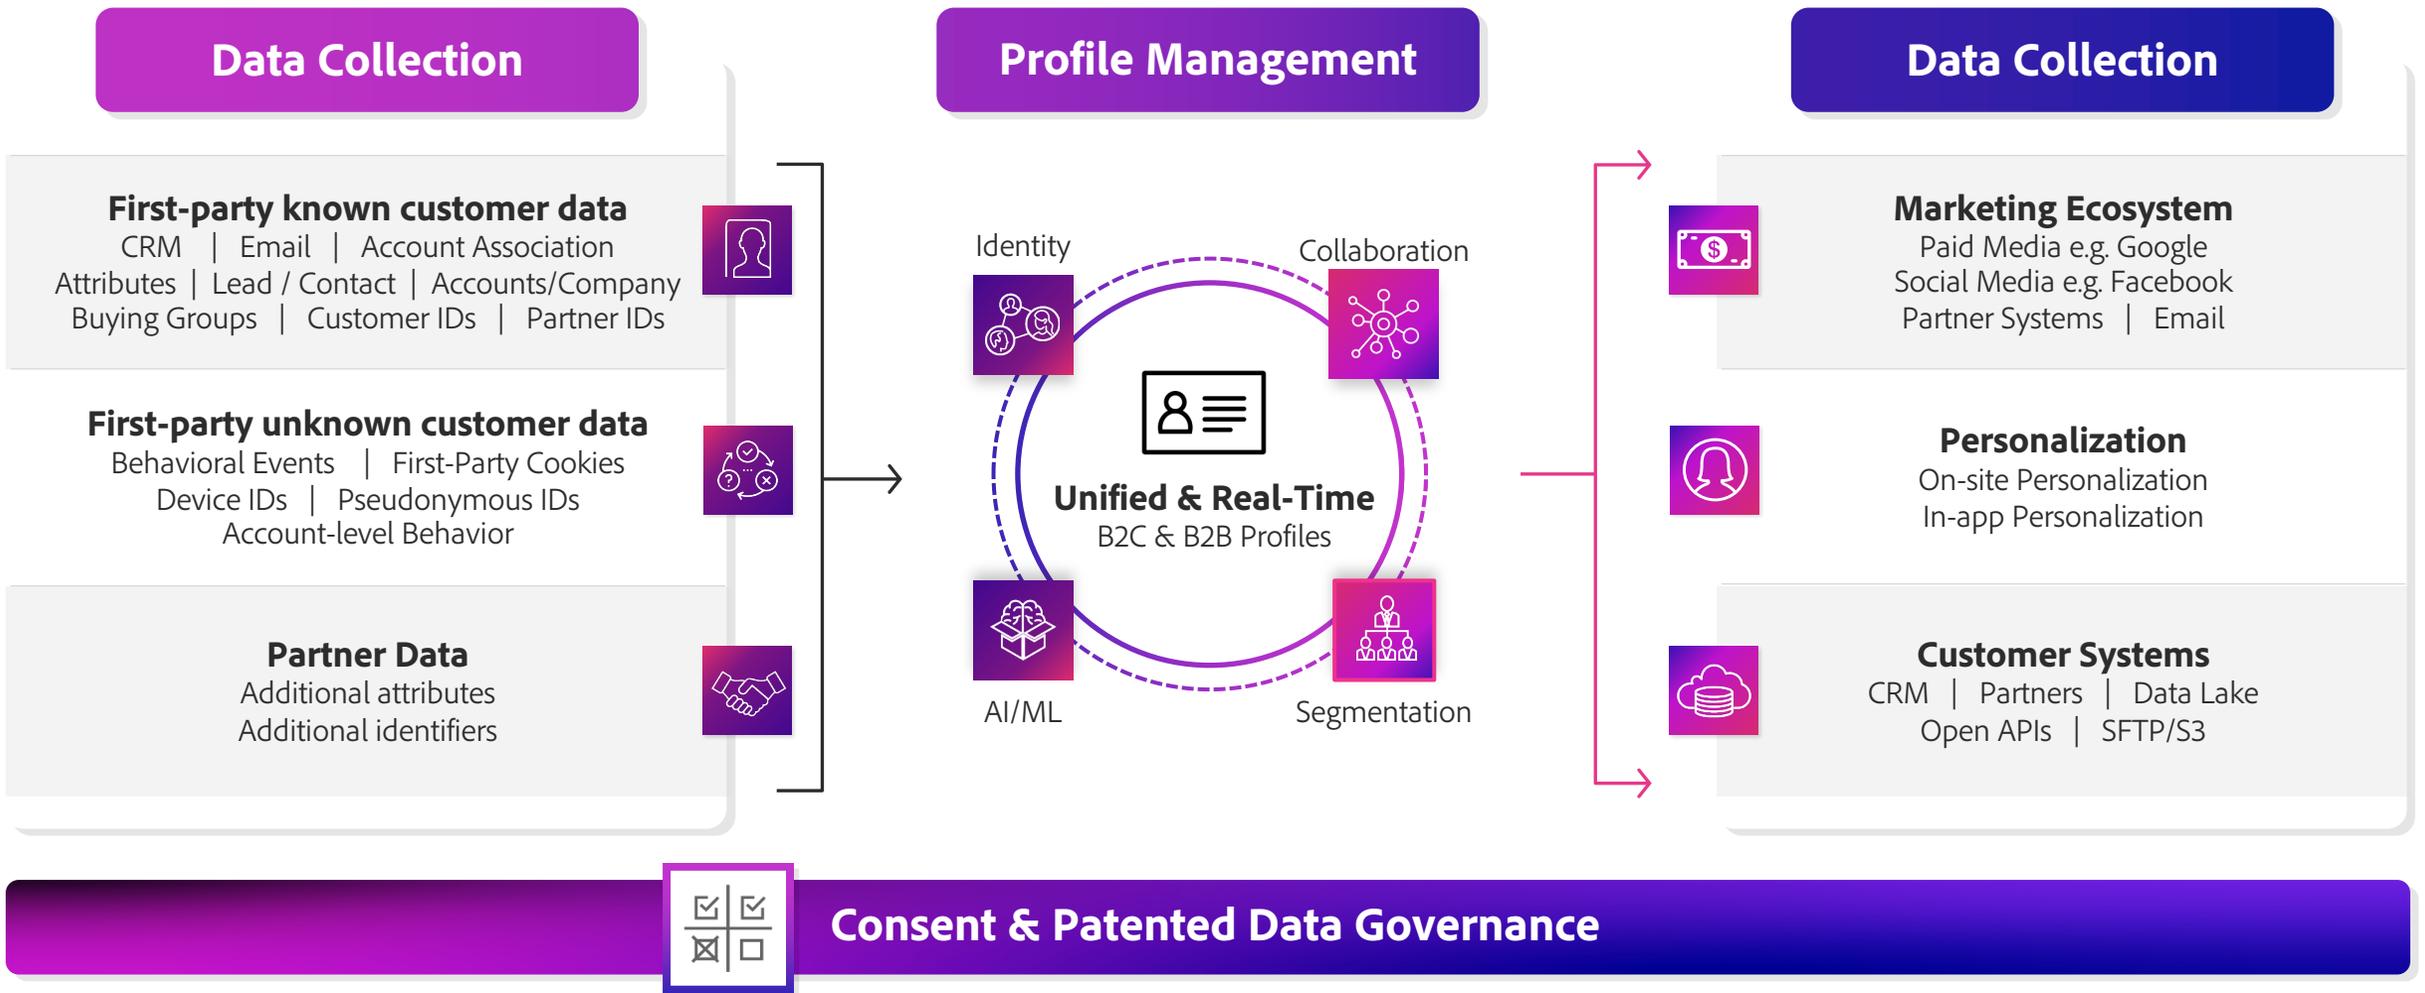

Tie interaction events to segment or individual level

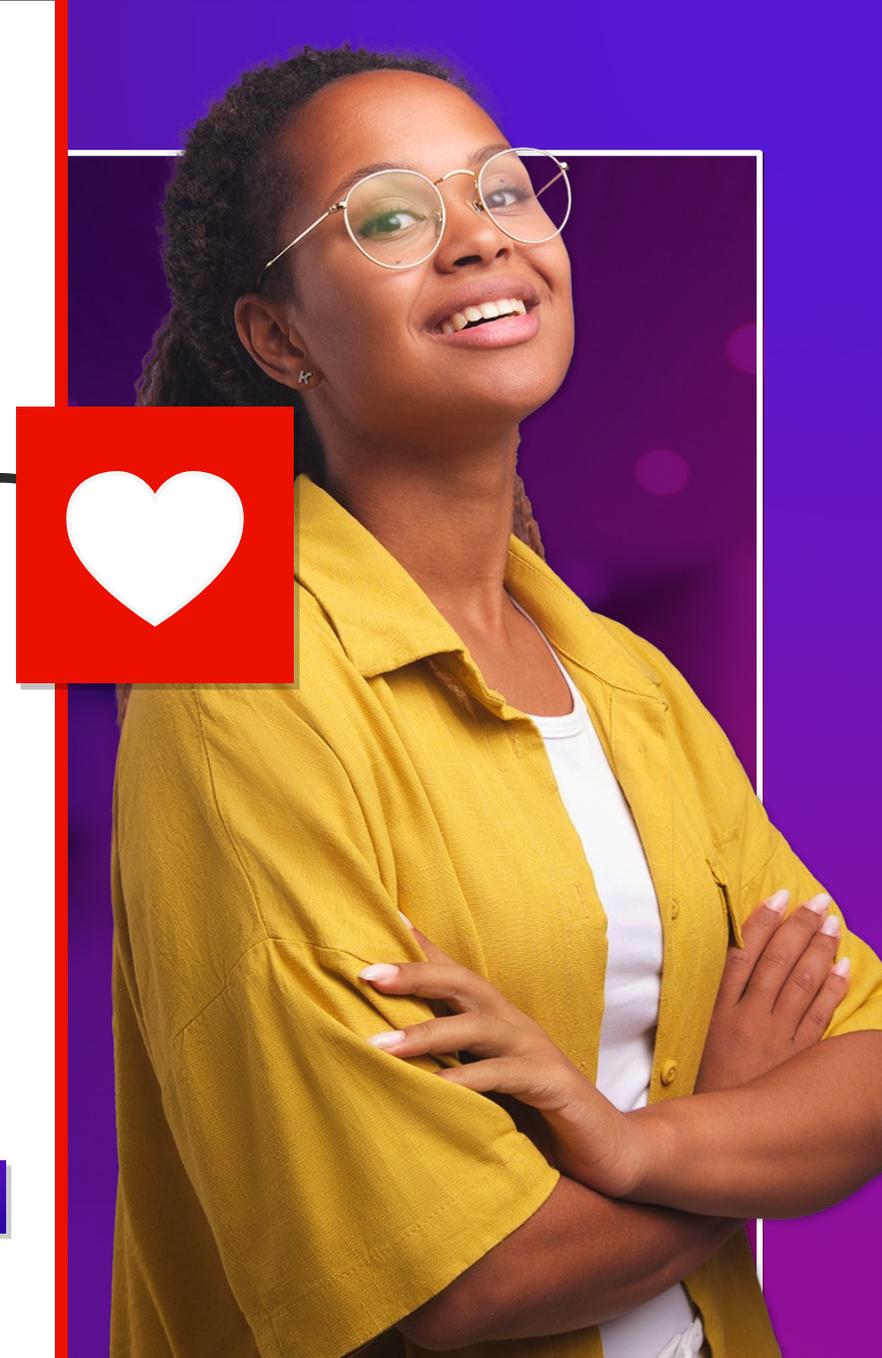

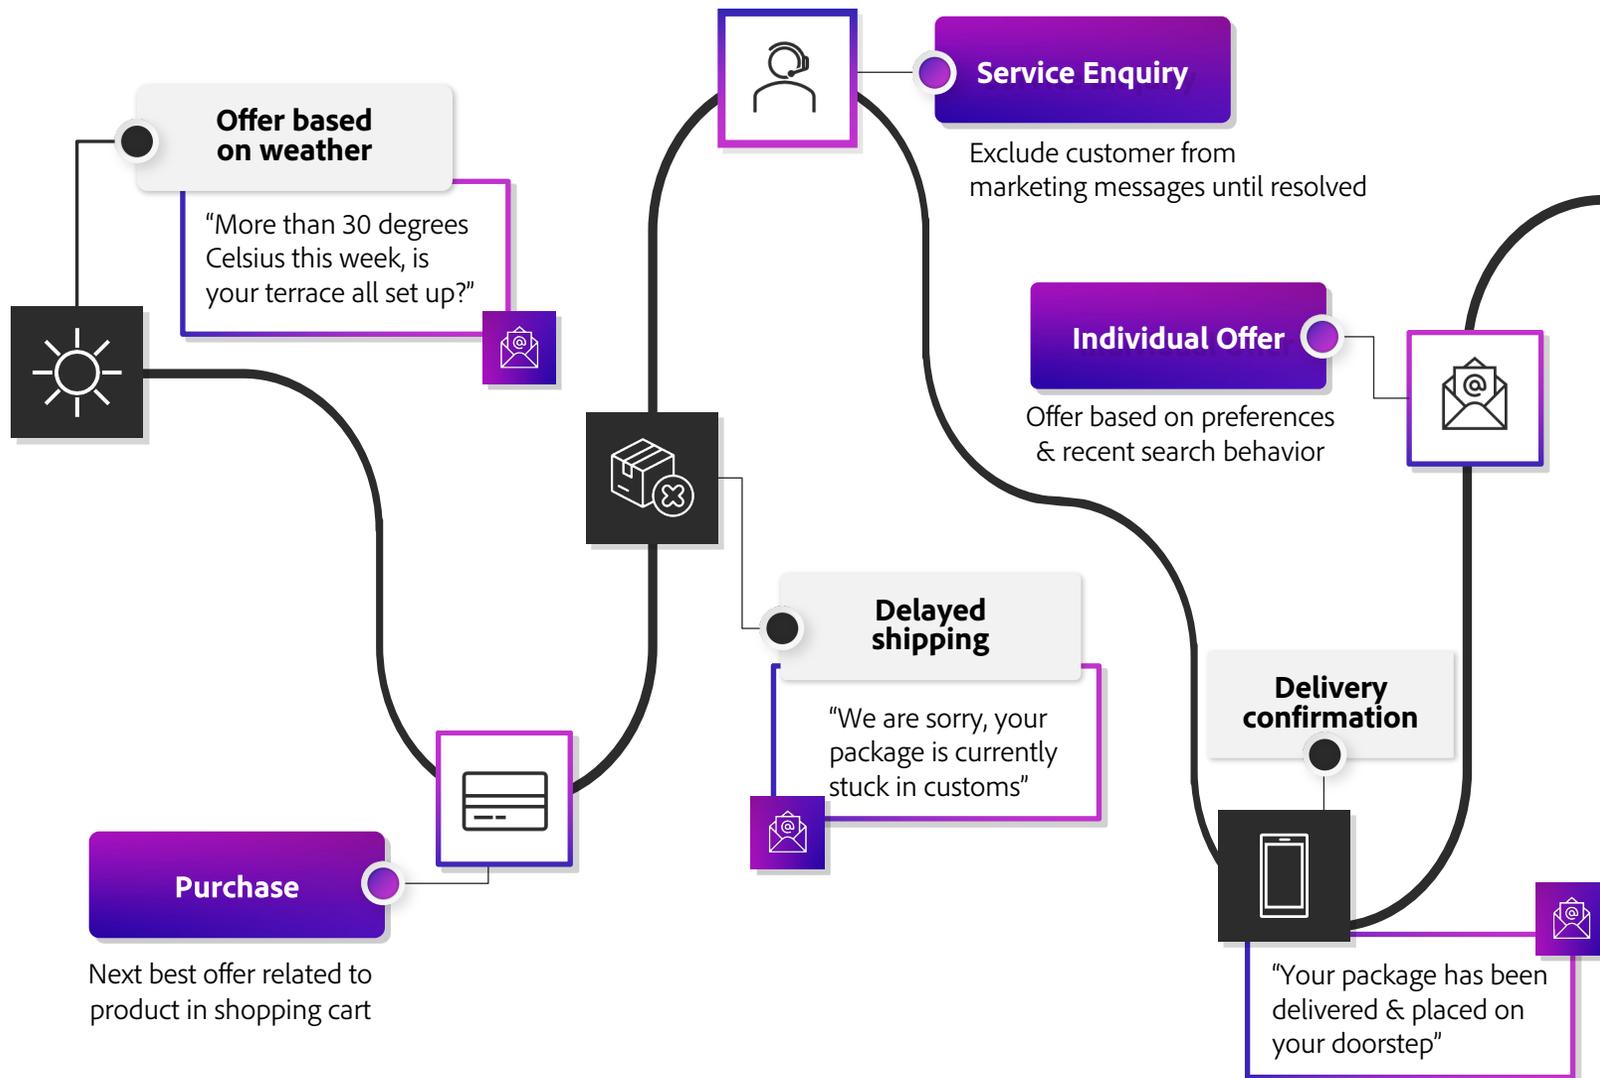

Discover & deliver omnichannel insights within seconds

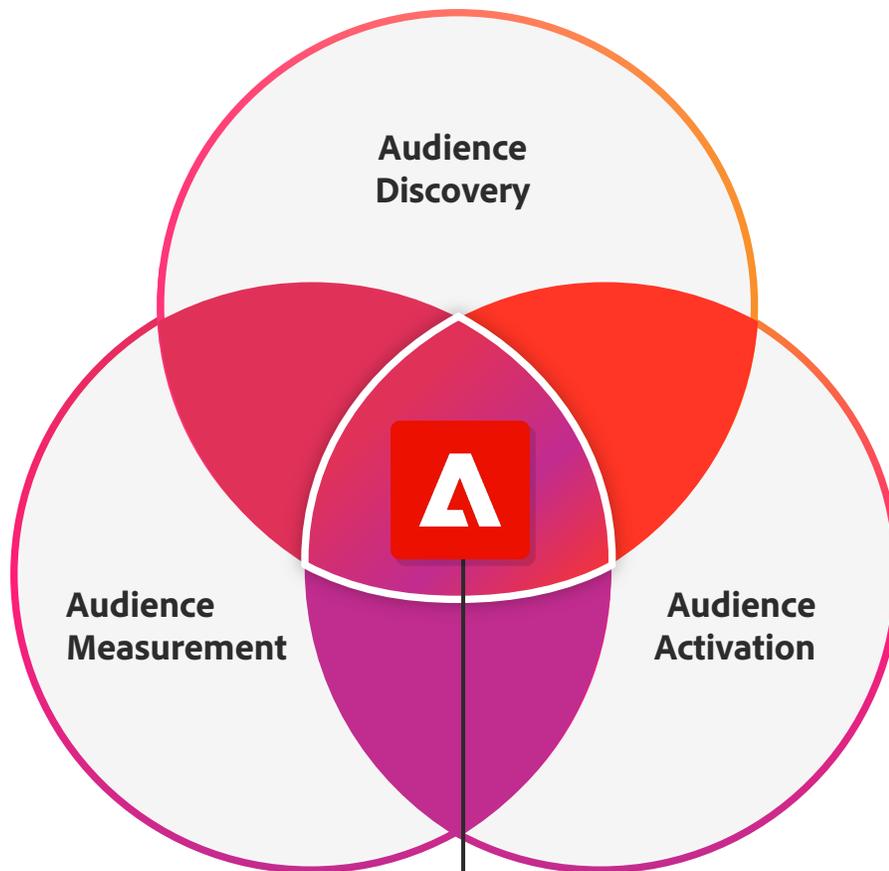

# Actionable profiles for personalization across the customer lifecycle powered by Adobe Real-Time CDP

# Right-time engagement across any journey powered by Adobe Journey Optimizer

# Value realization: why brands use Adobe

Real-Time CDP, Adobe Journey Optimizer, and Customer Journey Analytics are the trifecta. They more efficiently and effectively help us realize evergreen marketing use cases that incorporate all the customer data.

**Senior director, customer data platforms**

Doing any sort of personalized content on the website was really difficult. There wasn't a direct integration between how we publish content, measure content, and subsequently target emails or automate a follow-up.

**Director of digital marketing experience**

Eyes truly light up the first-time data is unified. Finally, being able to report on data from X, Y, and Z sources and correlate that data, which helped us to be smarter and better understand your customers.

**Senior director of customer data platforms**

**Adobe differentiation**

# Current Limitations with Customer Acquisition

Creative production is manual

Advertising optimized to audience & cost

Onsite is disconnected from advertising

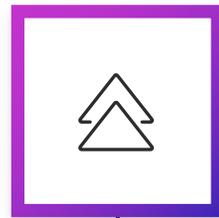

Measurement is limited

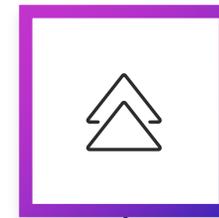

More **headwinds**  
on the **horizon**

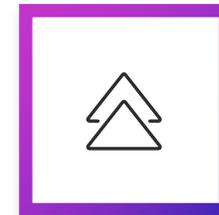

Diversification  
of media

Media costs

Onsite  
engagement

Privacy  
requirements

# Customer Acquisition is bigger than driving traffic into a funnel

## Objectives

1

**Drive quality site traffic** while maximizing spend efficiency

2

**Increase conversion on-site** with better engagement

## Challenges

### Planning

How to best **allocate marketing spend** as channels and tactics proliferate?

### On-site engagement

How to **connect onsite experiences** with offsite touchpoints?

### Off-site engagement

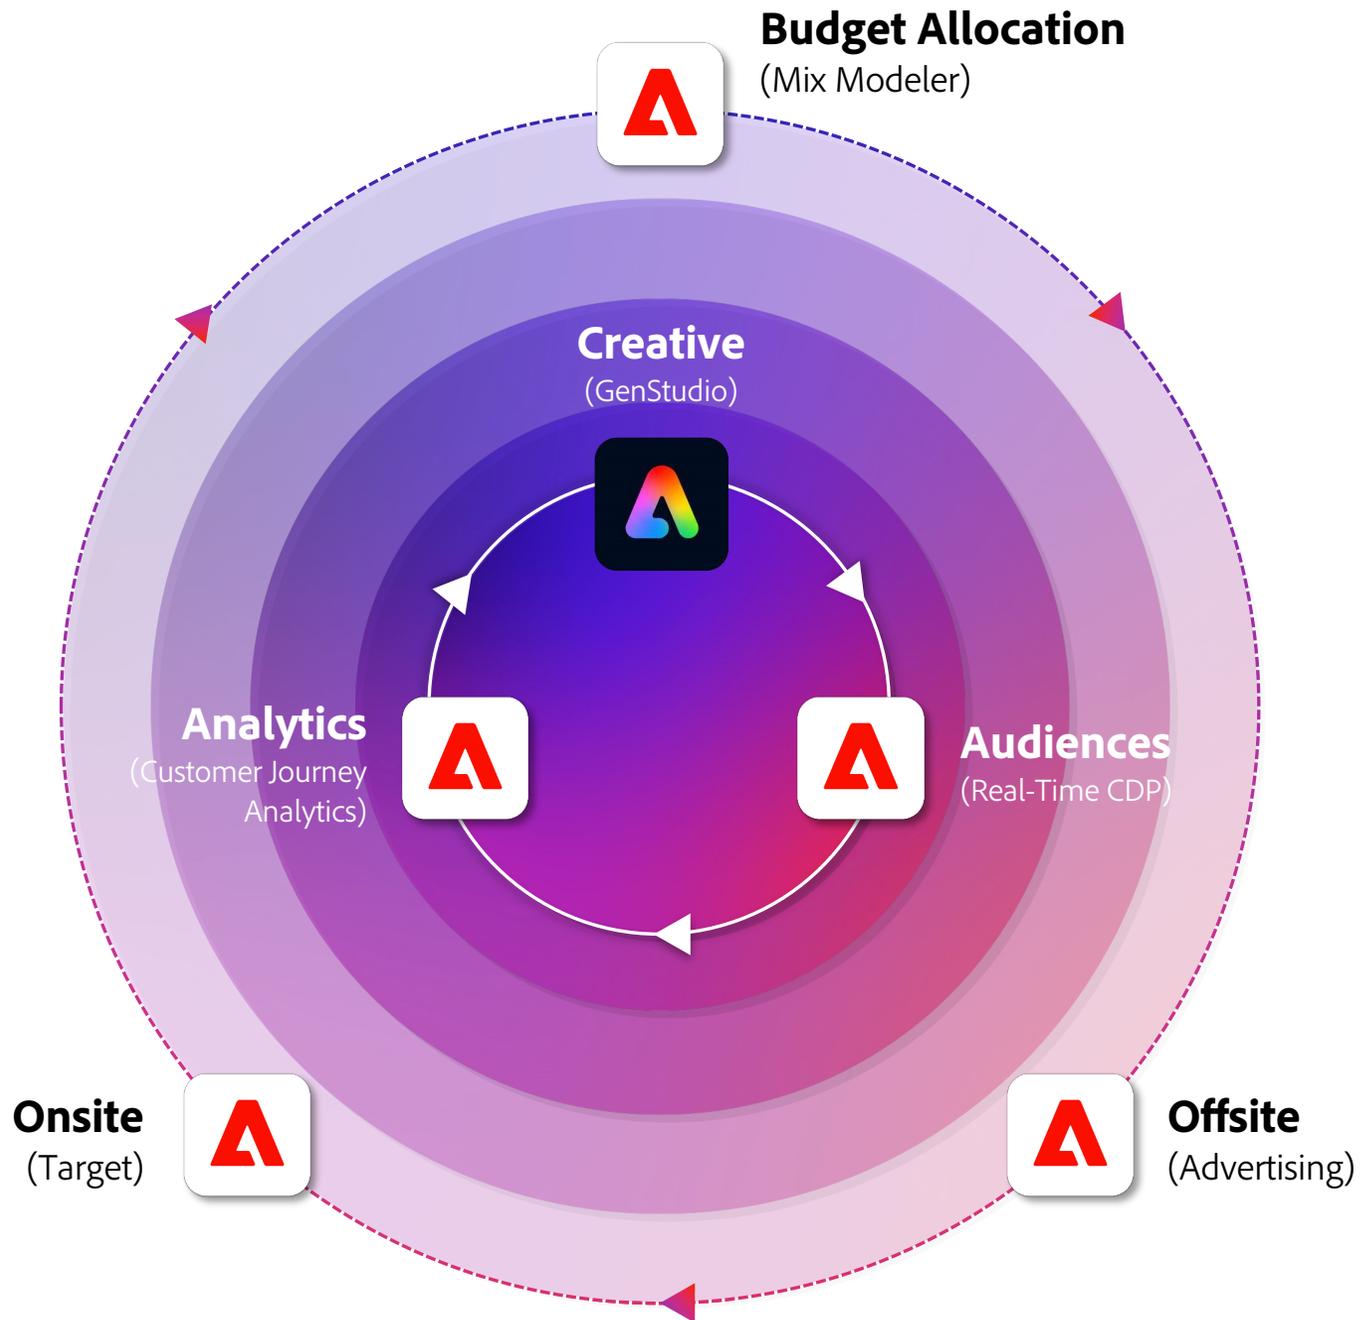

How to seamlessly **build, test & optimize** creative variations across channels?

### Retargeting

How to **re-target traffic** that has not authenticated on site?

## MEASUREMENT

How to **determine impact of tactics** across offsite & onsite channels to determine **what is working?**

**Experience-Led  
Customer Acquisition**

**Personalization &  
Experimentation  
at Scale**

# Cost-Focused Customer Acquisition

## Creative production is manual

Creative production is manual

Ad effectiveness driven by audience & cost of media

Onsite experiences disconnected from advertising

Measurement is fragmented and incomplete

# Experience-Led Customer Acquisition

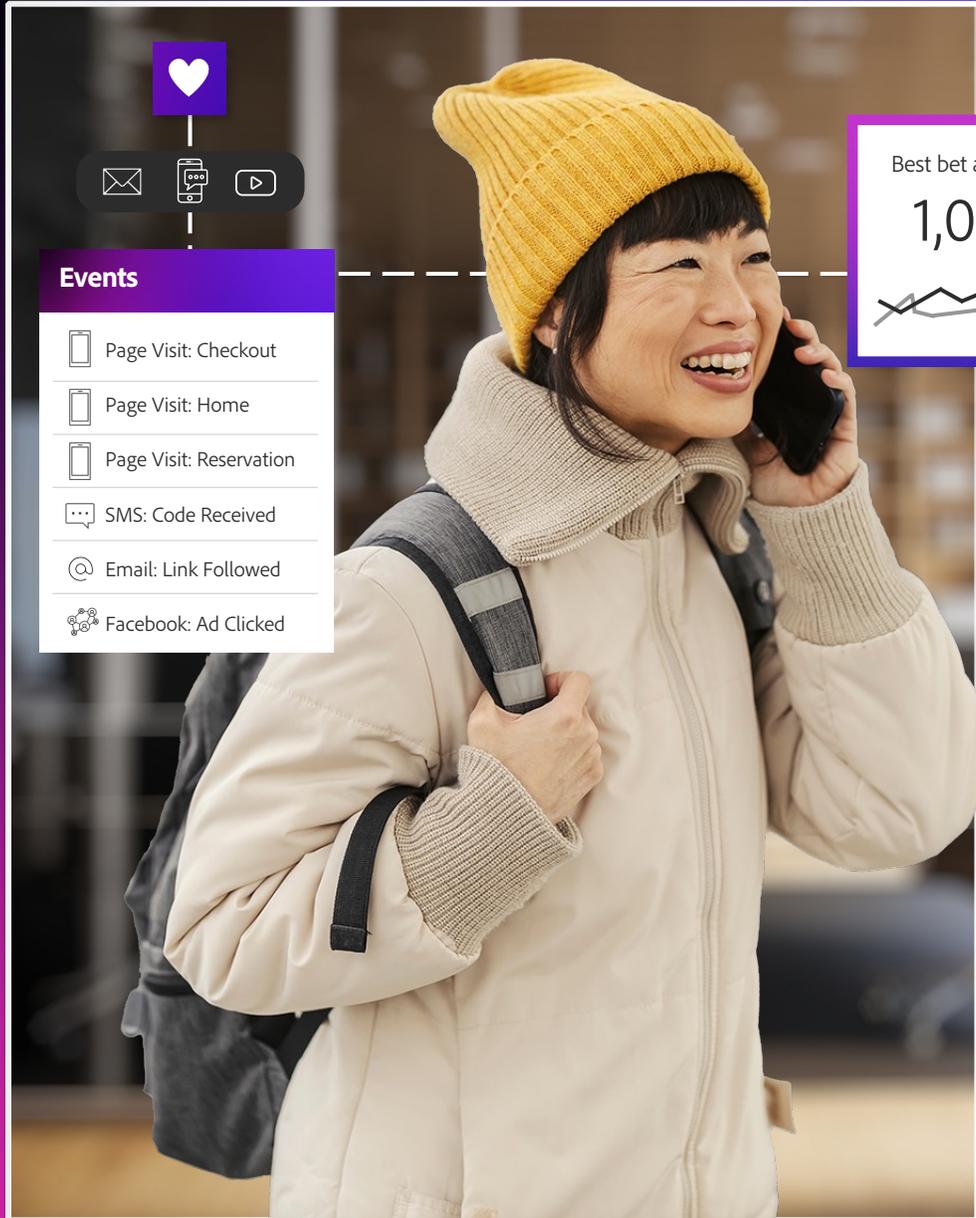

## Maximize conversion rates

Automated, on-brand creative production

Creative experimentation with audiences  
unlocks ad performance

Personalize onsite experiences with all available signals

Unified measurement across paid media & creative

# Adobe Experience Platform

# Adobe Experience Platform

Adobe Experience Cloud is powered by Adobe Experience Platform

## Create actionable, intelligent, real-time customer profiles

Bring in data from multiple sources to create and enhance robust customer profiles that update in real time to ensure customers receive the right experiences across every channel.

## Gain trust with governance, security, and privacy controls

Ensure your data is used in line with usage constraints like privacy, contracts, and policies. Keep customer data safe with secure cloud tech from collection to storage and beyond.

## Enrich data and uncover insights

Streamline data analysis with custom, imported, or out-of-the box data science models. Perform SQL query analysis with data from multiple channels and platforms

## Innovate with open composable services

Connect with an open platform to start fast and enhance product performance by building new services and custom cloud applications.

## Enhance delivery and personalization of real-time experiences at the edge

Look up and activate customer profiles and segments in milliseconds in any system.

# Adobe Target

Collect, organize, analyze, and report on everything your customers do.

## Take omnichannel personalization to the masses

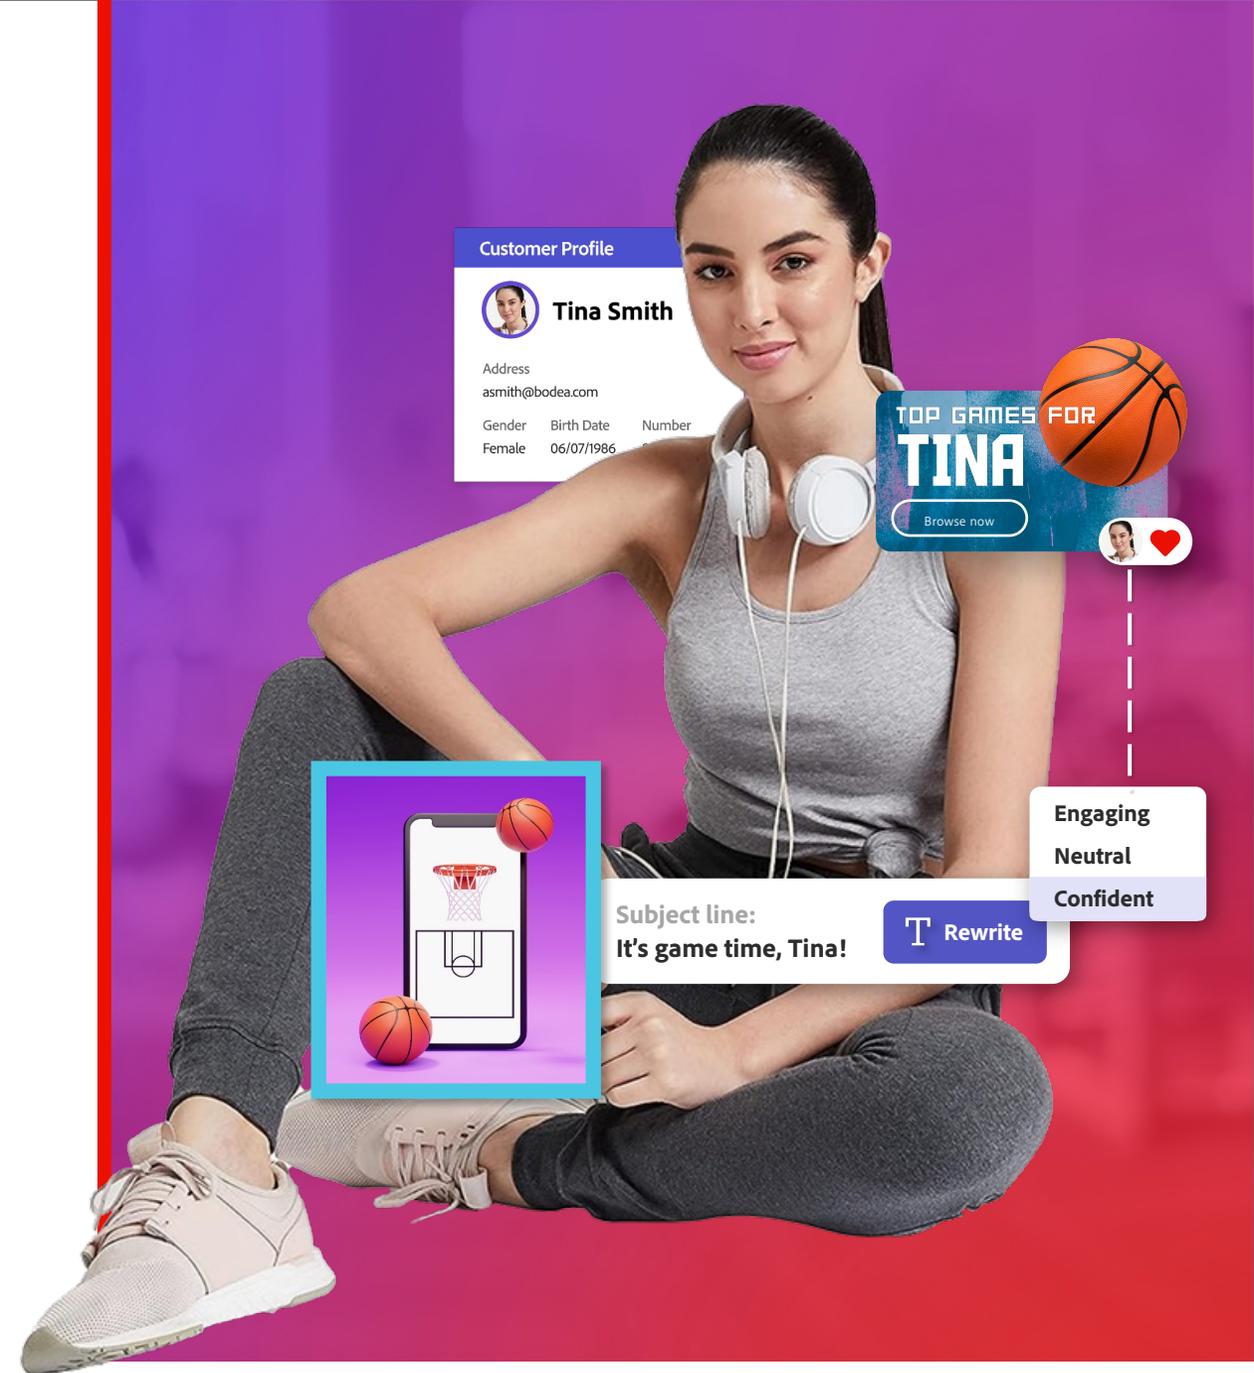

Business users and senior decision-makers can now access insights easily and quickly on their mobile devices and get instant answers to interactive queries.

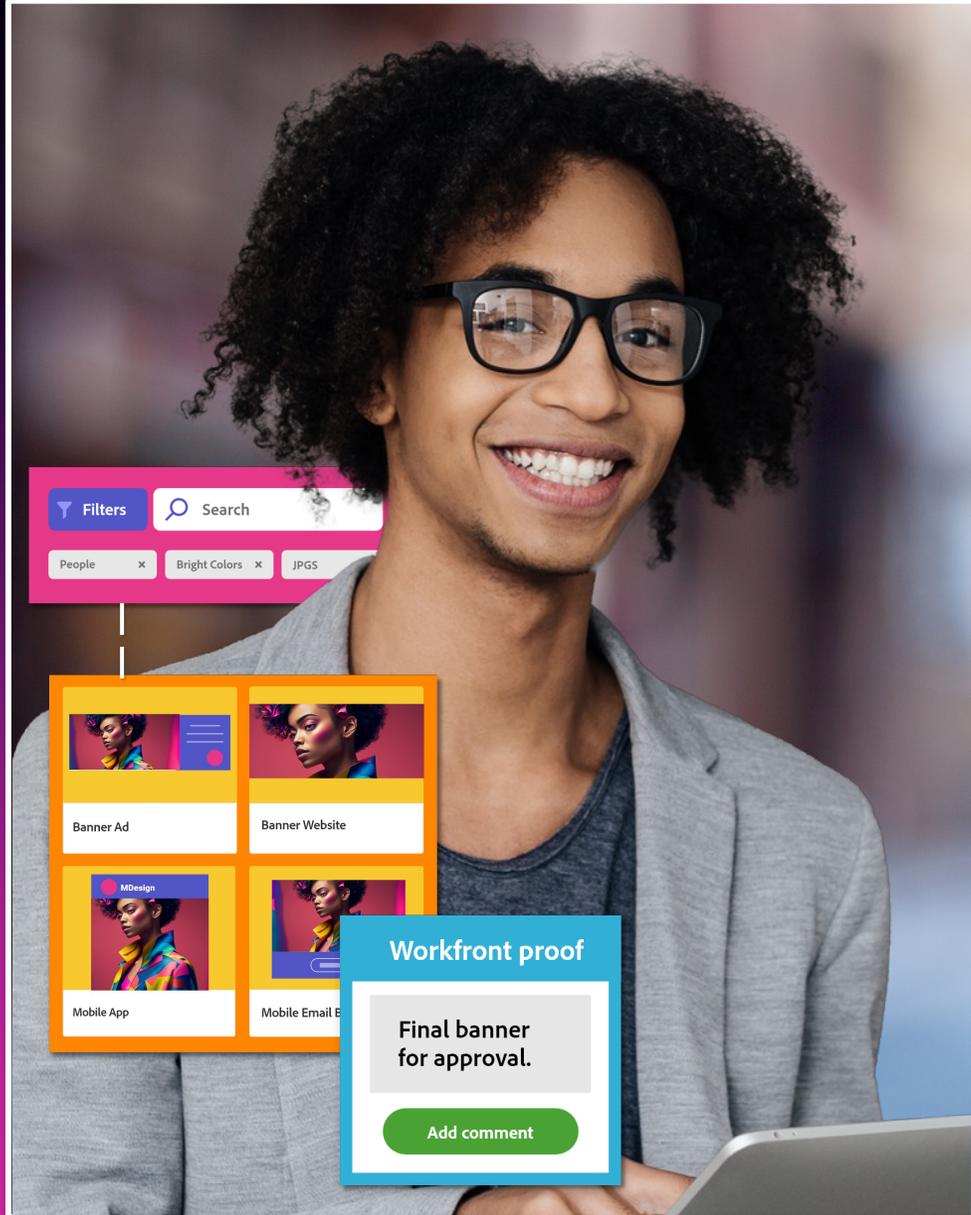

## Stop guessing with A/B and multivariate testing

Users can now evaluate their marketing investments more precisely across paid, earned, and owned media.

## Improve every experience with AI-powered automation & scale

Empower business intelligence and data science teams to stitch and analyze cross-channel data with a powerful analytics toolkit.

# Content

# Adobe Experience Manager

For all your content and digital asset management needs

## Content Management System

Create and manage your digital experience across all channels with automated tools that make scaling effortless.

## Digital Asset Management

Spend more time on experiences and less time searching for and adapting content.

## Digital Enrolment and Forms

End-to-end solution that connects your forms and communications processes.

## AEM Cloud Service

The first cloud-native enterprise-grade content management system featuring optimal performance, with great SLAs and security.

## Digital Signage

Easily connect online and in-store experiences with interactive signage that's responsive to customer data and on-side triggers.

The image features a woman with dark curly hair wearing a large straw hat and a blue and white striped shirt, smiling joyfully. Overlaid on the right side of the image is a digital advertisement for WKND. The ad includes a location pin icon at the top left, a small image of a resort building, and a text box that reads: "A complimentary upgrade is waiting for you <https://wknd.com/book>". Below this, a banner says "Paradise is right around the corner." with a background image of a resort pool. A button labeled "Make reservation" is visible. At the bottom right, a white card displays the WKND logo, a shopping cart icon, and a circular badge showing "7,830 total conversions". The card also lists "Infinity Pool Suite \$220 / night" and a prominent "UPGRADE NOW" button.

# AEM Sites - Content Management

Rapidly create, manage, and deliver personalized experiences across any touch-point throughout the customer journey.

## Cross-channel content

Reuse and quickly adapt content to your customers' preferences so you can connect with them faster across every channel.

## Faster Time to Value

Streamline marketing operations and application development to go quickly from design to implementation.

## Web content management

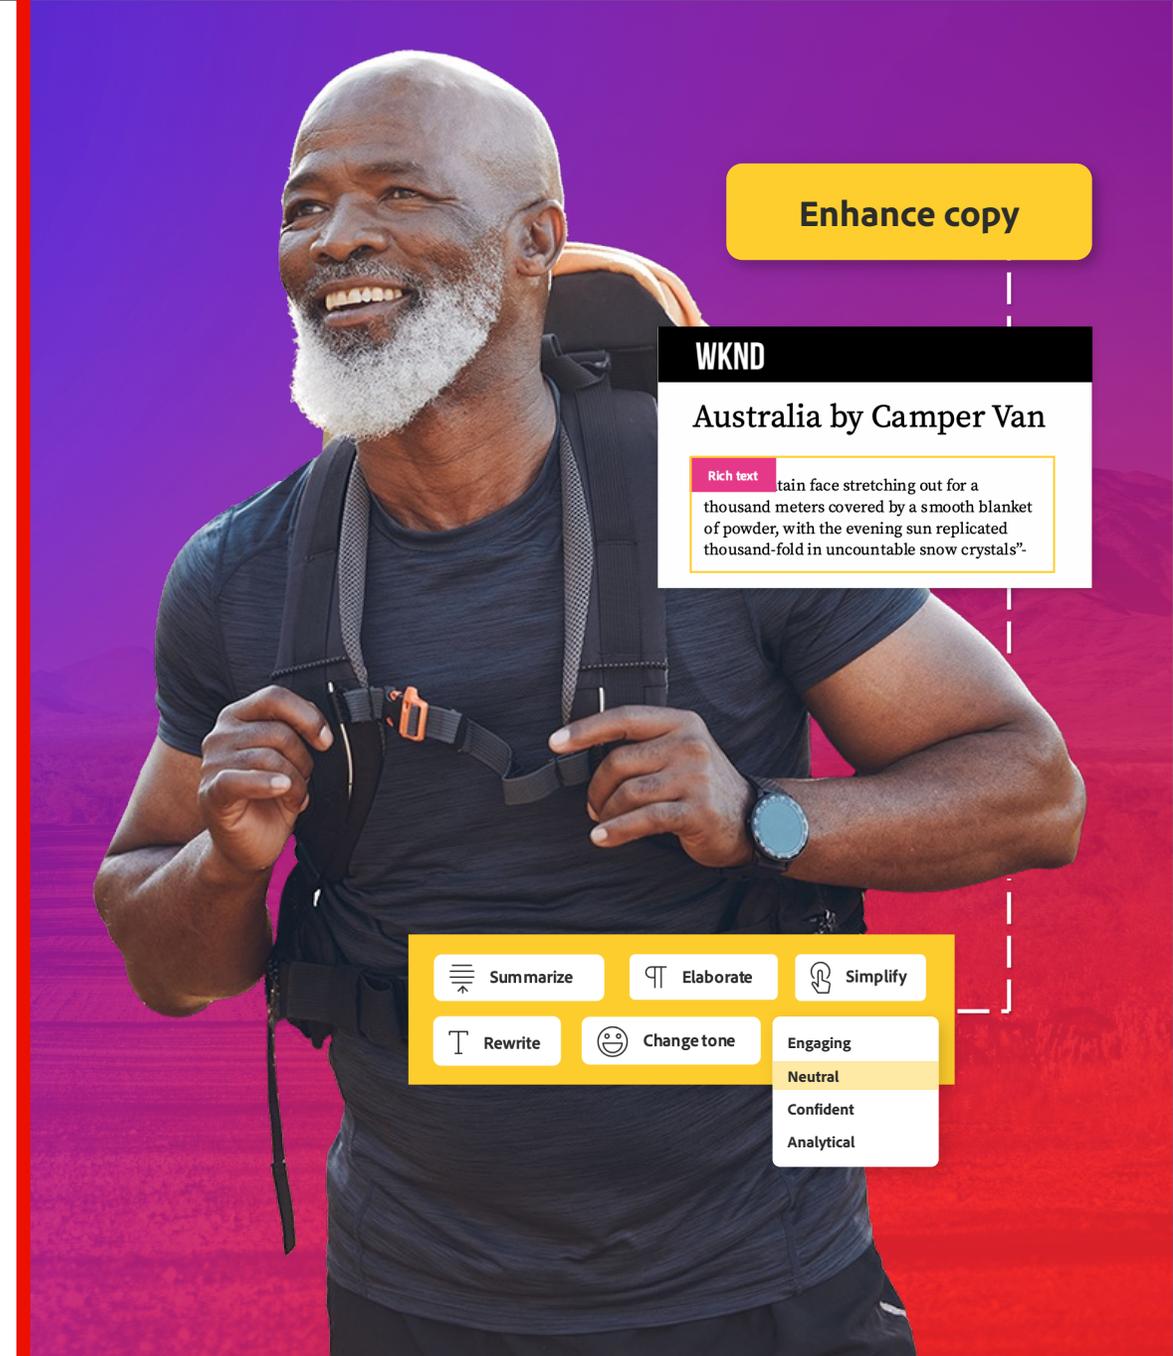

Use AI and machine learning to augment your human-powered efforts to create, manage, deliver, and optimize great content and experiences for your customers.

## AI-powered scalability

Use AI and machine learning to augment your human-powered efforts to create, manage, deliver, and optimize great content and experiences for your customers.

## Personalized experiences

Create a unified customer profile spanning the breadth and depth of your data, and then use it to deliver the most relevant experience for each customer in meaningful, memorable ways.

# AEM Assets - Digital Asset Management

For all your content and digital asset management needs.

## Intuitive digital asset management

Our completely reimagined DAM drives customer experience by combining the scalability of the cloud and the power of AI to deliver personalized content at scale.

## Asset Intelligence

Use AI to streamline tagging, cropping and distribution - to do in minutes what used to take hours.

## Native Creative Cloud connection

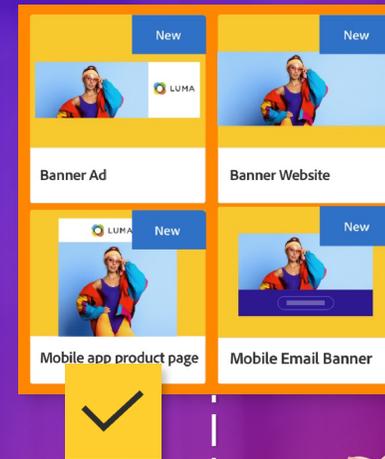

Eliminate email-driven workflows and make collaboration faster by letting creatives work directly in Creative Cloud applications and while marketers easily give feedback and direction, all directly through the DAM.

## Intelligent automation and delivery

Amplify content velocity and meet customer demands easily by rapidly composing, adapting, and delivering countless variations across devices and channels.

## Adobe Workfront Integration

From intake to delivery, you can maximize the value of your content—at scale—by ensuring your digital assets are built, reviewed, approved and automatically tagged to their associated project.

Quick content creation

# AEM Forms - Digital Enrollment and Forms

For all your content and digital asset management needs.

## Responsive forms

We understand that the start of the journey matters. So our mobile-responsive forms and automated forms conversion make enrollment easy on any channel.

## Customer communications

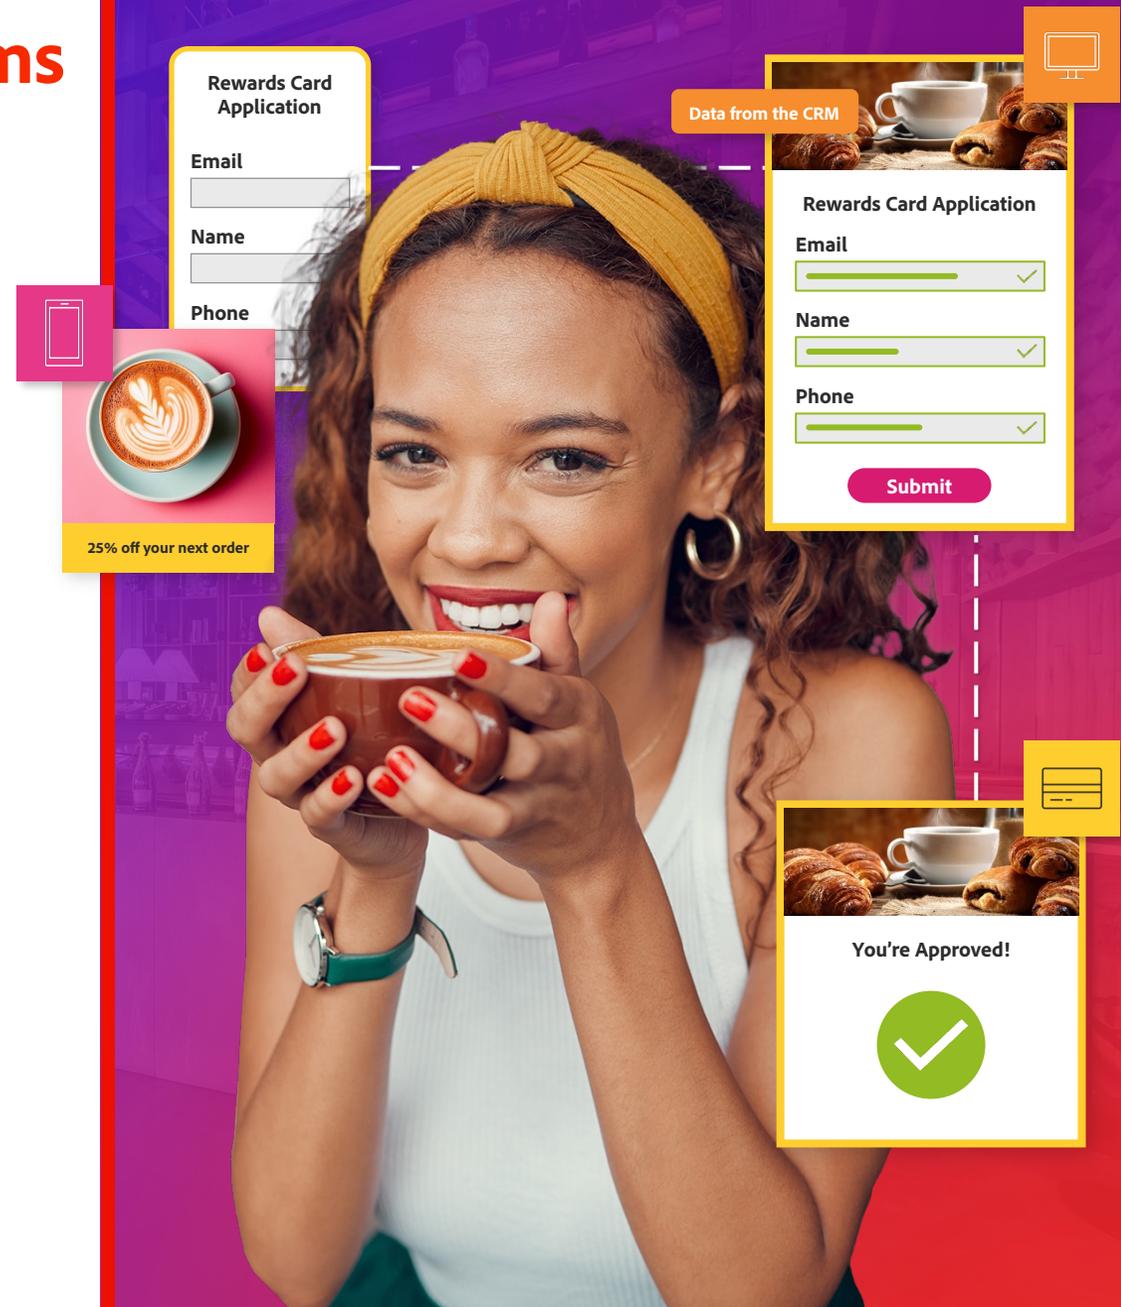

We think every communication can be personal. So use powerful data integrations to automatically personalize your forms and communications.

## Scalable authoring

Enrollment should be easy from start to finish. With fragment-based authoring, reuse content to quickly build multiple forms or communications.

## Automate onboarding

We make end-to-end customer journeys faster. Responsive forms combine with smart, secure e-sign tools and automated workflows eliminate manual processes.

# AEM – Cloud Service

For all your content and digital asset management needs.

## Performance resiliency

Built-in redundancy and proactive monitoring capabilities provide mission-critical service level availability and protect against unpredictable cloud outages.

## Modular, scalable, and global

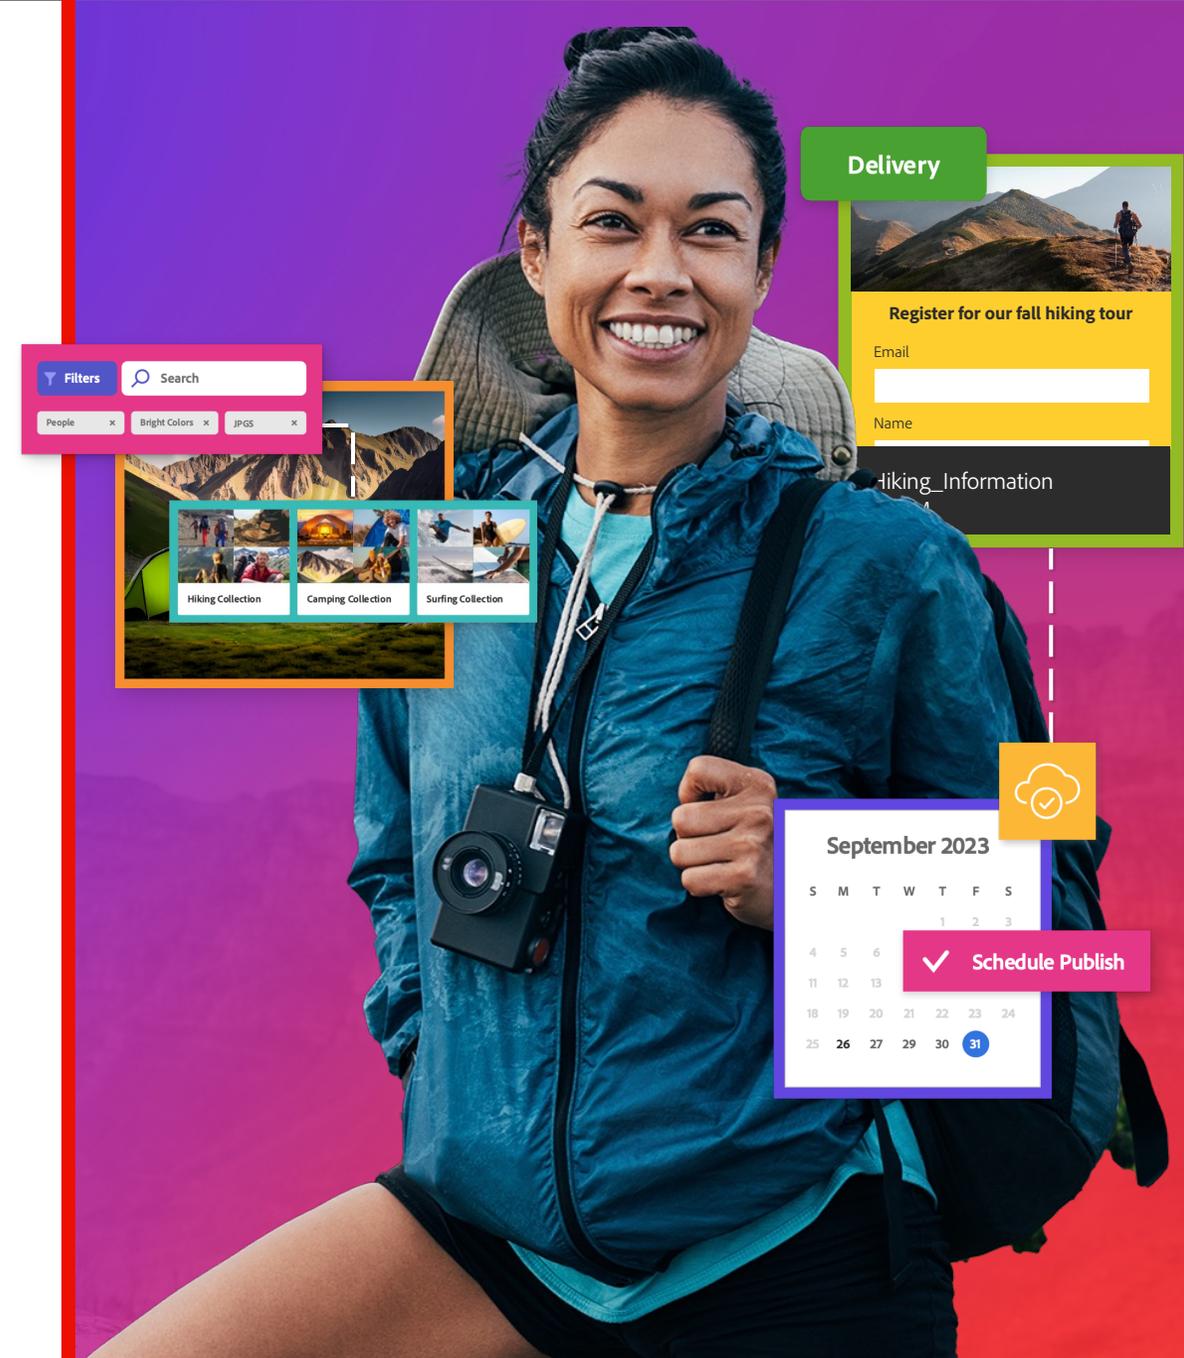

Scale as fast as your customers demand. Maintain high performance globally with an architecture designed to auto-scale within seconds.

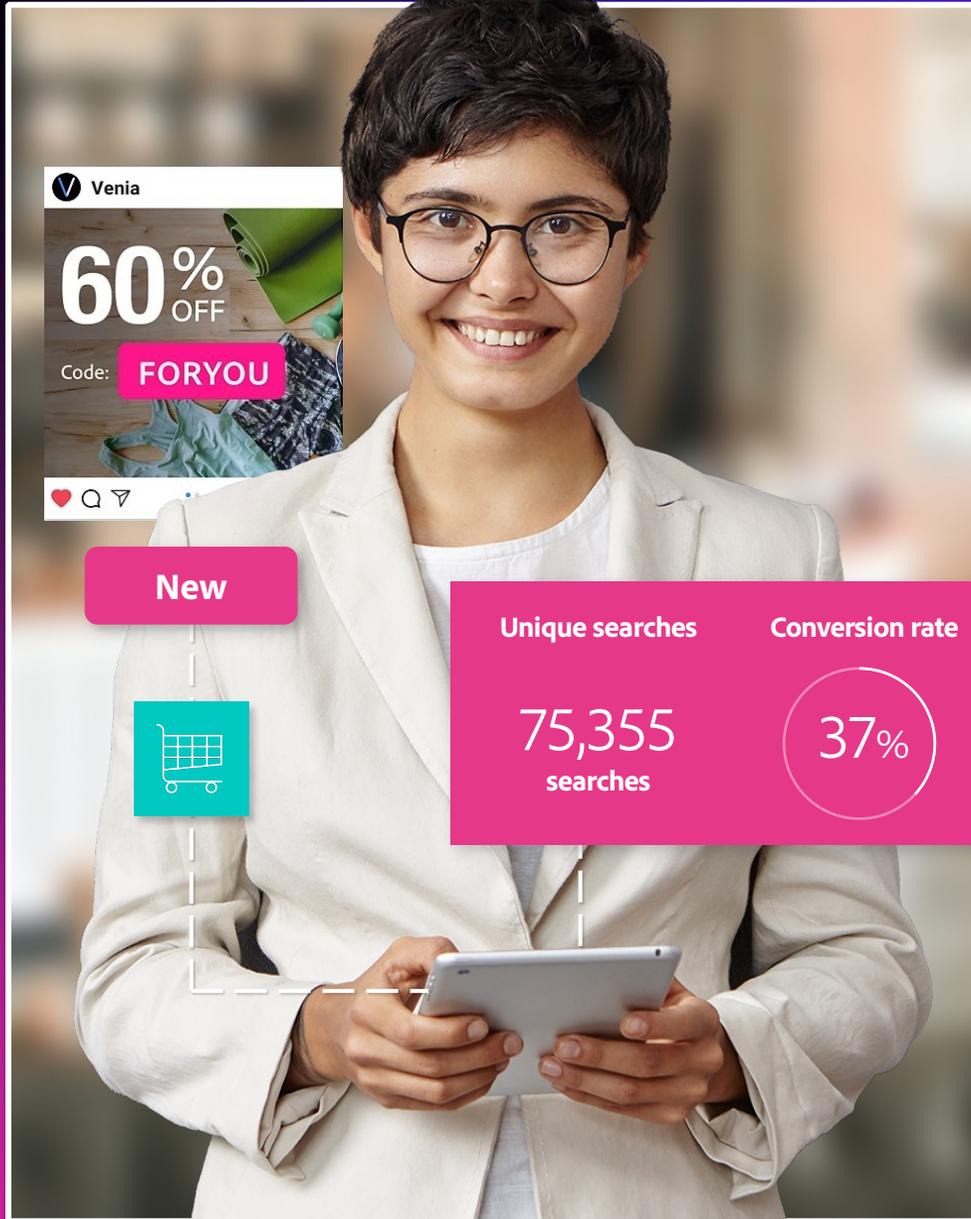

## Always current

Focus on innovating instead of planning for version upgrades. New experience management capabilities are seamlessly validated and made accessible to your teams instantly.

## Secure by default

Security is at our core. We provide enterprise-grade security with industry recognized standards to ensure all data and content is private and protected.

# Commerce

# Adobe Commerce

More personalization. More purchases. Get both.

## Sell anywhere with omnichannel experiences

Offer the right content across these channels — all while managing everything from one platform.

## Manage and deliver a unified commerce experience

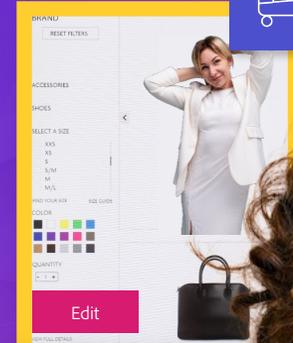

Manage and deliver branded, mobile-friendly unified commerce experiences every time, everywhere.

## Commerce intelligence

Measure and optimize campaigns with commerce intelligence that enables segmentation and targeting to help identify the most profitable customers.

## Gain operational confidence with scale and support

Be confident that your site and your data are secure, highly available, and scalable for high traffic demands.

# Adobe Workfront

Speed time to market and empower your teams by efficiently managing the end-to-end lifecycle of work.

## Align strategy across the organization

Connect business strategy to work delivery and ensure that the right work is prioritized.

## Plan and prioritize work

Allocate budget to priorities, optimize resource pools, iteratively balance portfolio, and efficiently plan work.

## Streamline work execution

Centralize work in a single place and standardize and automate work processes—from intake and resourcing all the way to completion.

## Collaborate, review, and approve

Simplify reviews and track and audit approvals. Collaborate across divisions, keep teams productive, and execute with agility.

## Measure and optimize work

Deliver against strategy, measure productivity, ensure quality and compliance, and optimize future initiatives with rich historical data.
