

EPTURA WORKPLACE

Visitor management

Streamline your
visitor experience.

Elevate the guest experience
while securing the workplace.

As visitor check-ins increase 35% year over year, prioritizing the safety and security of your visitors, employees, and assets is essential. Whether you need to track who is on premises, create a more secure work environment, or see real time visitor data and trends, Eptura can help you gain greater control over the complete visitor experience.

Eptura's advanced visitor management system offers a customizable and effortless check-in process, as well as advanced security measures and access control. Working in tandem with workspace booking and smart check-in analytics as part of Eptura Workplace's powerful suite of tools, visitor management gives you full authority and visibility over your space. With Eptura's visitor management solution, you are better equipped and prepared to host visitors, elevate the guest experience, and retain important information that adds a level of security for your people and data.

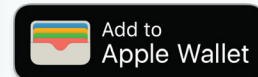

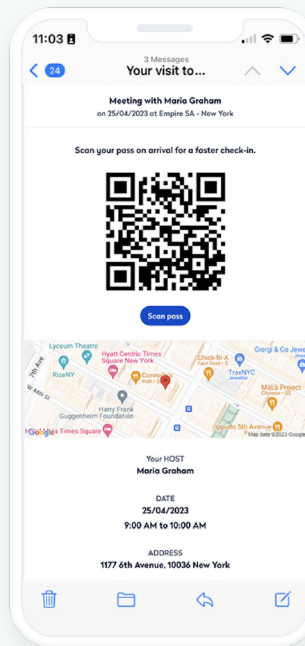

For security, we can now put a name on the face and it's a lot more efficient for us. It gets people through a lot quicker, and prevents hold-ups.

Everything you need to greet your guests

Establish a digital logbook

- Easily track and record all guests from entry to exit across your locations.
- Collect and store visitor data such as name, company, contact information, and the purpose of their visit in detail.
- Search or use advanced filters for immediate retrieval of visitor information in case of an emergency or compliance audit.

Remote registration fit for the hybrid work environment

- Screen all visitors prior to entry with pre-registration.
- Use powerful dashboards and smart rules to create custom check-in flows such as generating QR codes for condition-based access.
- Send customized invitations by visitor type to speed up the check-in process and provide a personalized experience for visitors.

Enhance your workplace security

- Receive up-to-date information on building occupants with real-time monitoring.
- Provide a more controlled entry process and cross-reference visitors with integrated watchlists and ID matching.
- Issue personalized access credentials with digital badges or printed labels to ensure authorized visitors are granted access to the right spaces.

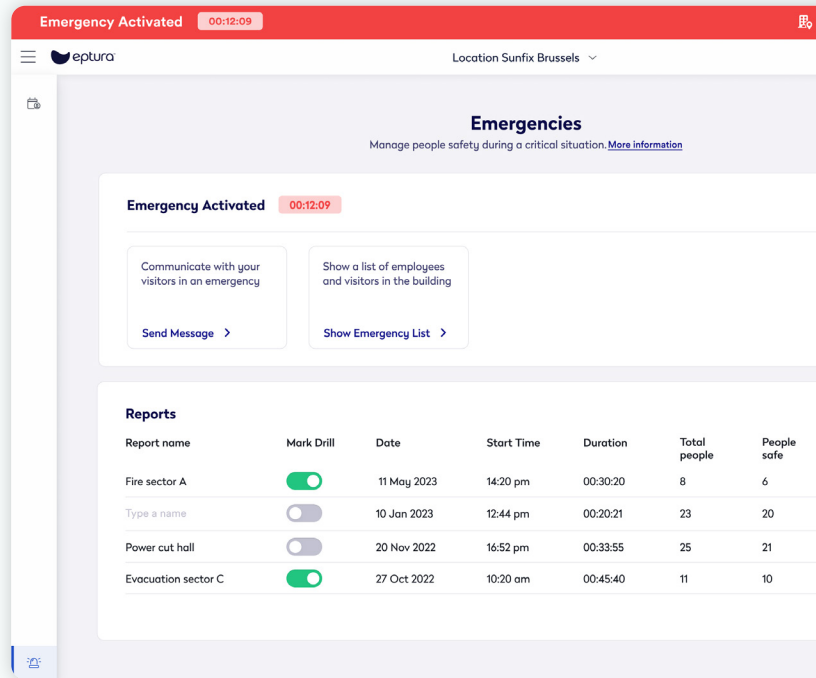

Accelerate entry with autonomous check-in

- Simplify check-in by integrating self-service capabilities with existing building systems.
- Allow guests to use guided prompts on digital kiosks or mobile devices to help reduce wait times.
- Get real time visibility into visitor traffic by tracking arrivals and departures.

Integrate your access control system

- Sync visitor and employee details with your access control system.
- Offer a touchless experience and let visitors breeze through access control systems with RFID cards and QR codes.
- Easily integrate with third-party access control partners including AMAG Technology, Lenel OnGuard, and Avignon Alta.

“It’s cloud-based, it’s quick, and it’s simple. Coming from a system that was none of those things, it was impressive. Eptura was the most customizable and impressive solution on the market, and the perfect complement to our on-premises access control system.”

Account for building occupants during evacuations

- Send an emergency alert to people in the workplace during evacuations and drills to ensure everyone is informed of the emergency and knows what to do.
- Get a real-time list of everyone in the building, easily mark people as safe during a roll call across devices, and coordinate with emergency responders more effectively.
- Generate post-emergency reports to share information responders, analyze past evacuations, or support an auditable process.

Take data security seriously

- Safely file, collect, and export visitor data within a secure digital environment.
- Comply with local and international privacy regulations with regional data hosting, and customizable data retention and deletion rules.

work your world™

Eptura is a global worktech company that provides software solutions for people, workplaces, and assets to enable everyone to reach their full potential. Our scale and expertise helps organizations to engineer a thriving work environment, by giving them the understanding they need to enhance their employee experience, workspaces, and asset value.
