

Transform into a Blockchain-based Bank with Fireblocks

The exponential growth and rising adoption of digital assets are transforming the global financial ecosystem into a digital asset-based one. Due to their reliance on legacy security technologies and sub-custody solutions, banks and financial institutions are unable to meet increasing demand for digital asset services from customers and investors. Fireblocks enables your organization to be at the forefront of this transformation with the most scaled and proven digital asset infrastructure.

Bank-grade Digital Asset Custody Infrastructure

Build a digital asset custody business using the only wallet technology that enables secure, flexible access to assets 24/7.

Launch Institutional Digital Asset Services

Commercialize your digital asset custody business with a suite of products and services across trading, lending and payments.

Deploy Tokenized Securities and Stablecoins

Rapidly deploy tokenized fiat, stablecoins, securities, and commodities across public and private blockchain networks.

FIREBLOCKS AT A GLANCE

24/7 GLOBAL SUPPORT

200+ CUSTOMERS

3M+ WALLETS

\$400B+ ASSETS SECURED

625,000+ TX/MONTH

Fireblocks.com

FIREBLOCKS

Platform-as-a-Service

Future-proof your financial institution with a full spectrum of use cases around issuance, storage, lending, trading, and settlement of digital assets.

Most Scaled MPC Custody Technology

MPC-CMP is operationally superior to multisig and HSMs. Next-generation custody technology pioneered by Fireblocks R&D.

Retail Wallet Management

Leverage the only custody technology securing millions of wallets and transactions. Secure and cost-efficient wallet creation and management at scale.

Direct Access to Global Crypto Capital Markets

Facilitate liquidity and best execution through 200+ crypto trading venues, liquidity providers, lending desks and OTCs on the Fireblocks Network.

Native DeFi & Staking

Integrate the full range of protocols for DeFi lending, staking and trading for interest and yield workflows. Institutional level access for DeFi protocols and staking.

Robust APIs & Automation

Automate key processes across custody, transfer, settlement, compliance, and more. REST and PUSH APIs available.

Tokenization Management

Secure turn-key minting, burning, issuance and management for tokenized securities and stablecoins.

Bank Grade Digital Asset Security

The only MPC-based wallet with hot, warm, and cold configurations, backed by Intel SGX hardware with optional HSM FIPS-140 Level 4.

AML & KYT Compliance

Built-in compliance with SOC 2 Type II compliant systems and integrated AML/KYT providers. Support for Travel Rule and Offline Signing.

White-label UI for Rapid Deployment

Go to market faster with a custom-built UI, tailored to your brand and feature suite.

Developing products to bridge digital and traditional assets is foundational to the future of custody. Following significant due diligence and market research, we recognize Fireblocks as a market leader in providing secure technology to support digital asset services.
