

Power BI

Power BI is a unified, scalable platform designed to accelerate business intelligence (BI). Connect to and visualise any data, and seamlessly infuse the visuals into the apps you use every day.

Gain better insights and integrate seamlessly with tools across your estate. With Microsoft Power BI, making sense of data becomes refreshingly simple. Dive into clear visuals, intuitive charts, and user-friendly tools. It's more than just analytics; it's a new way to understand your business and seize every opportunity. Power BI brings clarity like never before.

Cumbria Health

Cumbria Health are a social enterprise, not for profit organisation that provide care services to the population of Cumbria. The organisation wanted to incorporate in technology enabled care into the services that they provide. However, their underpinning systems needed to be upgraded at the same time, which was where **Ingentive** stepped in to implement Power BI, Teams and Sharepoint.

Power BI has revolutionised the way that Cumbria Health utilise data. They can now bring together data sets from their twelve different information systems into one place in Power BI. With Power BI, it's now straightforward for the organisation to build reports that inform its business. Cumbria Health organisation runs on data, as so many organisations do.

Why Ingentive?

At **Ingentive**, we specialise in unleashing the full potential of Microsoft's business applications, orchestrating complex Azure deployments, and navigating the intricacies of Microsoft Modern Workplace, Power Platform and Cyber Security.

What sets us apart? Our unwavering focus on infusing every solution with the transformative power of AI.
