

Azure Migration Analysis and Plan

Eviden synchronizes cutting-edge migration tools and expertise to facilitate seamless cloud migration, a pivotal organizational shift. Our holistic approach aligns business strategies with meticulous migration plans, expediting cloud adoption. With our insights, we expedite modernization, enabling you to harness cloud benefits swiftly and efficiently

What We Offer

Eviden Azure Migration Analysis and Plan provides comprehensive planning to advance your strategic imperatives with confidence. We can also offer a fixed-cost migration proposal, subject to confirming the eligibility of your migration, minimizing risk, and aligning with your business needs

We automate assessments and migration processes to accelerate through the cloud continuum while maximizing Azure funding and providing workload optimization recommendations.

Our capabilities include cloud advisory, application transformation, and end-to-end support to help you optimally navigate the cloud continuum.

Azure Migration Analysis and Plan

How it Works

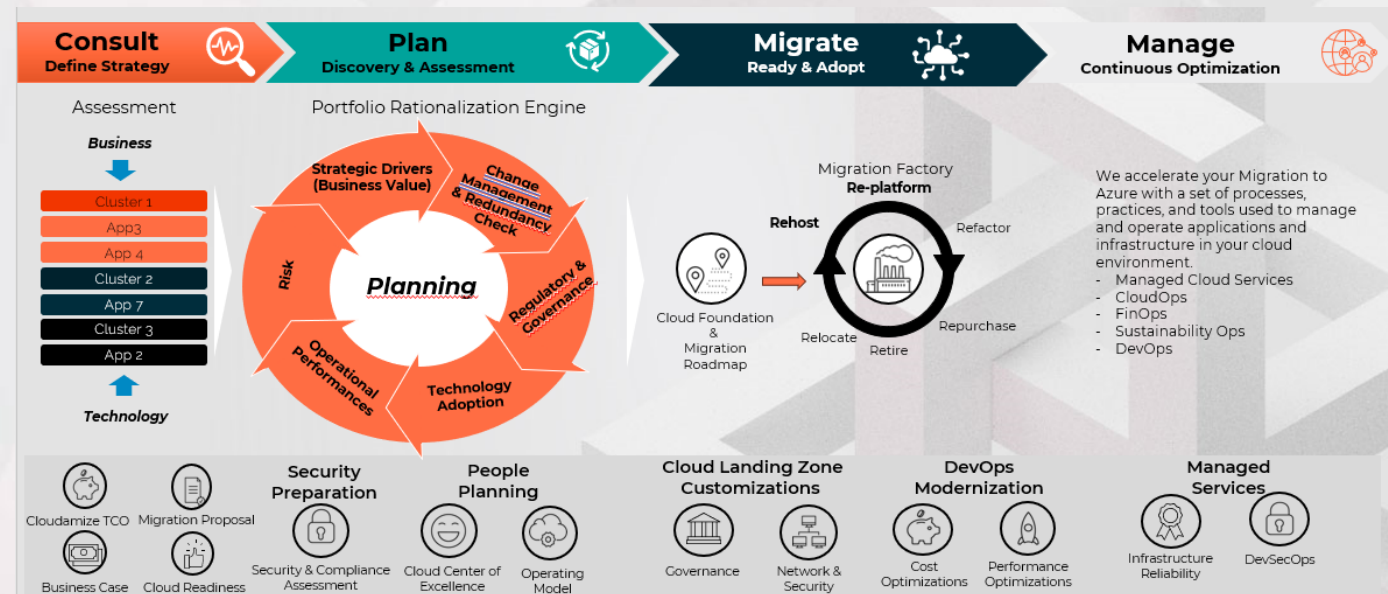

Cloud Migration is a technological and organizational change that requires careful coordination.

Eviden has combined our world-class migration toolchain with our Cloud Experts to guide customers across the cloud continuum.

We accelerate cloud adoption with a comprehensive methodology that aligns business strategy with a detailed migration plan and end-to-end support to orchestrate successful migration execution.

We help you realize the value of the cloud faster and more efficiently with insights to optimize and accelerate modernization.

Execution Strategies and Solutions

Azure Migration Analysis and Plan

Customer Outcomes

40% reduction in annual cost

24/7 Management and Monitoring

Customer Success

Company: US-based Healthcare Services Organization

Solution: As an Azure Expert MSP, Eviden leveraged the Azure Assessment Program to analyze the customer's complex environment quickly and determine the migration roadmap. We presented a business case to the company that proved the significant ROI of moving to Azure cloud and executing the migration at scale and speed with an orchestrated rapid migration program.

Outcome:

- 1200 applications migrated to Azure
- 40% reduction in yearly operating costs
- Centralize 24/7 Management and Monitoring of IaaS and PaaS
- Cohesive, flexible, and scalable infrastructure on which to operate its business
