Three Reasons for our Get Ready *All You Can Eat* Workshop

AI Readiness Assessment and Implementation Strategy

New technologies raise questions about the handling of sensitive data. Our workshop helps answer these questions, provides an AI readiness assessment, and delivers an implementation framework that ensures full visibility and control over your data.

Data Security and Compliance

Deploying AI tools such as Copilot for Microsoft 365 presents data security, compliance, and privacy challenges. Our workshop provides an in-depth introduction to Microsoft Purview to ensure that AI tools can be implemented securely.

Practical Solutions and Best Practices for Common Issues

Our workshop will provide best practices on how to address common pain points when implementing Copilot for Microsoft 365, such as identifying and classifying critical data, data loss prevention, and data lifecycle management, to fully leverage AI for increased productivity.
