# Holistic, comprehensive security and compliance for your Azure environment

— About Ermetic for Azure:

Ermetic reduces the attack surface of your Azure and multi-cloud environment through pinpoint visualization, accurate prioritization and guided remediation. It unifies full asset discovery, risk analysis, threat detection and compliance.

— What we offer

Ermetic is a cloud-native application protection platform (CNAPP) that detects, prioritizes and remediates security gaps that can lead to data breaches. It applies deep understanding of the Azure infrastructure and permissions model to surface and prioritize hard-to-detect findings and guide precise remediation -- curbing risk, enforcing compliance and enabling least privilege at scale.

Ermetic integrates deeply with native features like Azure Active Directory and Azure Pipelines to secure the IAM lifecycle. It is a pioneer in cloud identity & entitlement management (CIEM) and Just In Time (JIT) access. Ermetic works closely with Azure teams to create innovative, Azure-focused research that benefits our mutual customers.
What our customers are saying

"Ermetic is an independent tool giving us overall transparency and deep, unified insight into our cloud architecture across both Azure and AWS."

– Andreas Pfau, Tribe Lead Business Solutions, Bilfinger SE

Why Microsoft Azure?

— Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

— Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

— Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

— Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
