

Renewable Energy Management

Intelligently integrate renewables & distributed resources

Utilities, power generation companies, state agencies and power marketers face the unique challenge of fulfilling the rising demand for energy from a growing population with higher living standards, while simultaneously striving to reduce emissions with sustainable, clean energy.

Integra DERMS is equipping Iberdrola with the industry's most sophisticated solution, capable of assessing and managing the impact of DERs on its network helping it to deliver improved customer satisfaction, meet Spain's clean energy goals, capitalize on new revenue opportunities, and provide customer programs to support further DER adoption

Key Capabilities

- **Natively Integrated** - Providing operators with a single environment and network model to support all operations through native integration with existing utility systems
- **Flexible & Scalable** - Reducing cost, administrative burden, and training time while enhancing performance, reliability, availability and security
- **Expandable** - Extensible support to all product areas for a fully-integrated digital grid management system

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
