Genuine learner-centered support is here

Your students matter the most. By using a student information system that is truly learner-centric, your institution takes advantage of modern functionality and empowering features that lead to better learner outcomes.

Key Capabilities:

Standard and non-standard term management

Automated faculty workload integrated to the payroll solution

Timely, accurate, and compliant financial aid packaging

Degree planning and guided pathways for credential achievement

Housing and career services

A convenient and comprehensive platform built on Microsoft Azure

Flex to the diversity of your campus

Improve institutional competitiveness and secure funding by providing better outcomes to traditional and non-traditional learners through online, hybrid, certificate, and competency-based programs.

Keep students on the path to success

Drive a robust student experience with easy-to-use tools that give advisors insight into student registration, degree progress, and future career planning.

Automate and optimize resources

Ensure that faculty time, resources, and compensation are managed efficiently and optimized for your academic programs.

Provide a full lifecycle learner experience

Streamline students' journeys by centralizing everything from recruitment to career services — and each step in between, including academic advisement, curriculum management, and financial aid.

Anthology Student in Action

“After a quarter of a century, we’re still with the same SIS vendor, for good reason: the right technology, industry partners, direction, and products.”

Kelly Walsh

Chief Information Officer

The College of Westchester
