

Partner preview program for Simplify App Fabric™

Unlock Early Access, Collaborate, and Shape the Future with Our Partner Preview Program!

Gain early access to cutting-edge features, connect with a growing community for collaborative learning, and influence the development of Simplify App Fabric™.

As an early adopter, you will earn recognition for your contributions and position yourself for a lasting partnership as we transition to a full-scale platform offering. As Simplify Healthcare's **preferred** partner, you will be a trailblazer in shaping the future of this incredible platform and unlock an array of benefits to grow your business.

Unlock Early Access

Be among the first to explore and test our platform's features before the official launch.

Join a Collaborative Community

Connect with fellow partners and our team in a dedicated space for knowledge sharing, innovation, and support.

Provide Valuable Feedback

Help shape the platform by sharing insights, reporting issues, and suggesting improvement ideas.

Earn Recognition

Receive exclusive insights, recognition, and opportunities to showcase your solutions.

Prepare for Future Partnership

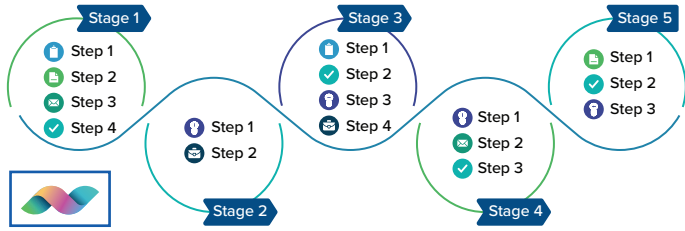

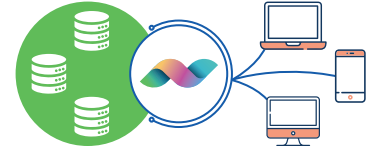

Lay the foundation for a lasting partnership between our organizations as we create joint successes and transition from a preview to a full-scale program.

Build with Speed and Innovation

Do you feel the need and the pressure to deliver business outcomes rapidly and with innovation built in from Day 1? You can achieve both if you take our "RAPID INNOVATION ARCHITECTURE" approach to delivering your enterprise digital outcomes – and avoid common pitfalls.

1 Start with data

Your business is based on data. Create how you want your data structured; how it relates to other data; how you want to show it; and how you think it will be used by other stakeholders. The SAF Design Studio will enable you to do all of this in a no code manner.

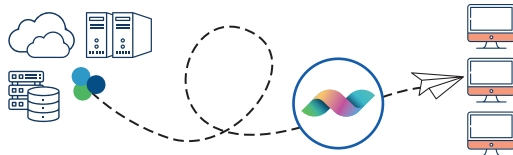

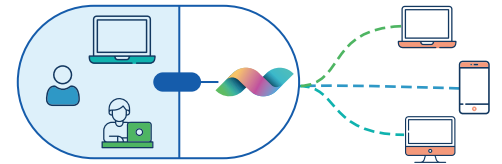

2 Capture how "you do business"

Capture and codify all of your enterprise's processes, policies, unique "ways we do things around here" using the intuitive SAF Rules Studio. You write business rules using the easy-to-use SAF Expression Language, that any advanced MS Excel user can master quickly.

3 Design workflows to mirror your unique processes and procedures

Your work goes through an end-to-end journey – between people, between systems and between internal and external stakeholders. Using the SAF Workflow Studio, you can graphically define the flow of work, in an intelligent and dynamic way to present the right structure and data to the right users in the right context.

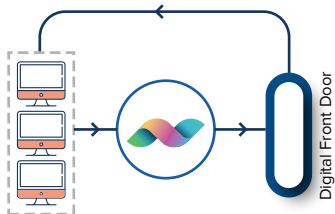

4 Seamlessly integrate data

No solution is an island and all of your innovation has to connect to existing and future systems and data. With APIs being generated automatically each time you add attributes, you already have a jump start. You can also define custom API be points using the SAF API Studio.

5 Integrate your organization's documents

Documents are integral to your business. Whether they have to be developed for regulatory reasons or used because of their effectiveness and ease-of-use for collaboration, the SAF Next Gen Doc Gen capability allows you to build, store, archive documents with clause libraries, redlining, templating, and more.

- Build documents**
- Store documents**
- Archive documents**

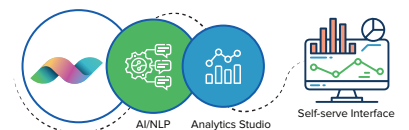

6 Digitize and Digitally transform

The digital front door opened your organization to massive innovation and transformation. Using the SAF Digital Content Manager, you can define and align unstructured content with structured data; use AI/ML to develop ranking and display rules; and expose high impact content and data through your digital front door; build a comprehensive pipeline from the digital front door all the way to the back office in a closed loop manner.

7 Gather AI powered data insights

Insights about your business are critical for the success of your organization – to enhance decision making, stimulate growth and gain a competitive edge. SAF's AI/NLP powered Analytics Studio provides an easy to use and self-serve interface to empower your business decisions with data driven insights.

Embark on a journey of innovation! Join our exclusive Partner Preview Program to be at the forefront of our platform's evolution.
