

Agilyx Integration Machine (AIM)

Take the stress out of AP with the Magic Eye of our Intelligent Recognition Invoice Service

Leveraging the Agilyx AIM tool, IRIS utilises the power of Azure's AI functionality to scan PDF invoices received via email and electronically imports them into Unit4 ERP.

Seamlessly integrated

Connect your existing financial system to IRIS, utilising the power of Azure you can receive PDF invoices with no human interaction needed. IRIS seamlessly integrates with Unit4 ERP and Certinia for a smooth deployment and seamless user experience.

Data accuracy

Reduce business interruption, risk of incorrect data entered and reduce the manual handling that comes with the handling of AP invoices, with an intuitive solution that integrates with your ERP, you save time and build data confidence.

Reduce processing time

A trustworthy, automated solution means less time and money spent on manually entering invoices, allowing you to simplify your processes and enable your team to focus on higher value tasks.

Magic Eye Scanning – IRIS utilises AI to run a magic eye over your invoices and ensure they are scanned into your ERP system with all the key data, reducing errors, manually processing. Our magic eye reduces risk and saves you time and money!
