

# Azure Virtual Desktop Fast Start for SMB

from £5,500

**Get Azure Virtual Desktop (AVD) up and running with the Azure Virtual Desktop Fast Start for SMB, a fully functional AVD environment that is secure and ready to run your apps. Designed and implemented in your Azure tenancy by Advania in 6 days.**

The Azure Virtual Desktop | Fast Start for SMB is the ideal solution for small to medium-sized businesses that are looking for a cost-efficient, simple deployment to accelerate virtual desktop adoption. Whatever your motivation, from enabling remote working, to providing employee flexibility or optimising your costs and security, AVD can deliver on your immediate business need or change.

Here are some reasons why Azure Virtual Desktop could be a valuable addition to your business:

- **Flexibility and scalability:** Azure Virtual Desktop gives you the ability to scale up or down quickly based on your specific business needs. Whether it's accommodating new hires or adjusting for temporary workload increases, the capacity can be adjusted on-demand without the need for significant hardware investments.
- **Remote work enablement:** In today's dynamic work environment, the ability to support remote working is crucial. With Azure Virtual Desktop, employees can securely access their desktops from anywhere, promoting productivity and collaboration no matter where they are located.
- **Cost efficiency:** With its pay-as-you-go model, you only pay for what you use, which can result in significant cost savings compared to traditional VDI solutions that require upfront investment in hardware and software.
- **Security and compliance:** Microsoft provides enterprise-grade security measures such as multi-factor authentication, encryption of data at rest and in transit, as well as compliance with industry standards. This helps ensure your sensitive business data remains secure.
- **Simplified IT management:** Azure Virtual Desktop reduces IT complexity by centralising desktop management. All updates, patches, and other maintenance tasks can be managed centrally from the cloud reducing time spent on these activities considerably.

Advania utilises a mature professional services model of **Engage, Discover, and Deploy** to deliver your AVD environment. We are committed to guiding your organisation through a seamless transition to Azure Virtual Desktop with comprehensive consultation, planning, and deployment assistance.

## Why Advania?

Advania brings great expertise and engagement as a Solutions Partner for Microsoft Cloud, with the AVD specialisation and Azure Expert MSP accreditation. Additionally, Advania can deliver great value by leveraging your investment in qualifying Microsoft 365 licensing.
