Eliminate Data Downtime in Salesforce

ABOUT OWNBACKUP RECOVER

Whether you've got 1 user or 1 million, OwnBackup's Cloud Data Protection Platform has you covered. Available in Azure, OwnBackup Recover proactively protects mission-critical Salesforce data and metadata with automated cloud-to-cloud backups, and speeds time to recovery with precision repair tools. Most SaaS applications rely on a shared responsibility for keeping data safe which means that every admin, integration, and line of code is a potential culprit for data loss or corruption. Despite this exposure, most organizations don't backup their SaaS data or have the ability to easily recover from an incident.

See what customers are saying:

"As Medtronic continues to transform its digital strategy, OwnBackup will play a pivotal role in allowing us to innovate with the peace of mind that we can roll back to previous data and metadata versions, spin up sandboxes with anonymized data, and comply with HIPAA by protecting personal health information."

– Matthew McGarry, Senior Principal Salesforce Technologist, Medtronic

WHAT WE OFFER

The #1 Cloud Data Protection for Salesforce now in Microsoft Azure

Eliminate Data Downtime
Move faster with the confidence you can restore vital business information quickly and completely

Streamline Data Governance
Stay in compliance with regulatory demands and in full control of the information your business runs on

Drive Business Insights
Get the most out of your Salesforce data by exporting it for use with your analytics tools

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
