

Deliver insight-ready data in weeks

with Azure-native Modern Master Data Management

The fastest implementation of any Master Data Management solution

Deploy CluedIn directly from Azure Marketplace in 15 minutes.

~~Wait six months~~ Master data instantly

Connect, map and visualize your data immediately with Knowledge Graph - no upfront modeling required.

Master data 80% faster with the world's most powerful AI

The only platform that lets you master data with Azure OpenAI and CluedIn AI assistant - no code or engineers required.

Seamless integration with the Microsoft Data & Analytics Suite

Integrates natively with 27 different Azure services - making sure you get the insights you need, wherever you need them most.

The most user-friendly Master Data Management Platform on Microsoft Azure

Let's talk

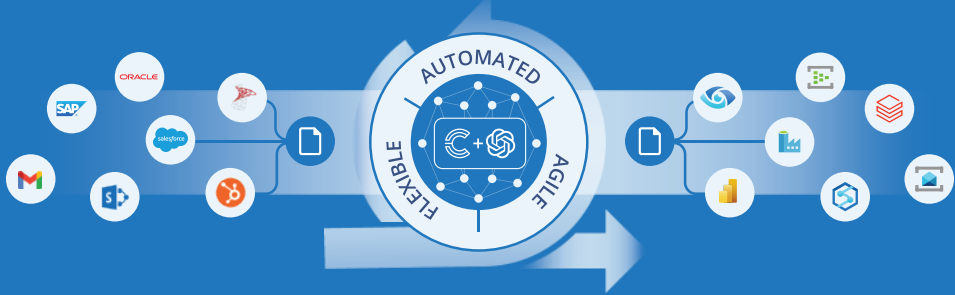

Eliminate upfront modeling with augmented data management

Traditional master data management (MDM) requires 6+ months of data modeling before integration and insight. As the only Azure-native MDM built with Graph, CluedIn lets you integrate data and unlock value immediately.

Effortlessly govern and steward business data

CluedIn enables granular data governance and easy stewardship of any data with integrated Azure OpenAI. No engineers or code needed.

Map and visualize data at scale with Knowledge Graph

Unlock insights by easily building, visualizing and viewing relationships between records, including transactions, products, and hierarchies.

Automatically measure and enhance data quality

CluedIn applies quality scores to any data integrated from any domain, and automatically enriches it using external databases. That means better data and better insights without any extra effort.
