

Wherever your data lives, it's here

Unified data visualization and analytics that unlock insights for better engineering decisions.

Transform the data you have into the knowledge you need

Better visibility = better results

SLO reporting

Improve reliability of critical services by measuring the performance of components.

Incident response

Reduce time wasted chasing answers by knowing where to go when things go wrong.

CI/CD observability

Prevent interruptions to feature delivery by monitoring the health of release pipelines.

Status roll-up

Scale operations across complex systems by seeing everything in one place.

Cloud costs

Optimize cloud costs by understanding what, where and why you're spending.

KPI and scorecards

Deliver desired business outcomes by focusing teams on shared goals and priorities.

Developer metrics

Increase development velocity by measuring Accelerate (DORA) metrics for your team.

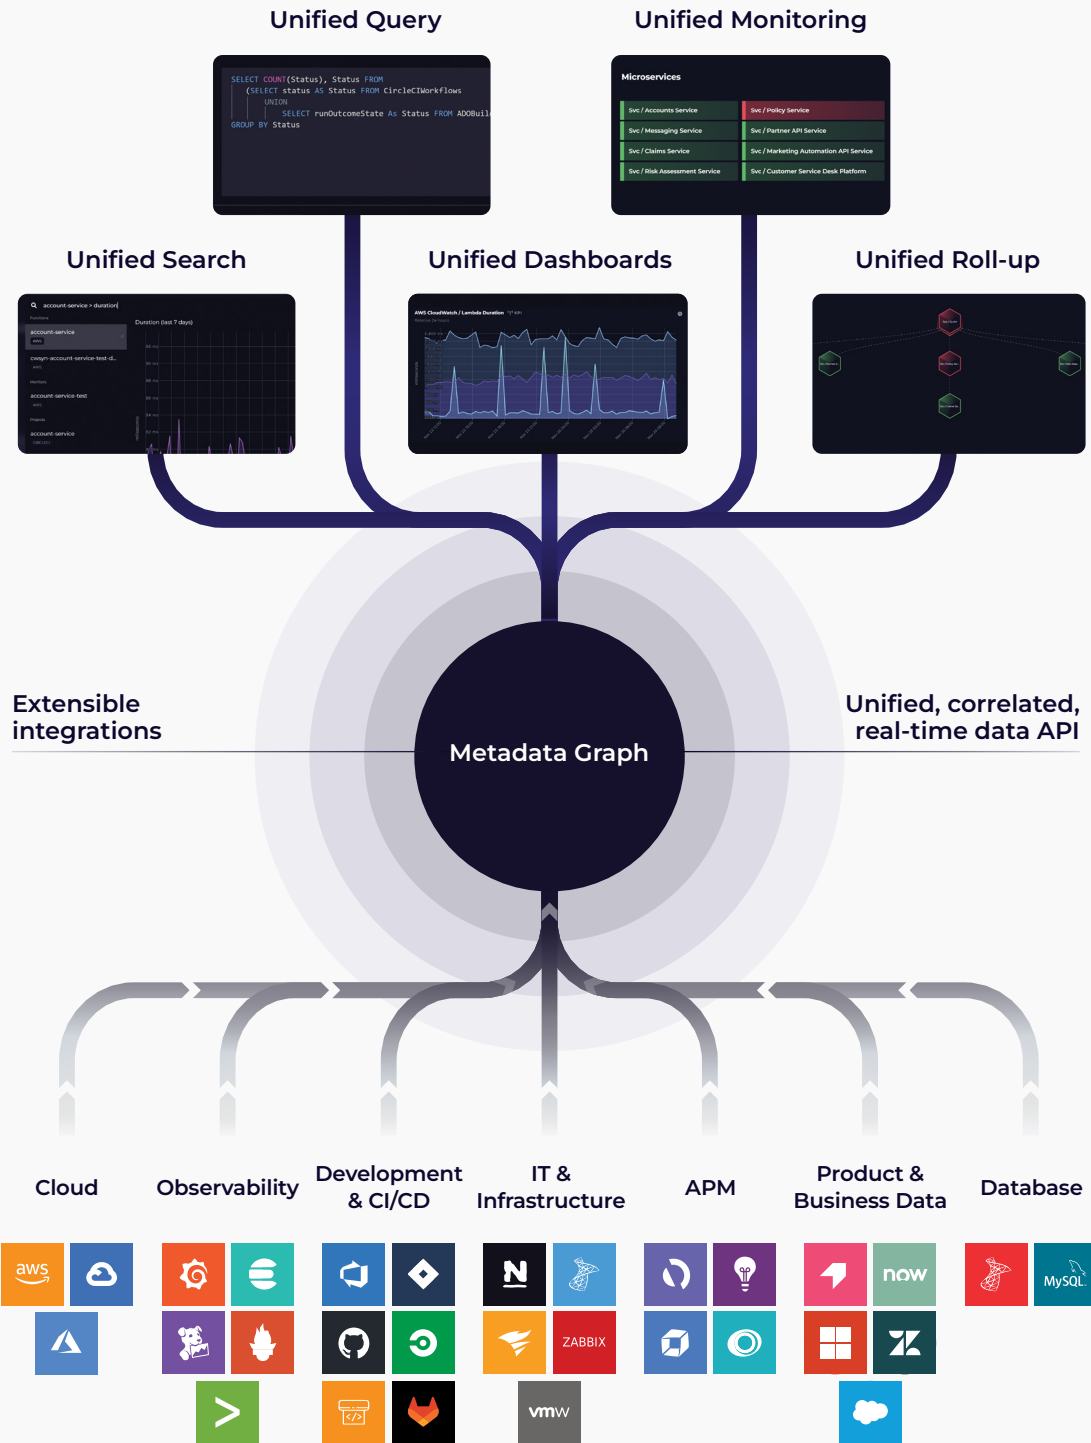

Project status

Hit project deadlines by automating the roll-up of status across multiple teams.

Structured data enables correlation, summarization, and roll-ups across teams

Unified access to data from anywhere

Easily share insights without handing over the keys to low level tools

Powered by data mesh architecture

- ✓ Instant access to observability, cloud, and DevOps data from 100+ data sources
- ✓ Data remains in domain-specific tool, no need for costly databases
- ✓ Correlate engineering data with business level outcomes
- ✓ Unified search, analytics, dashboards, & monitoring

“Rather than buy yet more monitoring products, we chose to create a modern observability platform with the tools we had. SquaredUp is the visibility piece, giving us the plugins to fill all our visibility gaps.”

Anthony Ashmead, Enterprise Monitoring Consultant

ARUP

Loved by hundreds of data-driven engineering teams
