# Azure Cloud
Veritas Backup Solutions for Azure

Using Veritas solutions on Azure, NTT DATA will help you manage your cloud data backups while minimizing back-up costs.

Why Veritas back-up solutions for Azure:

- Cost efficiency
- Complete data security with data encrypted transit and at rest
- Fast, efficient and versatile recovery

NTT DATA's rich heritage in both the ICT infrastructure and data management spaces makes us perfectly positioned to bring together best of breed technology in order to provide you with cost efficient, secure, scalable and compliant data back-up solutions in Azure.

Cloud solutions for data backups are a significant factor in datacenter strategies. Data residing in a hybrid landscape spanning on-premise to cloud adds a layer of complexity to managing a hybrid back-up environment.

1

Cost Efficiency
Reduce backup costs with a powerful and proven end-to-end back-up management solution across your hybrid IT landscape.
Powerful functionality such as deduplication reduces data footprint thereby lowering storage costs. Utilize one console to manage all environments with one single license.

2

Security and Compliance
Automated Storage Lifecycle Policies (SLP's) eliminate redundant manual operations.
One solution to provide streamlined data protection and visibility across all infrastructures, local and remote locations and cloud, reducing data breach risks.

3

Scalable Solutions
Replacing legacy back-up solutions with Cloud, provides fully scalable and cost effective infrastructure to house backup data.
Combining best of breed Veritas and Microsoft Azure technologies, NTT DATA ensures critical back-up data is securely stored in a scalable environment to meet changing business needs.

How Veritas backup solutions for Azure work to achieve business benefits

NTT DATA Solution

- Comprehensive data protection for Azure with multi-cloud data management, storage optimization, compliance readiness and workload portability.
- Comprehensive data back-up management across an organization's hybrid landscape.
- Snapshots of backup data to monitor data health and gain insights into the data at a point in time.
- Easy set-up of back-up policies and compliance management across the hybrid environment.
- Technical solutions to manage end to end costs in the backup environment.

Joint Solution

- Stability, flexibility and scalability of the organization's cloud-based back-up environment.
- Automated storage lifecycle policies (SLP's) to maximize compliance.
- Reduce storage costs in Azure cloud as well as reduced egress costs with deduplication and sharing of snapshots only.
- Rapid problem detection with built in business intelligence tools.
- Agentless functionality reduces time-consuming and high risk manual intervention.
- Best of breed security for backup environments across hybrid IT landscape.

Why NTT DATA

NTT DATA has a proven track record as both a Microsoft and Veritas partner with a large skilled and experienced team of Microsoft and Veritas certified specialists. NTT DATA provides all aspects of IT services from infrastructure to applications development on various platforms. This gives us the ability to deliver solutions for any IT problem. This supports the vital applications development work we provide to an organization's end user. As the global inaugural member of Microsoft Azure Networking MSP Program, NTT DATA is able to provide a full end to end solution to an organization in every industry vertical. Our capability across the full IT stack enables us to provide supporting services giving you an advantage.
