

Secure cloud printing & scanning for business

Office devices are an integral part of any document workflow. They are the interface to the digital world and the key enabler for digitalization initiatives. Securing this interface is crucial to guarantee confidentiality of sensitive business documents. Although printing will always be necessary, businesses are constantly striving for ways to avoid excessive prints¹ to reduce costs and promote a more conscious use of resources. Meanwhile scan requirements have evolved thanks to smart document workflows accelerating digitalization efforts and increasing employee productivity. Cloud services can transform how today's businesses work by increasing security and optimizing processes while reducing capital spending.

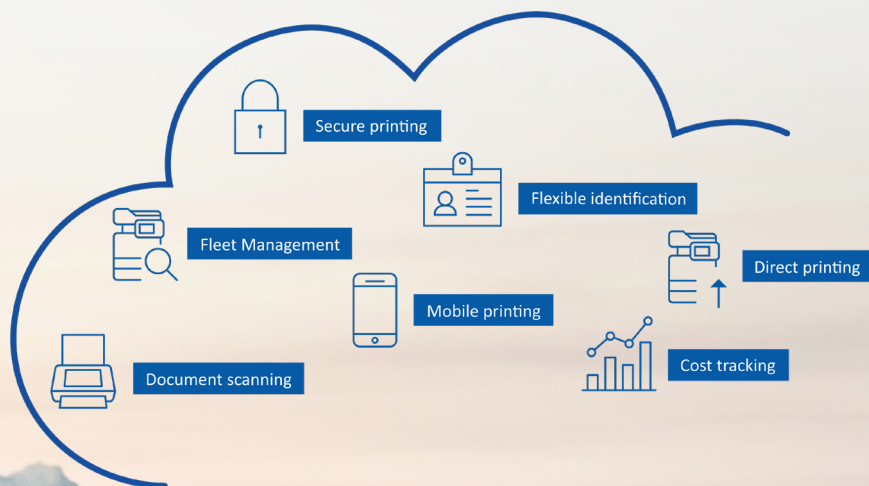

What is uniFLOW Online?

uniFLOW Online is a secure public cloud print and scan solution for businesses of all sizes to manage their entire print environment. It provides the benefits of device identification, secure My Print Anywhere, mobile and guest printing, advanced document scan workflows and cost control within one cloud-solution.

uniFLOW Online is Software-as-a-Service (SaaS) which offers subscription-based functionality that can be booked indi-

vidually or in combination depending on business requirements. It has been designed to meet the needs of businesses who do not want to invest in or manage local servers but still need to control their printing processes.

uniFLOW Online upgrades document security, controls printing costs and increases employee productivity whilst reducing internal IT overheads.

¹ Quocirca (2018): Global Print 2025

Profit from day one

Upgrade security - Keep documents and devices secure

- Print using personal secure print queues; no more documents waiting in the output tray to be collected
- Restrict device access to authorized personnel only
- Ready for your Zero Trust network with micro-segmentation

Eliminate servers and gain control over your print, copy, scan and fax costs

- Remove all local print servers without compromising performance or security
- Above 99 % uptime in the cloud and always the latest software version
- Budgets, cost centers and full accounting for all print, copy, fax and scan jobs

Streamlined processes to improve office productivity

- Print securely from desktop PCs, mobile devices, cloud storage services and BYOD
- Collect print jobs at any device with My Print Anywhere and modify documents on demand before releasing them
- Advanced scan workflows integrate with a variety of scan destinations giving greater flexibility

Fully integrated with Canon devices

Joint development efforts with Canon promote a perfect match and make uniFLOW Online an integral part of the Canon multi-functional devices. Easy start up with tenant creation and adding devices initiated from Canon devices.

However, multi-vendor devices can also be integrated into a uniFLOW Online environment.

In harmony with Microsoft

uniFLOW Online has been developed from the ground-up to take advantage of the benefits of the Microsoft Azure cloud platform; superior enterprise platform security, scalability and resilience or organizations. Various interfaces to Microsoft products e.g. Universal Print, Office 365, Microsoft Teams and OneDrive/ One Drive for Business ensure that uniFLOW Online fits perfectly into the existing office environment.

Simply outstanding

Buyers Lab (BLI), the leading independent evaluator of document imaging software and hardware, awarded uniFLOW Online with a 2024 Pick Award as an Outstanding Cloud Output Management Platform – for the sixth year in a row.
