

**WORKLOGS
SYNC TO TEMPO**

**A portal to synchronize user's
worklogs extracted from different trackers
into target Tempo instance**

A simple setup to connect the Tempo instances

- A simple and single-time setup to connect the Tempo instances (including customers' Tempo account connections) for the system to work automatically further on.

The screenshot displays the 'Settings' page with a sidebar on the left containing icons for a clock, a briefcase, a book, and a gear. The main content area is titled 'Settings' and has a 'Save settings' button in the top right. Below the title, there are tabs for 'Mapping' and 'Customer Tempos', with 'Customer Tempos' selected. A 'Customer Settings' card is shown, featuring a search icon, a 'Remove' button, and a '+ Add settings' button. The card contains several input fields: 'User' (demo), 'User Account Id' (111aaa222bbb333ccc), 'User Tempo Token' (masked with dots), 'User Email' (demo@global-mediator.com), 'User Jira Token' (444ddd555eee666fff), 'Description', and 'Project' (Demo_project). A blue '>>' button is located at the bottom left of the sidebar.

Mapping of external sources to the target Tempo

- To match the values from the customer's system with yours, use customized mapping of fields from an external source into the target Tempo, based on the project, Excel file peculiarities, and column names.

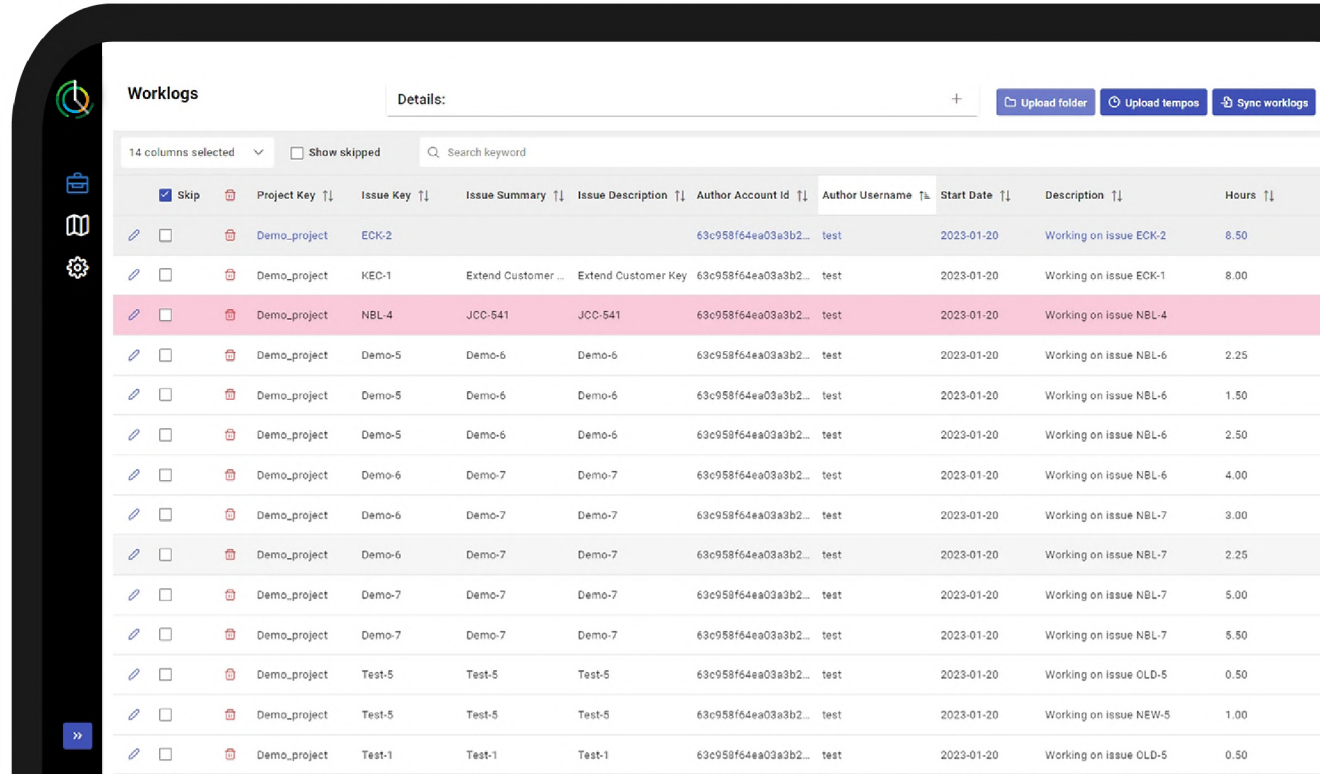

The screenshot displays the 'Mappings' configuration page in Tempo. The page title is 'Mappings' and the specific mapping is 'Demo_mapping'. There are three tabs: 'Mapping' (selected), 'Custom fields', and 'Replacements'. The 'Mapping' tab contains a grid of input fields for mapping external source fields to Tempo fields. The fields are arranged in a grid with the following values:

Mapping: Demo_mapping	Default project: Demo_project	Author Account Id: E	Author Username: F	Billable Seconds	
Description: X	End Time	Hours: C	Issue Description: B	Issue Key: A	Issue Summary: B
Project Key	Remaining Estimate	Start Date: D	MM/DD/YYYY	Start Time	Time Spent Seconds

At the top right of the mapping area, there is a toggle for 'Skip' (disabled), a green 'Save mapping' button, and an orange 'Delete mapping' button. A green '+ Add mapping' button is located at the top right of the page. A sidebar on the left contains navigation icons, and a green '>>' button is at the bottom left of the screen.

Buffer table to review data and check the totals

- In the buffer table, quickly compare the total logged hours per task assignee for a specific project, user, or task via the expandable Details panel.
