

Strengthen cloud security monitoring and response

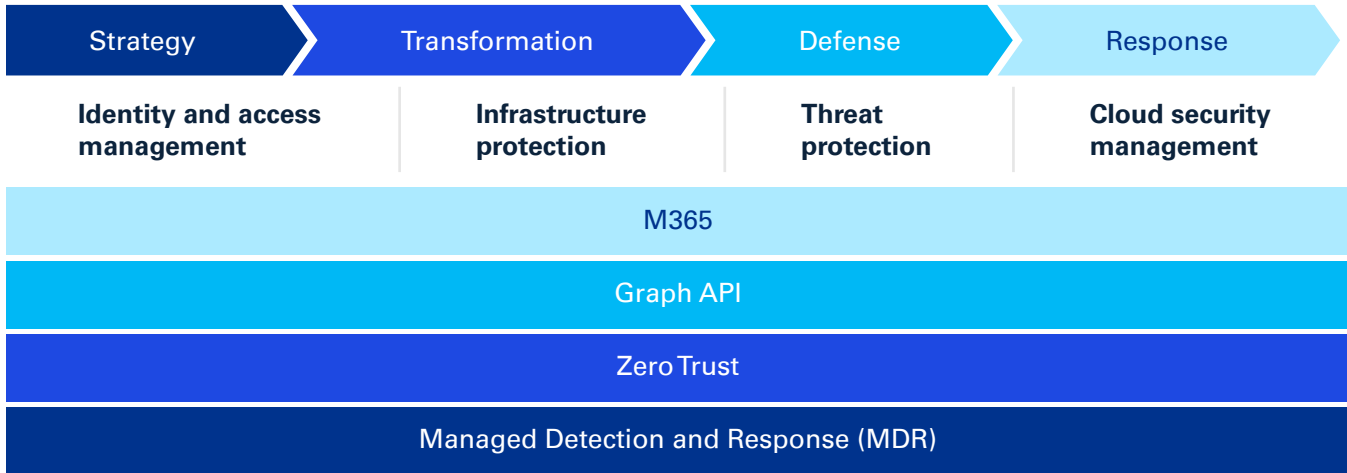

As more IT systems shift to the cloud, organizations continue to push more cloud technologies and solutions into their digital transformation portfolio. This requires security teams to secure not only existing infrastructure, but also learn, train, and adopt new approaches to incident response. When a cyber security incident occurs, the need to quickly identify, contain, remediate, and report a security incident is crucial to an organization's financial, reputational, legal, and operational risk.

KPMG LLP (KPMG) can help you protect critical business processes, assets, and data from cyber-attacks. We combine extensive industry, business process, and consulting experience to develop and implement advanced Microsoft technology solutions. KPMG provides transformation services across the entire cloud lifecycle, and we are a recognized leader in global cyber security.

From strategy and transformation to defense and response, we leverage Microsoft technology to help you:

- Manage secure identity and access with one universal platform
- Defend and protect every layer of infrastructure, data and resources.
- Prevent cyberattacks with integrated and automated security
- Protect, discover, and classify sensitive data in any location
- Manage cloud security and safeguard cross-cloud resources.

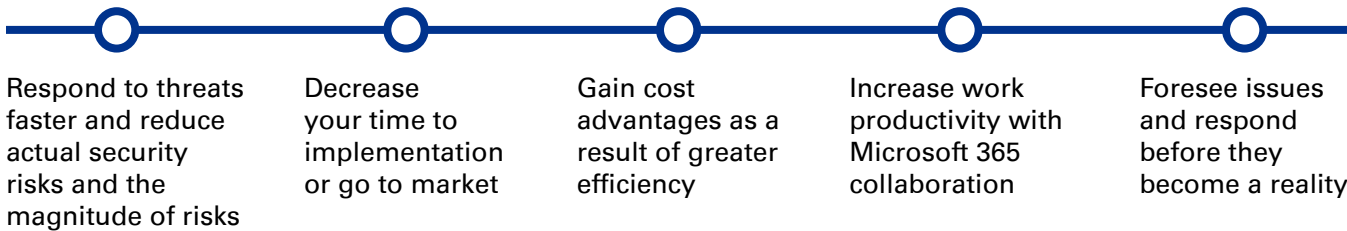

Enhanced security through simplified and intelligent security management with Microsoft.

<p>Visibility Understand the security state and risk across resources.</p>	<p>Control Define consistent security policies and enable controls.</p>	<p>Guidance Elevated security through built-in intelligence and recommendations.</p>

Why KPMG and Microsoft?

Cyber risks can affect brand reputation, investor confidence, customer experience, product integrity and much more. Leveraging tools like the Microsoft Azure Cloud environment, Microsoft 365, and Microsoft Sentinel, KPMG cyber security professionals help you to:

Core offerings

<p>Futureproof Identity and Access Management Consolidate identity and access management platforms to reduce costs and increase agility</p>	<p>Microsoft 365 E3 to E5 Migration Rationalize security tech stack using capabilities available in Microsoft 365 E5 license</p>	<p>Beyond Microsoft 365 Secure global rollout of Microsoft 365</p>
<p>Zero Trust Foundation Build roadmap to enable Zero Trust across your hybrid cloud environment</p>	<p>Modernize Security Operations Modernize security operations with KPMG Powered Enterprise and Sentinel</p>	<p>Security Posture Assessment Baseline your security posture with a security posture assessment</p>

Microsoft Azure security accelerators
Increase speed, agility and scale by leveraging KPMG accelerators to analyze, configure, and operate much faster in Microsoft Azure security environments.

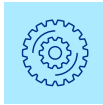

The diagram features a central image of a woman smiling while looking at a tablet. This image is surrounded by a circular ring divided into 15 segments. Each segment is labeled with a specific Microsoft Azure security accelerator. Starting from the top and moving clockwise, the labels are: Azure Script Library, Azure ServiceNow Integration, KPMG Assessment Accelerator, KPMG Zero Trust Accelerator, Threat Protection Policy Suite, DLP Policy Suite, Label & Retention Policy Suite, Microsoft 365 IP Suite, Azure Test Automation, Azure AD Assessment, Azure Policy Suite, Azure-Office 365 IP Suite, Azure Application Onboarding Accelerator, Azure AD Dashboards, and Azure SCIM Connector.

Achieve your cyber security program goals
