

↗ InsightVision

Tailings > Water > Closure

An end-to-end dam management solution designed for the real world.

-  Real-time automated monitoring and data collection
-  Optimised for SCADA, mobile and tablet use
-  Tailored alarming and alerting
-  Achieve your specific needs with a modular, scalable and flexible solution
-  Group and interact with sensors across an asset at a glance
-  Reduce cost and time investment by automating data capture and analysis
-  Capture, display and analyse all your necessary information in one place

ACTIONABLE INTELLIGENCE TO SAFEGUARD ASSETS

Protect your business, the community and the environment with a configurable and supported monitoring solution for informed decision-making.

MORE THAN A SOFTWARE SOLUTION

InsightVision leverages the deep pool of real-world engineering experience at GHD to create an integrated solution that combines cutting-edge technology with in-house expertise to provide a true step change in informed decision making.

YOUR VIRTUAL INTUITION

An elegant solution, InsightVision's integration of domain knowledge and innovative technology creates a powerful data repository which becomes your virtual intuition, enabling identification of critical triggers before they become issues.

Navigate the challenges and opportunities of tomorrow with InsightVision.
