Data Security

Punctuations commitment:

Your document , data and models trained for you are private and:

- are NOT available to other customers.
- are NOT available to OpenAI.
- are NOT used to improve other models.
- are shared with any 3rd party.
- are controlled to ensure authorised access.

Data Privacy

ISO 27001:2013 Certified

Microsoft's commitment:

Your questions / document (inputs) and answers (outputs), your embeddings, and your training data:

- are NOT available to other customers.
- are NOT available to OpenAI.
- are NOT used to improve OpenAI models.
- are NOT used to improve any Microsoft or 3rd party products or services.
- are NOT used for automatically improving Azure OpenAI models for your use in your resource.

The Azure OpenAI Service is fully controlled by Microsoft; Microsoft hosts the OpenAI models in Microsoft's Azure environment and the Service does NOT interact with any services operated by OpenAI (e.g. ChatGPT, or the OpenAI API).

Use Cases

Sales Assistant

Have a virtual salesman on your website or social media

Your bot only needs access to all your public documentation and will answer any clarifying questions

Bot will generate leads into your desired platform

Answer FAQs around your product or service

Bot can also be set to ask qualifying questions before taking the lead ahead

WebQnA

Knowledge
Librarian -
Internal bot

Give webqna access to all your data silos
Our connectors will connect and index all the
content

Bot framework will then answer direct questions
about anything in the data

No longer are users needed to go over several
answers to find the most relevant one, cause AI is
already doing that for them

This is great for contact centers, business continuity
and enabling users to find answers without having to
reach to the expert on the team

WebQnA

Human Resources & Employee Onboarding

Streamlined Onboarding Process

Chatbots can guide new employees through the onboarding process, providing information about policies, benefits, and procedures.

Quick Access to HR Information

Employees can get immediate answers to common HR-related queries.

Reduced HR Workload

Automating routine inquiries allows the HR team to focus on more strategic tasks.

Enhanced Employee Engagement

Interactive and instant communication improves employee engagement and satisfaction.

Role playing - Tutor

Add skills to your bot to use it to evaluate how well your users have understood a concept or have them explore a particular topic

Applications:

- HR campaigns
- Learning new skills
- Evaluate employee understanding

HDFC Internal

Skill : HDFC Employee's Conduct and Ethics

Change ▾

Start Again

What should an employee do if they have a conflict of interest with the bank or its constituent?

report it to superior

Good job! Reporting a conflict of interest to a superior is the right action to take in such a situation. It ensures transparency and helps in maintaining ethical conduct.

Now, here's your next question: According to the HDFC code of conduct, what types of gifts can an employee accept?

we should not accept any gifts from customers

Excellent! You are correct. As per the HDFC code of conduct, an employee should not accept gifts from customers. This helps to avoid any perception of favoritism or conflicts of interest.

Now, here's your next question: What is the expected behavior of an employee in terms of privacy and confidentiality of customer and third-party data, according to the HDFC code of conduct?

Customer Support & Engagement

Having a AI bot on your website powered by an LLM like chatgpt can help with lead generation

24/7 Availability: Chatbots can provide round-the-clock support, answering common queries and offering assistance outside of regular business hours.

Efficient Query Resolution: They can quickly resolve standard questions, freeing up human agents to handle more complex issues.

Guided Navigation: Helps users navigate the website, enhancing user experience and satisfaction

Integration: Can feed customer data back into the CRM for better analytics
