

# SECURITY+

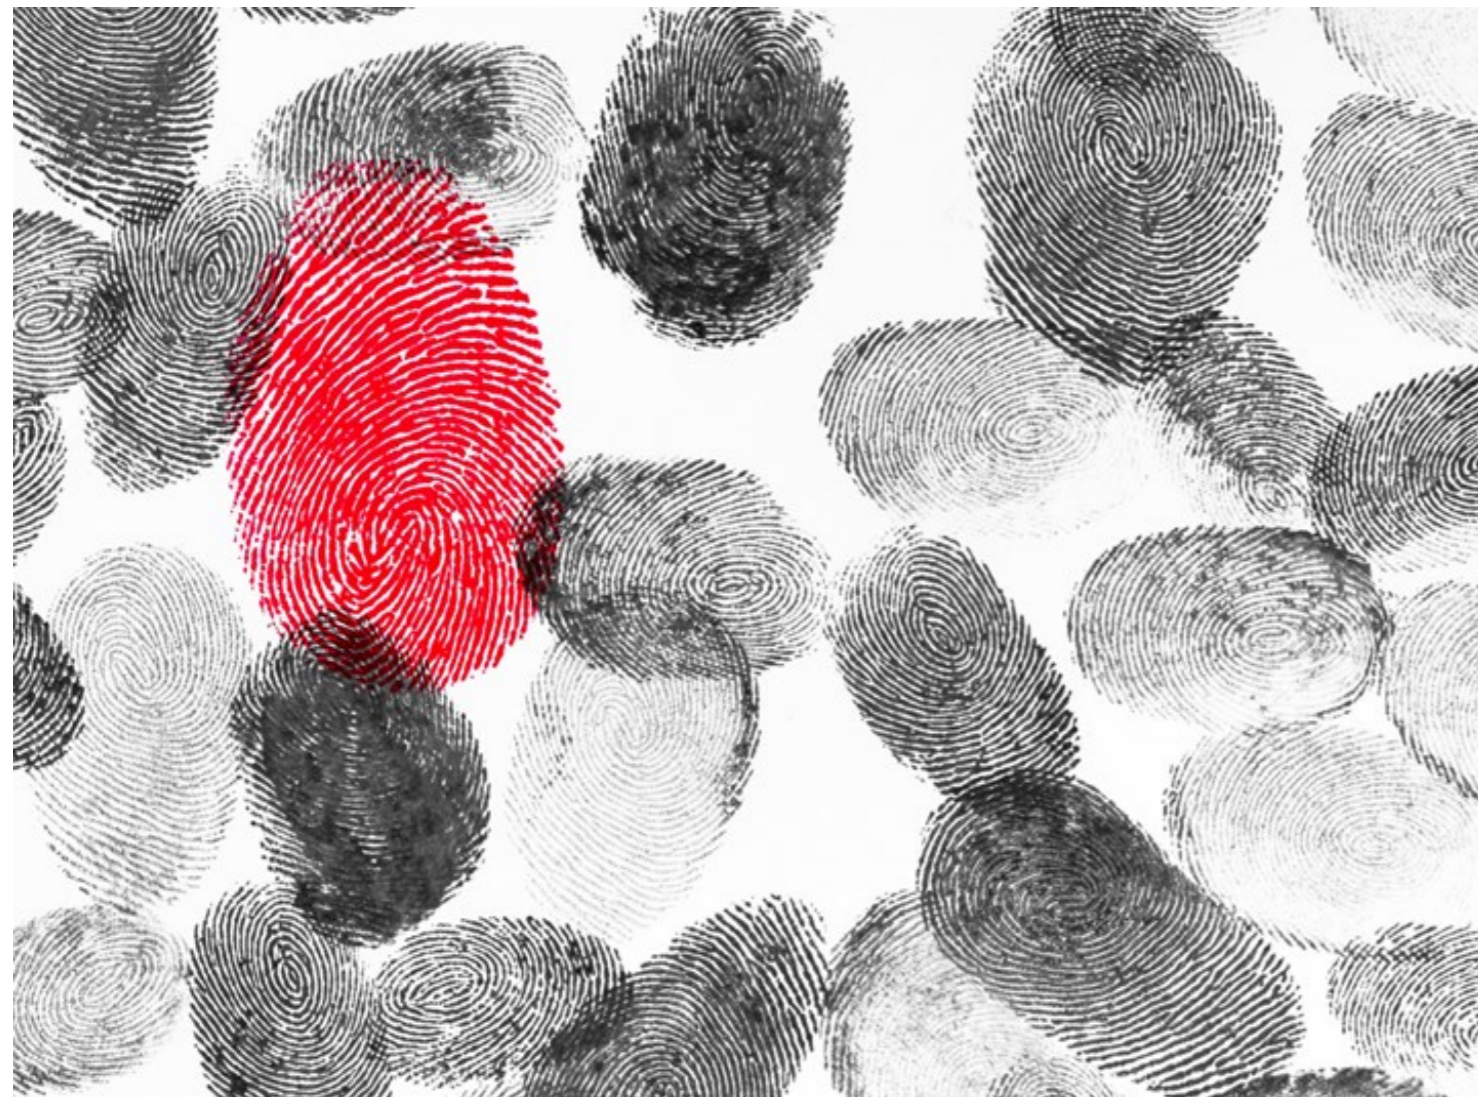

---

A cloud-based tool for Personnel Security screening, leveraging MS D365 and Power Apps.

May 29, 2024

# Security staff need to coordinate, manage, provide advice on security controls.

Security officials need to protect their firm, deliver quality services, and be both cost-effective and timely in their efforts. Employee Security screening and security file management is important in maintaining secure operations.

## Primary challenges

Security screening involves considerable process and due diligence including security application forms, finger printing, criminal record or credit checks, secure level processing, and security incident management.

## Ideal solution

Security+ takes this challenge head on with an advanced tool that can be essential for a firm's overall security strategy. It can automate security screening & monitor activity during an employee's firm life cycle.

## Desired outcomes

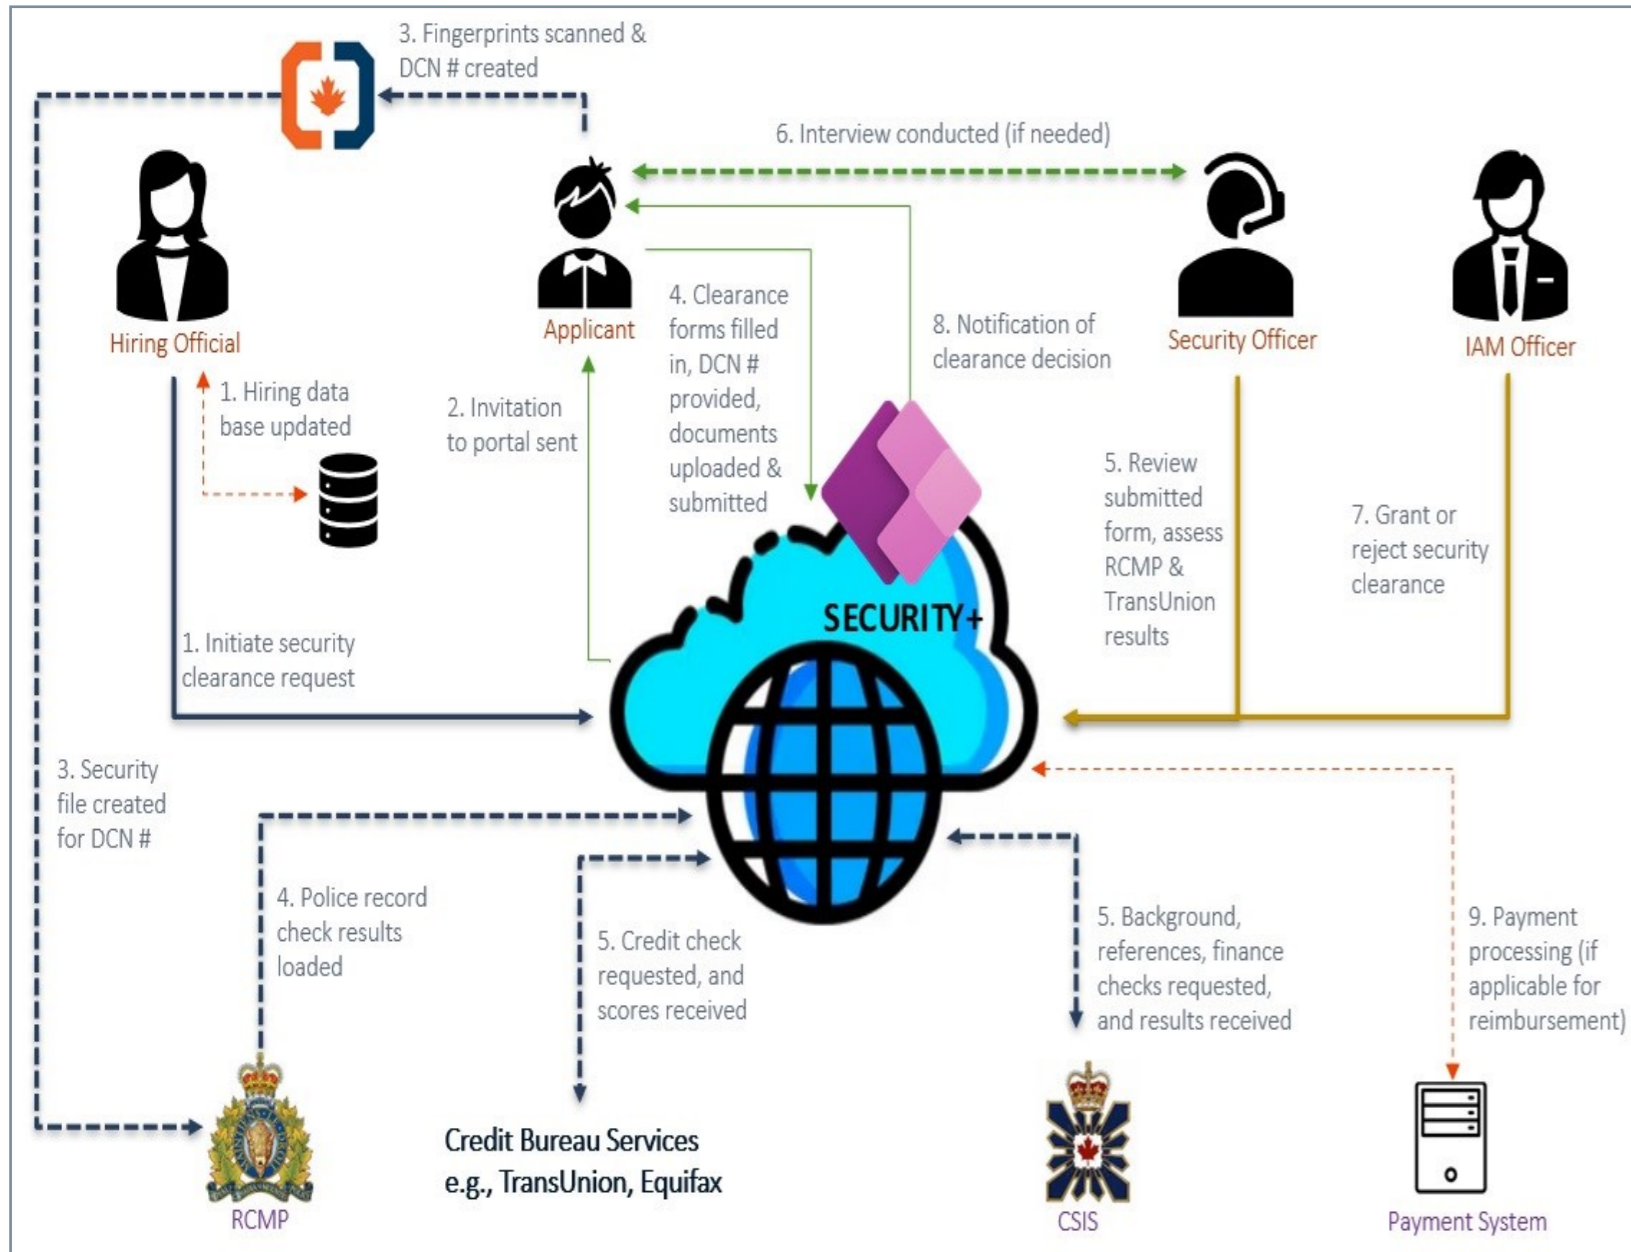

With Security+, firm will be able to enable an advanced automated solution for security screening and security file management processes leading to increased efficiency, and expedited security review timelines.

# What is Security+?

Security+ provides an advanced Personnel Security Platform with the capability of adapting to unique security screening requirements of any agency, to improve overall processing for high volume of clearances.

## Web Portal Features

Secure access to portal, online profiles & forms, multi-lingual, WCAG 2.1AA compliant, mobile compatible.

## Security Officer Admin Features

Process Security Clearances for Applicants, Decisions & Incident Management, Track Expiry, Terminations.

## Facilitates Performance Reporting

Enable dashboards & reports on granted clearances, summary of decisions, pending or renewing clearances.

# Eperformance, Security+, and Microsoft Power Platform

With a constant need for efficient automation & enhanced performance to shorten timeline to design, build and deploy solutions, Eperformance strives to rapidly implement optimized solutions using MS Power Platform - for legacy system migration, deliver business goals or providing support to manage, extend or complement existing solutions.

## ✔ Integrate MS in Business Decisions

Our certified experts can plan, architect & implement strategically to align business objectives with technology needs to maximize return on investment.

## ✔ Build on Power Platform capabilities

The guidance, tools, templates and best practices used by Eperformance can help increase the consistency, quality & success of MS tool usage.

## ✔ Integration to other tools

Integrate with Microsoft Teams, Office, SharePoint or use Power automate for secure access like Fingerprint Scanners, CSIS, Equifax etc.
