YOUR STORY

Strategize and plan your comms

Align key messages and stop information overload with easy-to-use editorial planning tools.

One company wide overview

- Drag and drop calendar to prioritize and schedule news posts, emails, and publishing blockers across teams
- Plan and drive communication campaigns to support business initiatives
- Set and track strategic goals for your content

Automate personalized employee communication experiences

- Surface selected content in moments that matter like onboarding, role changes, change communication, and more
- Build personal and meaningful feedback loops

Create meaningful communications

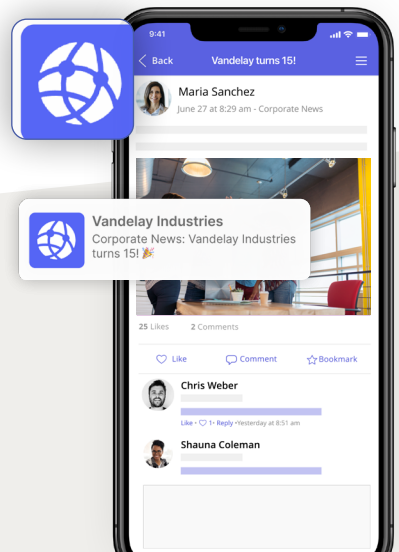

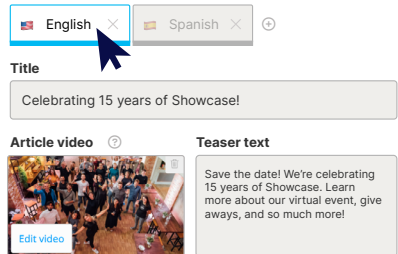

Reach employees where they already are, build new owned channels - or both.

Keep employees informed

- Design news updates and add multimedia using pre-made content blocks
- Translate content automatically
- Publish or send on behalf of others

Branded for your organization and personalized for your employees

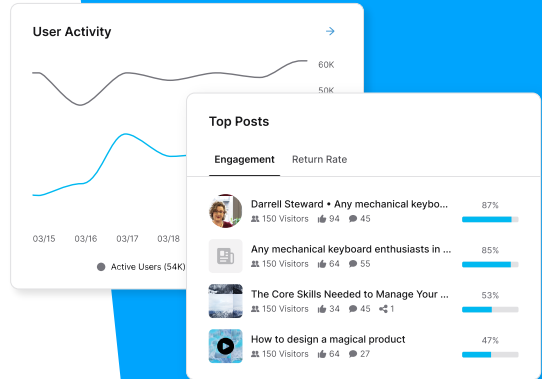

- Your app, intranet, and any communications are fully white labeled- your employees only see your brand, not ours
- News posts, navigation structures and more are customizable by employee attributes like, location and department

Measure what matters

Optimize your internal communication and back up the business value of your work.

- From individual content to annual campaigns, see the results of your communication in one sleek dashboard.
- Understand employee behavior and identify patterns at multiple levels.

Build employee feedback loops

- Create quick pulse surveys, track eNPS and more
- Ask recurring questions and track the results over time
