

The Staffbase Front Door Intranet

ALWAYS INCLUDES A BRANDED MOBILE APP

A new way to Intranet!

Meet the Staffbase Front Door Intranet, a communications-focused intranet that provides easy access to info and services. Our mobile-first approach works for all employees, from the back office to the frontline, with a highly personalized and relevant experience.

Half of companies do not believe they have an effective intranet.

The #1 challenge of intranets today is that they don't reach all employees.
