

PEXIP CONNECT

Standard

Industry-leading interoperability. Modern video infrastructure. Complete management and analytics. All in one.

Join any video meeting from any room

When your organization and the people you work with use multiple video conferencing and collaboration solutions, Pexip Connect Standard eliminates the complexity of meeting across platforms and devices. It enables every room device to join any video meeting and directly call any other room or video meeting device for a consistent and seamless meeting experience for all users.

Pexip's best in class interoperability paired with modern software-based video conferencing infrastructure and management ensures seamless communication for anyone inside and outside your organization.

Unique multiplatform interoperability

Unmatched room and meeting interoperability for Microsoft Teams, Google Meet, Cisco Webex, Zoom, and most other video meeting platforms.

Future-proof your video communication

Replace infrastructure appliances and services to benefit from modern and familiar user experiences everywhere—managed and run from a single screen.

Choose between cloud or self-hosted

Available as both a SaaS and a self-hosted platform. Where SaaS provides the convenience of cloud, self-hosted offers greater control over security and privacy.

Best-in-class interoperability combined with modern software-based video infrastructure

Product Specifications

Pexip Connect Standard includes all the features and capabilities required for seamless communication between any physical room and any virtual meeting. Its capabilities extend beyond mere connectivity, offering a complete replacement for existing legacy premises-based video conferencing appliances, breathing new life into your organization's collaboration infrastructure.

Pexip's intuitive user interface makes it remarkably easy to manage and operate, even for users with limited technical expertise.
