ACCELERATE FINANCIAL CONSOLIDATION PROCESS ACROSS ALL BUSINESS ENTITIES!

Use CFOUR to streamline your financial consolidation process.

WHAT IS CFOUR?

CFOUR is a financial tool that assists inter-company consolidation by centralising data from various sources. It allows for flexible collaboration to process consolidation faster and get accurate reports instantly.

WHY CFOUR?

Accurate Data

A controlled environment and version traceability ensure the accuracy of reports. With all necessary data stored in one database, data integrity is guaranteed.

Better Process Visibility and Control

This tool is designed in a governed environment to centralise the process through the collaborative dashboard.

Faster Consolidation

Reduce the laborious time taken to extract and process data

PROCESS FLOW

1. Collate

The first stage in the process that takes data from different sources such as Excel or ERP to one data stream.

2. Compile

Stage two is the compilation of the subsidiary companies' financial accounts.

3. Calibrate

This stage involves journal entries where inter-company elimination is logged and validated through a simple user-friendly interface.

4. Consolidate

The final stage is to consolidate the subsidiary accounts into the holding company.

PRODUCT FEATURES

Source-Agnostic Centralised Data

Agnostic to any source of data Cfour centralises reports to one database ensuring data integrity.

Better Process Visibility and Control

Cfour focuses on improving the process of consolidation ensuring complete visibility and consistency.

Data Visualisation

Unlock new insights and find new ways to interpret financials through data visualisation.
